Patient Safety and Quality of Care in Intensive Care Medicine Jean-Daniel Chiche, 2009 The maxim *Primum non nocere* is almost as old as the practice of medicine In combination with the principles of beneficence autonomy and justice and whilst keeping in mind the confidence and dignity of the patient it should constitute the basis of our behaviours as physicians and nurses Since diagnostic and therapeutic interventions have become more complex and their risk benefit ratios more difficult to assess the importance of safety and quality of care rises Avoiding the infliction of harm on our patients has moved into the focus of clinical medicine Publisher's description

Leading Evidence Informed Value Improvement in Healthcare John Ovreteit,2009-10-04 Improvement in healthcare has not delivered on its promise outside of a few examples This is because it has not sufficiently been linked to resources thus argues this book Value improvement focuses on changes which raise quality and lower costs This is effective because it unites professions patients payers and purchasers in a common cause and uses tested solutions and methods Value improvement works with the realities of resources and politics and with knowledge of what is effective in different situations The purpose of healthcare is to reduce avoidable suffering This includes the suffering unknowingly caused by a service when we do not use an effective treatment or make an error These events are also waste and they have a financial cost The good news is that we now have more knowledge about these adverse or subA optimal events and about effective solutions We now know these organisational events are not inevitable and we can prevent them We are also beginning to discover that many if prevented will reduce the costs of healthcare Improving diagnosis and prescribing reduces both avoidable sufferA ing and higher costs as do hygiene strategies and changes to ensure professionals pass on correct information about patients to the next caregiver We are entering an exciting time in healthcare equivalent to earA lier periods of medical discoveries The discoveries of

improvement and implementation science in organisations are now being linked to the discoveries about the costs and savings of quality and safety changes. This knowledge is beginning to be used by clinicians, management and purchasers and alliances are forming to bring in a new era of quality and safety improvement. The aim of this book is to show how ordinary leaders can combine improvement knowledge with resource knowledge to reduce suffering and the costs of healthcare. It does not assume good information technology or special resources to help improvement. It recognises that our colleagues may not want to spend time on this work and often do not do what they are asked to do. It recognises some improvements are not value improvements; they do not add value for patients and reduce costs. Where improvements do both, we may find that the financing system penalises the provider for making the change or we cannot convert the saved resources into lower costs or higher income. Thus it is also about both short term and long term value improvements. It is about how managers and other leaders find and awaken energy in themselves to make improvement and bring this energy to life in the people they work with. How we channel this energy in effective ways and enable others to make improvement. It is about tomorrow and next week and about where the real innovation, creativity and inspiration happens in the routine but changing short staffed semi chaos of most health services. We are not powerless and can choose not to accept failings of the health system as being outside of our influence. A few others have shown what can be achieved when we join in a common cause and use these effective methods. The challenge is for us to do this in our local service and to connect our services.

10 Essentials for High Performance Quality in the 21st Century Diomidis H. Stamatis, 2016-07-22 As a society we tend to reward problem solvers rather than those who prevent problems at their source. In other words we focus on after the fact occurrences, appraisal activities instead of trying to eliminate these occurrences, preventing activities. Discussing and evaluating the core requirements of quality, efficiency and improvement. 10 Essentials for High Performance Quality in the 21st Century proposes an approach to help shift the paradigm of quality from appraisal mode to preventing mode. Identifying 10 steps readers can follow to optimize the quality of products and improve customer satisfaction, the book explains the rationale behind each of the steps in separate chapters. It addresses specific quality issues in six different sectors of the economy and provides statistics, tables and figures from various organizations that support the need for a paradigm shift. Outlining a systematic process to guide your organization along the path toward improvement, the book covers risk and quality, multicultural management, empowerment, error analysis, team building, advanced quality planning and quality operating systems. The accompanying downloadable resources provide tips and tools to help you implement all the necessary improvement initiatives under the umbrella of quality.

Coming to Critical Engagement Frank A. Fear, 2006 Engagement is the label increasingly embraced by higher education to describe activities associated with serving the public interest What had been viewed previously as service to extension of and outreach from is now engagement with as faculty members students and staff collaborate with partners in community affairs This book describes how members of a faculty learning community have come to understand engagement as both intellectual endeavor and scholarly practice at the interface between academy and citizenry Coming to Critical Engagement argues that the academy has a moral imperative to participate deliberately and consistently in democratic and systemic discourse with the public

Closing the Quality Gap Kaveh G. Shojania, 2004

Positive Aging and Precarity Irina Catrinel Crăciun, 2019-05-10 This book explores positive aging through the lens of precarity aiming to ground positive aging theories in current social contexts In recent years research on aging has been branded by growing disagreements between supporters of the successful aging model and critical gerontologists who highlight the widening inequalities disadvantages and precarity that characterize old age This book comes to fill a gap in knowledge by offering an alternative view on positive aging informed by precarity and its impact on projections concerning aging The first part of the book places aging in broader theoretical and empirical context exploring the complex links between views on aging successful aging theories policy and social reality The second part uses results from a qualitative research conducted in Germany to illustrate the dissonance between successful aging ideals and both negative and positive views on aging as well as aging preparation strategies inspired by precarity Findings from this section provide a solid starting point for comparisons with countries that are both similar and different from Germany in terms of welfare regimes and aging policies The final part of the book discusses the psychological implications of these findings within and beyond the German case study and outlines potential solutions for practice This book provides health psychologists

gerontologists sociologists social workers health professionals as well as students and aging individuals themselves with better understanding of the meaning of aging in precarious times and builds confidence about aging well despite precarity

Science Teachers' Learning National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Teacher Advisory Council, Board on Science Education, Committee on Strengthening Science Education through a Teacher Learning Continuum, 2016-01-15 Currently many states are adopting the Next Generation Science Standards NGSS or are revising their own state standards in ways that reflect the NGSS For students and schools the implementation of any science standards rests with teachers For those teachers an evolving understanding about how best to teach science represents a significant transition in the way science is currently taught in most classrooms and it will require most science teachers to change how they teach That change will require learning opportunities for teachers that reinforce and expand their knowledge of the major ideas and concepts in science their familiarity with a range of instructional strategies and the skills to implement those strategies in the classroom Providing these kinds of learning opportunities in turn will require profound changes to current approaches to supporting teachers learning across their careers from their initial training to continuing professional development A teacher's capability to improve students scientific understanding is heavily influenced by the school and district in which they work the community in which the school is located and the larger professional communities to which they belong Science Teachers Learning provides guidance for schools and districts on how best to support teachers learning and how to implement successful programs for professional development This report makes actionable recommendations for science teachers learning that take a broad view of what is known about science education how and when teachers learn and education policies that directly and indirectly shape what teachers are able to learn and teach The challenge of developing the expertise teachers need to implement the NGSS presents an opportunity to rethink professional learning for science teachers Science Teachers Learning will be a valuable resource for classrooms departments schools districts and professional organizations as they move to new ways to teach science
