Questioning Scotland:

Questioning Scotland E. Bell, 2004-09-20 Questioning Scotland considers the ways in which Scottish Literature has often been discussed in parochial essentialist terms It suggests that Scottish literary studies must now expand its conceptual boundaries in order to account for changes taking place at wider European and global levels It is literary based but also scrutinizes the methodological construction process of national traditions Drawing on wider theories of postmodernism post nationalism and globalism it will help map the changing nature of national studies and Scottish studies in particular

Gedenkschrift to one of Scotland s most prominent jurists and legal thinkers **Intending Scotland** Cairns Craig, 2020-03-31 A major reconsideration of our understanding of the development of Scottish culture from the Enlightenment to the present day **The Scottish Question** James Mitchell, 2014-06-12 Over half a century ago a leading commentator suggested that Scotland was very unusual in being a country which was in some sense at least a nation but in no sense a state He asked whether something so anomalous could continue to exist in the modern world The Scottish Question considers how Scotland has retained its sense of self and how the country has changed against a backdrop of fundamental changes in society economy and the role of the state over the course of the union The Scottish Question has been a shifting mix of linked issues and concerns including national identity Scotland s constitutional status and structures of government Scotland s distinctive party politics and everyday public policy In this volume James Mitchell explores how these issues have interacted against a backdrop of these changes He concludes that while the independence referendum may prove an important event there can be no definitive answer to the Scottish Question The Scottish Question offers a fresh interpretation of what has made Scotland distinctive and how this changed over time drawing on an array of primary and secondary sources It challenges a number of myths including how radical Scottish politics has been and suggests that an

oppositional political culture was one of the most distinguishing features of Scottish politics in the twentieth century A Scottish lobby consisting of public and private bodies became adept in making the case for more resources from the Treasury without facing up to some of Scotland's most deep rooted problems

Contested Identities Roger Nicholson, Gertrud Szamosi, Claudia Marquis, 2015-09-04 This volume brings together essays that individually and collectively address the force of the literary text with regard to problematic identities They work out of shared concerns with literary representations of this issue in different regions nations and communities that often prove divided they pursue questions related to textual identity where the literary text itself is contested internally or in its generic and historical relations In sum these studies actively test identity as social or literary concept discovering in difference the very condition of a useful if paradoxical sense of personal or textual coherence What happens to us when we move between different cultures or different societies defined in geographical or historical terms What happens to texts and textual practices in these same circumstances What happens to us when we are obliged to adapt to a new social order Homi Bhabha speaks of cultural difference as calling into play what he calls cultural translation What happens to identity the narrative that fashions a continued sense of self in this case Difference raised to alterity demands that we accord functional and philosophical value not just to other aspects but also to the aspect of the other At the level of personal or textual agency however difference contests and threatens to subvert stable selfhood composing a scene of conflict Even so it often proves to be instrumental in re charging a sense of the cultural valence of the literary text not least by virtue of its political implications In this regard the border where difference materialises has considerable presence in contributions to this volume prompting appreciation of texts that work on or travel across such borders however haphazardly and dangerously but also those that compose border textualities
