The Question Concerning Technology in China Yuk Hui, 2016-09-02 A systematic historical survey of Chinese thought is followed by an investigation of the historical metaphysical questions of modern technology asking how Chinese thought might contribute to a renewed questioning of globalized technics Heidegger's critique of modern technology and its relation to metaphysics has been widely accepted in the East Yet the conception that there is only one originally Greek type of technics has been an obstacle to any original critical thinking of technology in modern Chinese thought Yuk Hui argues for the urgency of imagining a specifically Chinese philosophy of technology capable of responding to Heidegger's challenge while problematizing the affirmation of technics

and technologies as anthropologically universal This investigation of the historical metaphysical question of technology drawing on Lyotard Simondon and Stiegler and introducing a history of modern Eastern philosophical thinking largely unknown to Western readers including philosophers such as Feng Youlan Mou Zongsan and Keiji Nishitani sheds new light on the obscurity of the question of technology in China Why was technics never thematized in Chinese thought Why has time never been a real question for Chinese philosophy How was the traditional concept of Qi transformed in its relation to Dao as China welcomed technological modernity and westernization In *The Question Concerning Technology in China* a systematic historical survey of the major concepts of traditional Chinese thinking is followed by a startlingly original investigation of these questions in order to ask how Chinese thought might today contribute to a renewed cosmotechnical questioning of globalized technics

Kierkegaard and the Question Concerning Technology

Christopher B. Barnett,2019-08-22 Over the last several decades technology has emerged as an important area of interest for both philosophers and theologians Yet despite his status as one of modernity s seminal thinkers S ren Kierkegaard is not often seen as one who contributed to the field Kierkegaard and the Question Concerning Technology argues otherwise Christopher B Barnett shows that many of Kierkegaard s criticisms of the present age relate to the increasing dominance of technology in the West and he puts Kierkegaard s thought in conversation with subsequent thinkers who grappled with technological issues from Martin Heidegger to Thomas Merton Barnett shows that Kierkegaard s writing with its marked emphases on personal upbuilding stands as a place where deeper non technical modes of thinking are both commended and nurtured In doing so Barnett presents a Kierkegaard who remains relevant perhaps all too relevant in today s digital age

Questioning Technology John Zerzan,Alice Carnes,1991 *Democratizing Technology* Tyler J. Veak,2012-02-01 Largely because of the Internet and the new economy technology has become the buzzword of our culture But what is it and how does it affect our lives More importantly can we control and shape it or does it control us In short can we make technology more democratic Using the work of Andrew Feenberg one of the most important and original figures in the field of philosophy of technology as a foundation the contributors to this volume explore these important questions and Feenberg responds In the 1990s Feenberg authored three books that established him as one of the leading scholars in a rapidly developing field and he is one of the few to delineate a theory for democratizing technological design He has demonstrated the shortcomings of traditional theories of technology and argued for what he calls democratic rationalization where actors intervene in the technological design process to shape it toward their own ends In this book the contributors analyze foundational issues in Feenberg s work including questions of human nature biotechnology gender and his readings of Heidegger and they also examine practical issues including democratizing technology moral evaluation and environmentalism

In Good Faith Scott A. Shay,2018-09-04 Prominent atheists claim the Bible is a racist text Yet Dr

Martin Luther King Jr read it daily Then again so did many ardent segregationists Some atheists claim religion serves to oppress the masses Yet the classic text of the French Revolution What is the Third Estate was written by a priest On the other hand the revolutionaries ended up banning religion What do we make of religion s confusing role in history And what of religion s relationship to science Some scientists claim that we have no free will Others argue that advances in neurobiology and physics disprove determinism As for whispering to the universe an absurd habit say the skeptics Yet prayer is a transformative practice for millions This book explores the most common atheist critiques of the Bible and religion incorporating Jewish Christian and Muslim voices The result is a fresh modern re evaluation of religion and of atheism Scott A Shay is a Co Founder and Chairman of Signature Bank and a longstanding Jewish community activist Shay started a Hebrew school an adult educational program and chaired several Jewish educational programs He is the author of Getting our Groove Back How to Energize American Jewry and has been thinking about religion reason and modernity since wondering why his parents sent him to Hebrew school
