Questionnaires In Second Language Research Construction Administration And Processing:

Questionnaires in Second Language Research Zoltán Dörnyei, Tatsuya Taguchi, 2009-12-04 Questionnaires in Second Language Research Construction Administration and Processing is the first guide in the second language field devoted to the question of how to produce and use questionnaires as reliable and valid research instruments It offers a thorough overview of the theory of questionnaire design administration and processing made accessible by concrete real life second language research applications This Second Edition features a new chapter on how an actual scientific instrument was developed using the theoretical guidelines in the book and new sections on translating questionnaires and collecting survey data on the Internet Researchers and students in second language studies applied linguistics and TESOL programs will find this book invaluable and it can also be used as a textbook for courses in quantitative research methodology and survey research in linguistics psychology and education departments

Questionnaires in Second Language Research Zoltán Dörnyei, Jean-Marc Dewaele, 2022-11-21 Questionnaires in Second Language Research is the first state of the art methodological guide for producing and using questionnaires as reliable and valid research instruments in second language studies Zoltán Dörnyei and Jean-Marc Dewaele provide a comprehensive reader friendly overview of the theory of questionnaire design administration and processing made accessible with a detailed how to guide and concrete real life applications This new edition is thoroughly updated to reflect developments in the field and with recent example studies that focus on considerations challenges and opportunities raised at all stages of the research process by online questionnaires There is also expanded detailed guidance on how to use the IRIS database and how to clean process and analyze questionnaire data prior to determining and reporting findings This is an invaluable resource to students and researchers of SLA applied linguistics psychology and education who are interested in understanding and conducting quantitative L2 research using questionnaires and surveys

Questionnaires in Second Language Research Zoltán Dörnyei, 2014-04-08 One of the most common methods of data collection in second language research is using questionnaires of various kinds In spite of the wide application of questionnaires in the second language field there does not seem to be sufficient awareness in the profession about the theory of questionnaire design and processing The usual and in most cases false perception is that anybody with a bit of common sense can design good questionnaires and the practice of questionnaire design and use has remained largely uninformed by theory As a consequence it is all too common to see that studies which start out with exciting research questions are spoiled by the application of badly designed questionnaires and or a lack of reliable and valid results due to faulty processing One reason for the lack of sufficient awareness of questionnaire theory among language researchers is the absence of relevant summaries and training materials in the second language literature The purpose of the current book is to fill this gap The book is motivated by very practical purposes namely to help researchers to increase the efficiency of their questionnaires and to avoid possible pitfalls Accordingly special care has been taken to avoid unnecessary

jargon to make the text accessible and to relate everything to real life situations Illustrated by concrete examples the book offers a thorough but accessible overview of the theory of questionnaire design and administration and processing with a special view on second language research applications The conclusion summarizes the main points of questionnaire theory in a straightforward checklist that offers an easy to use tool for researchers Researchers and students in TESOL and second language programs and applied linguistics with secondary markets in other language research e g child language will find this book useful

Second Language Classrooms Debra A. Friedman, 2025-03-27 This volume provides graduate students and experienced researchers with a comprehensive guide to applying qualitative and mixed methods in classroom based research on second language learning and teaching In addition to coverage of methods for collecting and analyzing data Researching Second Language Classrooms offers in depth discussions on a range of practical theoretical methodological and ethical issues that can arise when conducting research in language classrooms Throughout the volume the emphasis on building both theoretical knowledge and practical skills helps to facilitate understanding of how qualitative and quantitative methods can complement each other Each chapter includes examples drawn from a range of research settings as well as tasks for practicing data collection and analysis techniques questions to prompt reflection and suggestions for further reading This book will serve as a valuable text for research methods courses as well as a resource for scholars and researchers of applied linguistics SLA and language learning and teaching The Psychology of the Language Learner Zoltán Dörnyei, 2014-04-04 The scope of individual learner differences is broad yet there is no current comprehensive and unified volume that provides an overview of the considerable amount of research conducted on various language learner differences until now

Experimental Research Methods in Language Learning Aek Phakiti, 2014-12-18 Language learning research aims to describe and fully explain how and why language learning takes place but can fall short of its stated purpose Systematic rigorous research is needed if the growing field of language learning is to progress methodically This book demonstrates and fully explains such a methodology Given that research in language acquisition yields practical pedagogical implications it is crucial that it is rigorous and accurate This book offers a quantitative research methodology that relies on statistical analysis in order to make inferences and conclusions about language learning Experimental research aims to understand differences between or within groups of learners under manipulated environments It requires strict control of conditions enabling interpretations with a low factor of error Aek Phakiti provides step by step guidelines and underlying principles epistemology and methodology in a book that is essential for advanced students of language acquisition and language and education

The Longitudinal Study of Advanced L2 Capacities Lourdes Ortega, Heidi Byrnes, 2009-05-07 Researchers and educators routinely call for longitudinal research on language learning and teaching The present volume explores the

connection between longitudinal study and advanced language capacities two under researched areas and proposes an agenda for future research Five chapters probe theoretical and methodological reflections about the longitudinal study of advanced L2 capacities followed by eight chapters that report on empirical longitudinal investigations spanning descriptive quasi experimental qualitative and quantitative longitudinal methodologies In addition the co editors offer a detailed introduction to the volume and a coda chapter in which they explore what it would take to design systematic research programs for the longitudinal investigation of advanced L2 capacities The scholars in this volume collectively make the argument that second language acquisition research will be the richer theoretically and empirically if a trajectory toward advancedness is part of its conceptualization right from the beginning and in reverse that advancedness is a particularly interesting acquisitional level at which to probe contemporary theories associated with the longitudinal study of language development Acknowledging that advancedness is increasingly important in our multicultural societies and globalized world the central question explored in the present collection is How does learning over time evolve toward advanced capacities in a second language
