Questioning Europe:

Questioning EU Enlargement Helene Sjursen, 2007-01-24 This new book takes a unique approach to the study of European enlargement tackling key questions What kind of understanding of the EU do the enlargement processes speak to Do decisions to enlarge mainly suggest that the EU is a free market focusing on potential economic gains Do they indicate that there is a sense of common European identity Or is the focus primarily on securing respect for democratic principles and human rights Offering up to date studies of the EU enlargement processes and country specific in depth analyses

Questioning EU Enlargement will be a valuable resource for students and scholars of European studies international relations and politics

Questioning EU Citizenship Daniel Thym, 2017-12-28 The question of supranational citizenship is one of the more controversial in EU law It is politically contested the object of prominent court rulings and the subject of intense academic debates This important new collection examines this vexed question paying particular attention to the Court of Justice Offering analytical readings of the key cases it also examines those political social and normative factors which influence the evolution of citizens rights This examination is not only timely but essential given the prominence of citizen rights in recent political debates including in the Brexit referendum All of these questions will be explored with a special emphasis on the interplay between immigration from third countries and rules on Union citizenship

Europe
Jürgen Habermas, 2014-11-05 The future of Europe and the role it will play in the 21st century are among the most important political questions of our time The optimism of a decade ago has now faded but the stakes are higher than ever The way these questions are answered will have enormous implications not only for all Europeans but also for the citizens of Europe s closest and oldest ally the USA In this new book one of Europe s leading intellectuals examines the political alternatives facing Europe today and outlines a course of action for the future Habermas advocates a policy of gradual integration of Europe in which key decisions about Europe s future are put in the hands of its peoples and a bipolar commonality of the West in which a more unified Europe is able to work closely with the United States to build a more stable and equitable international order This book includes Habermas s portraits of three long time philosophical companions Richard Rorty Jacques Derrida and Ronald Dworkin It also includes several important new texts by Habermas on the impact of the media on the public sphere on the enduring importance religion in post secular societies and on the design of a democratic constitutional order for the emergent world society

Europe and the British Geographical Imagination, 1760-1830 Paul Stock, 2019-10-03 Europe and the British Geographical Imagination 1760 1830 explores what literate British people understood by the word

Europe in the late eighteenth and early nineteenth centuries Was Europe unified by shared religious heritage Where were the edges of Europe Was Europe primarily a commercial network or were there common political practices too Was Britain itself a European country While intellectual history is concerned predominantly with prominent thinkers Paul Stock traces the history of ideas in non elite contexts offering a detailed analysis of nearly 350 geographical reference works textbooks dictionaries and encyclopaedias which were widely read by literate Britons of all classes and can reveal the formative ideas about Europe circulating in Britain ideas about religion the natural environment race and other theories of human difference the state borders the identification of the centre and edges of Europe commerce and empire and ideas about the past progress and historical change By showing how these and other questions were discussed in eighteenth and nineteenth century British culture Europe and the British Geographical Imagination 1760 1830 provides a thorough and much needed historical analysis of Britain s enduringly complex intellectual relationship with Europe Britain and the European Union - Frequently Asked Questions , **India, Europe and the Question of Cultural Difference** D. Venkat Rao,2021-07-29 This volume critically engages with the question of cultural difference and the idea of living with diversity in the context of India and Europe It looks at certain essential European categories of learning such as art nature the human literature relation philosophy and the humanities and analyses texts from Sanskrit language through Telugu resources to argue that categories like prakriti loka jati dharma karma sahitya kala etc cannot be conflated with conceptual formations such as nature world caste religion sanctioned action literature and art respectively The book questions and unravels the efficacy of European concepts theories and interpretive frames in understanding Indian reflective traditions and cultural forms It also lays the groundwork for reorienting teaching and research in universities in the humanities on the basis of key cultural differences By focusing on major themes in the humanities discourse and their limitations the work engages with the writings of Heidegger Derrida and Agamben among others from radically new vantage points of Sanskrit Indian reflective traditions and challenges prevailing ideas about Indian art literature and culture Part of the Critical Humanities Across Cultures series this book will be an essential read for scholars and researchers of Indian languages and literature comparative literature art and aesthetics postcolonial studies cultural and heritage studies philosophy political philosophy comparative philosophy Sanskrit studies India studies South Asian studies Global South studies and for those working on education in the humanities human sciences

Parliamentary Oversight of the Executives Elena Griglio,2020-10-01 Oversight of executives has always been a key function of parliaments and one that is central to developing the relationship between the executive and legislative branches of government However in reality governments are taking a more pronounced role in controlling legislation diluting the influence of parliament This book plots this trend in parliaments across Europe to illustrate points of convergence and divergence In so doing it suggest tools and methods that parliaments can develop to bolster their crucial oversight role

Improperly Obtained Evidence in Anglo-American and Continental Law Dimitrios Giannouloupoulos,2019-02-21

This is the first book to offer an extensive cosmopolitan cross cultural insight into the perennial controversy over the use of improperly obtained evidence in criminal trials It challenges the conventional view that exclusionary rules are idiosyncratic of Anglo American law and highlights the constitutionalisation and internationalisation of criminal evidence and procedure as a cause of rapprochement or divergence beyond the Anglo American and Continental law divide Analysis focuses on confessional evidence and evidence obtained by search and seizure telephone interceptions and other means of electronic surveillance The laws of England and Wales France Greece and the United States are systematically compared and contrasted throughout this study but where appropriate analysis extends to other Anglo American and Continental legal systems The book reviews exclusionary rules vis vis the operation of judicial discretion and explores the normative justifications that underpin them It attempts to reinvigorate the idea of excluding evidence to protect constitutional or human rights the rights thesis arguing that there is significant scope for Anglo American and Continental legal systems to place a renewed emphasis on it particularly in relation to confessional evidence obtained in violation of custodial interrogation rights we can locate an emerging rapprochement and unique potential for European Court of Human Rights jurisprudence to build consensus in this respect In marked contrast remaining divergence with regard to evidence obtained by privacy violations means there is little momentum to adopt a reinvigorated rights thesis more widely Longlisted for the Inner Temple Book Prize 2022

A Litmus Test for Democratic Politics in Europe Julien Navarro, 2022-12-26 This book investigates how political actors and more particularly members of parliaments have reacted to Brexit to assess its long term consequences Brexit has not only been a major disruption affecting the functioning and internal balance of the European Union EU but to a very large extent it also represents a challenge to the idea of an ever closer union and to the democratic principles on which the EU has been built Relying on empirical explorations of regional and national parliaments across the continent as well as the European Parliament the chapters in this volume address three intertwined sets of questions regarding the evolution of democratic politics in Europe in the wake of Brexit Firstly how do citizens representatives assess the UK's decision to withdraw from the EU and its consequences Secondly what is the impact of Brexit as regards the politicisation of the debate on Europe Has Brexit exacerbated existing political divisions or generated new cleavages Thirdly and crucially have parliaments attempted to and succeeded in influencing Brexit negotiations and their outcome What positions did parliamentarians promote in these negotiations What model for the future of the EU did they defend The book is key reading for all students and researchers interested in Politics and International Relations Elections European Studies and European Union Politics This book was originally published as a special issue of the Journal of Contemporary European

Studies Perceptions of Europe Daniel Gaxie, Nicolas Hubé, Jay Rowell, 2013 This book presents the main findings of a comparative qualitative survey conducted in France Germany Italy and Poland Ordinary citizens from very different social backgrounds and professions were asked a range of open ended questions allowing them to express themselves freely There have been few qualitative surveys on ordinary citizens views of European integration and none on this scale The resulting picture is very different from the self evident assumptions of many current studies on European opinions The book stresses the great diversity ambiguity and complexity of European attitudes It emphasises the causal impact of formal education political interest and involvement individual everyday exposures to European realities and the role of collective national experiences of European integration and national history This book is the first qualitative survey among ordinary from all social strata across Europe that explores perceptions and judgments on Europe and the EU explains the underlying logic of why Europe and European integration are such a far reality to most citizens explores how most citizens are poorly but unequally informed about and interested in European subjects investigates how citizens are able to express perceptions of Europe by using a series of analogies and comparisons often linked to their daily experiences identifies the complex range of issues that influence our perceptions and the irresolute fragmentary mixed and sometimes contradictory nature of these opinions

Academic Identities in Higher Education Linda Evans, Jon Nixon, 2015-04-23 Academic identity is continually being formed and reformed by the institutional socio cultural and political contexts within which academic practitioners operate In Europe the impact of the 2008 economic crisis and its continuing aftermath accounts for many of these changes but the diverse cultures and histories of different regions are also significant factors influencing how institutions adapt and resist and how identities are shaped Academic Identities in Higher Education highlights the multiple influences acting upon academic practitioners and documents some of the ways in which they are positioning themselves in relation to these often competing pressures At a time when higher education is undergoing huge structural and systemic change there is increasing uncertainty regarding the nature of academic identity Traditional notions compete with new and emergent ones which are still in the process of formation and articulation Academic Identities in Higher Education explores this process of formation and articulation and addresses the question what does it mean to be an academic in 21st century Europe **Concentrate Questions and Answers EU Law** Nigel G. Foster, 2016 This essential Q A study and revision guide contains a variety of model answers and plans to give you the confidence to tackle any essay or problem question and give you the skills you need

The Age of Questions Holly Case, 2018-07-10 A groundbreaking history of the Big Questions that dominated the nineteenth century In the early nineteenth century a new age began the age of questions In the Eastern and Belgian questions as much as in the slavery worker social woman and Jewish questions contemporaries saw not interrogatives to be answered but problems to be solved Alexis de Tocqueville Victor Hugo Karl Marx Frederick Douglass Fyodor Dostoevsky Rosa Luxemburg and Adolf Hitler were among the many who put their pens to the task The Age of Questions asks how the question form arose what trajectory it followed and why it provoked such feverish excitement for over a century Was there a family resemblance between questions Have they disappeared or are they on the rise again in our time In this pioneering book Holly Case undertakes a stunningly original analysis presenting chapter by chapter seven distinct arguments and frameworks for understanding the age She considers whether it was marked by a progressive quest for emancipation of women slaves Jews laborers and others a steady inexorable march toward genocide and the Final Solution or a movement toward federation and the dissolution of boundaries Or was it simply a farce a false frenzy dreamed up by publicists eager to sell subscriptions As the arguments clash patterns emerge and sharpen until the age reveals its full and peculiar nature Turning convention on its head with meticulous and astonishingly broad scholarship The Age of Questions illuminates how patterns of thinking move history

The Question of Competence in the European Union Loïc Azoulay, 2014-02-20 The classic debate surrounding the prolific role of the European Union in defining spheres of competence and power relationships has long divided scholarly opinion However in recent years the long standing acquiescence to the broad powers of the Union has given way to the emerging perception of a competence problem in Europe For a long period it was taken for granted that the European Community could act whenever its action was justified on the basis of the widely interpreted objectives of the Treaties However this context has since changed There is a widespread perception of a competence problem in Europe and the overabundance of provisions limiting the Union s competences is one of the most obvious marks left by the Lisbon Treaty This book discusses the extent to which the parameters of power throughout the Union and its Member States have been recast by the recent implementation of the Lisbon Treaty and doctrines developed by the European Court of Justice Comprised of contributions from a vast array of leading practitioners and academics in the field of EU Law this volume assesses the debate surrounding the political identity of the European Union and further illustrates the relevance of the Federal theory of sharing competences for the development of EU Law Finally the question of new potential limits to Union s competence is addressed If anything this broad reflection on the notion of competence in the EU law context is a way of opening up the question of the nature and contours of the political identity of the European Union
