market and specialization and trade facilitated by fewer international divisions are central to economic development. The transformations along these three dimensions—density, distance, and division—are most noticeable in North America, Western Europe, and Japan, but countries in Asia and Eastern Europe are changing in ways similar in scope and speed. World Development Report 2009: Reshaping Economic Geography concludes that these spatial transformations are essential and should be encouraged. The conclusion is not without controversy. Slum dwellers now number a billion, but the rush to cities continues. Globalization is believed to benefit many but not the billion people living in lagging areas of developing nations. High poverty and mortality persist among the world's bottom billion, while others grow wealthier and live longer lives. Concern for these three billion often comes with the prescription that growth must be made spatially balanced. The WDR has a different message: economic growth is seldom balanced, and efforts to spread it out prematurely will jeopardize progress. The Report documents how production becomes more concentrated spatially as economies grow, proposes economic integration as the principle for promoting successful spatial transformations, revisits the debates on urbanization, territorial development, and regional integration, and shows how today's developers can reshape economic geography.

Trust in Society Karen Cook, 2001-01-11. Trust plays a pervasive role in social affairs, even sustaining acts of cooperation among strangers who have no control over each other's actions. But the full importance of trust is rarely acknowledged until it begins to break down, threatening the stability of social relationships once taken for granted. *Trust in Society* uses the tools of experimental psychology, sociology, political science, and economics to shed light on the many functions trust performs in social and political life. The authors discuss different ways of conceptualizing trust and investigate the empirical effects of trust in a variety of social settings, from the local and personal to the national and institutional. Drawing on experimental findings, this book examines how people decide whom to trust and how a person proves his own trustworthiness to others. Placing trust in a person can be seen as a strategic act, a moral response, or even an expression of social solidarity. People often assume that strangers are trustworthy on the basis of crude social affinities, such as a shared race, religion, or hometown. Likewise, new immigrants are often able to draw heavily upon the

trust of prior arrivals frequently kin to obtain work and start up capital Trust in Society explains how trust is fostered among members of voluntary associations such as soccer clubs choirs and church groups and asks whether this trust spills over into other civic activities of wider benefit to society The book also scrutinizes the relationship between trust and formal regulatory institutions such as the law that either substitute for trust when it is absent or protect people from the worst consequences of trust when it is misplaced Moreover psychological research reveals how compliance with the law depends more on public trust in the motives of the police and courts than on fear of punishment The contributors to this volume demonstrate the growing analytical sophistication of trust research and its wide ranging explanatory power In the interests of analytical rigor the social sciences all too often assume that people act as atomistic individuals without regard to the interests of others Trust in Society demonstrates how we can think rigorously and analytically about the many aspects of social life that cannot be explained in those terms A Volume in the Russell Sage Foundation Series on Trust **2010 ADA Standards for Accessible Design** Department Justice,2014-10-09 a Design and construction 1 Each facility or part of a facility constructed by on behalf of or for the use of a public entity shall be designed and constructed in such manner that the facility or part of the facility is readily accessible to and usable by individuals with disabilities if the construction was commenced after January 26 1992 2 Exception for structural impracticability i Full compliance with the requirements of this section is not required where a public entity can demonstrate that it is structurally impracticable to meet the requirements Full compliance will be considered structurally impracticable only in those rare circumstances when the unique characteristics of terrain prevent the incorporation of accessibility features ii If full compliance with this section would be structurally impracticable compliance with this section is required to the extent that it is not structurally impracticable In that case any portion of the facility that can be made accessible shall be made accessible to the extent that it is not structurally impracticable iii If providing accessibility in conformance with this section to individuals with certain disabilities e g those who use wheelchairs would be structurally impracticable accessibility shall nonetheless be ensured to persons with other types of disabilities e g those who use crutches or who have sight hearing or mental impairments in accordance with this section *A Companion to Scottish Literature* Gerard Carruthers,2023-12-26 A Companion to Scottish Literature offers fresh readings of major authors and periods of Scottish literary production from the first millennium to the present Bringing together contributions by many of the world s leading experts in the field this comprehensive resource provides the historical background of Scottish literature highlights new critical approaches and explores wider cultural and institutional contexts Dealing with texts in the languages of Scots English and Gaelic the Companion offers modern perspectives on the historical milieux thematic contexts and canonical writers of Scottish literature Original essays apply the most up to date critical and scholarly analyses to a uniquely wide range of topics such as Gaelic literature national and diasporic writing children s literature Scottish drama and theatre gender and sexuality and women s writing Critical readings examine William Dunbar
