Finding What Works in Health Care Institute of Medicine, Board on Health Care Services, Committee on Standards for Systematic Reviews of Comparative Effectiveness Research, 2011-07-20 Healthcare decision makers in search of reliable information that compares health interventions increasingly turn to systematic reviews for the best summary of the evidence Systematic reviews identify select assess and synthesize the findings of similar but separate studies and can help clarify what is known and not known about the potential benefits and harms of drugs devices and other healthcare services Systematic reviews can be helpful for clinicians who want to integrate research findings into their daily practices for patients to make well informed choices about their own care for professional medical societies and other organizations that develop clinical practice guidelines Too often systematic reviews are of uncertain or poor quality There are no universally accepted standards for developing systematic reviews leading to variability in how conflicts of interest and biases are handled how evidence is appraised and the overall scientific rigor of the process In *Finding What Works in Health Care* the Institute of Medicine IOM recommends 21 standards

for developing high quality systematic reviews of comparative effectiveness research The standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain Finding What Works in Health Care also proposes a framework for improving the quality of the science underpinning systematic reviews This book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research *Making Sense of Medicine* Zackary Berger, 2016-06-17 With many common health conditions diabetes arthritis depression there is no one right route to effective treatment and science does not give us one definitive answer In practical chapters and through real stories Dr Zackary Berger shows how to bridge the gap between scientific knowledge doctors recommendations and patient preferences *Field Guide to the Difficult Patient Interview* Frederic W. Platt, Geoffrey H. Gordon, 2004 Written by physicians skilled at coaching colleagues in physician patient communication this pocket guide presents practical strategies for handling a wide variety of difficult patient interviews Each chapter presents a hypothetical scenario describes effective communication techniques for each phase of the interaction and identifies pitfalls to avoid The presentation includes examples of physician patient dialogue illustrations showing body language and key references This edition includes new chapters on caring for physician patients communicating with colleagues disclosing unexpected outcomes and medical errors shared decision making and informed consent and teaching communication skills Other new chapters describe clinical attitudes such as patience curiosity and hope *The Medical Interview* Mack Jr. Lipkin, J.G. Carroll, R.M. Frankel, Samuel M. Putnam, Aaron Lazare, A. Keller, T. Klein, P.K. Williams, 2012-12-06 Primary care medicine is the new frontier in medicine Every nation in the world has recognized the necessity to deliver personal and primary care to its people This includes first contact care care based in a positive and caring personal relationship care by a single healthcare provider for the majority of the patient's problems coordination of all care by the patient's personal provider advocacy for the patient by the provider the provision of preventive care and psychosocial care as well as care for episodes of acute and chronic illness These facets of care work most effectively when they are embedded in a coherent integrated approach The support for primary care derives from several significant trends First technologically based care costs have rocketed beyond reason or availability occurring in the face of exploding populations and diminishing real resources in many parts of the world even in the wealthier nations Simultaneously the primary care disciplines general internal medicine and pediatrics and family medicine have matured significantly *97 Things Every UX Practitioner Should Know* Daniel Berlin, 2021-05-11 Tap into the wisdom of experts to learn what every UX practitioner needs to know With 97 short and extremely useful articles you'll discover new approaches to old problems pick up road tested best practices and hone your skills through sound advice Working in UX involves much more than just creating user interfaces UX teams struggle with understanding what's important which practices they should know deeply and what approaches aren't helpful at all With these 97 concise articles editor Dan Berlin

Communicating in Hospital Emergency Departments Diana Slade,Marie Manidis,Jeannette McGregor,Hermine Scheeres,Eloise Chandler,Jane Stein-Parbury,Roger Dunston,Maria Herke,Christian M.I.M. Matthiessen,2015-04-28 This book was conceived in response to the increasing recognition of the

central role of communication in effective healthcare delivery particularly in high stress contexts Over a three year period the research team investigated communication between patients and clinicians in five representative emergency departments EDs The book describes the communicative complexity and intensity of work in the ED and identifies the features of successful patient clinician interactions Drawing on authentic examples of communication within the ED the book provides comprehensive communication strategies for healthcare professionals that can be readily integrated into everyday practice Professor Diana Slade and her colleagues have written an innovative and practical book on communication and relationships in emergency departments and their effects on the patient experience Rarely does one find a book that so seamlessly translates research findings into practical action strategies The book is an invaluable resource for the training of physicians nurses hospital administrators and others in healthcare Elizabeth A Rider MSW MD FAAP Department of Pediatrics Harvard Medical School My participation in the UTS Emergency Communication project provided extraordinary insights into the complexities and subtleties of communication encounters during a patient s emergency department journey This project has made a lasting impact on my daily work and I hope will improve emergency patient care into the future Dr Nick Taylor Emergency Medicine Specialist The Canberra Hospital The captured clinical conversations between doctors nurses and patients are fascinating The discussion and conclusions provide a rare insight into an integral and critical component of Emergency Medicine practice The team led by Professor Slade was truly unobtrusive professional and personable Dr Marian Lee Emergency Physician Director of Emergency Medicine Training *An Anthropology of Lying* Sylvie

Fainzang,2016-03-09 In the era of health democracy where a patient s right to be informed is not only widely advocated but also guaranteed by law what is the real situation regarding patient information Do patients receive the information that they request with regard to their diagnosis prognosis or treatments And what information do patients themselves give to their doctors Drawing on observational research in hospitals and covering the exchanges between doctors and patients on the subject of cancer treatment and that of other pathologies this book reveals that the practice of telling lies is widespread amongst parties on both sides of the medical relationship With attention to the manner in which information of various types is withheld and the truth concealed on either side of the doctor patient relationship the author explores the boundaries between what is said and what is left unsaid and between those who are given information and those who are lied to Considering the misunderstandings that occur in the course of medical exchanges and the differences between the lies told by doctors and patients *An Anthropology of Lying* Information in the Doctor Patient Relationship analyses the role of mendacity in the exercise of and resistance to power A fascinating study of the mechanisms at work and social conditions surrounding the accomplishment of lying in medical settings this book casts fresh light on a subject that has so far been overlooked As such it will appeal not only to sociologists and anthropologists of health and medicine but also to medical professionals **Health Psychology** Edward P. Sarafino,Timothy W. Smith,2022-01-12 Explore multiple disciplines to

understand the impact of psychology on health and vice versa In the newly revised 10th edition of *Health Psychology Biopsychosocial Interactions* a team of dedicated psychologists delivers an insightful and multidisciplinary demonstration of the impact of psychology and health on one another Relying heavily on cross cultural data the book offers a sweeping and inclusive picture of health psychology and includes local and global research and case studies The authors have included boxed materials in each chapter that directs the reader's attention to the right information at the right time Behavioral physiological cognitive and social personality viewpoints are addressed throughout the text and a strong focus on lifespan development in health and illness pervades the material Readers will also find Psychological perspectives on a wide variety of health issues from various parts of the world Highlights of what works for practicing psychologists and what doesn't when their work intersects with other fields in health Expansive treatments of topics like the effect of stress on health the impact of adverse childhood experiences and the interaction between religiosity and health *Health Psychology Biopsychosocial Interactions* is an essential resource for undergraduate students in psychology with an interest in health It's also invaluable for allied health professionals addictions counselors dietitians and nutritionists and social workers seeking an authoritative resource on the effect of psychology on their daily work *Caring for Patients from Different Cultures* Geri-Ann Galanti, 2013-05-25 What happens when a Cherokee patient summons a medicine man to the hospital or when an Anglo nurse refuses to take orders from a Japanese doctor Why do Asian patients rarely ask for pain medication while Mediterranean patients seem to seek relief for even the slightest discomfort If the goal of the American medical system is to provide optimal care for all patients healthcare providers must understand cultural differences that create conflicts and misunderstandings and can result in inferior medical care Geri Ann Galanti's updated classic *Caring for Patients from Different Cultures* is even more comprehensive than the first three editions containing new appendices for quick reference an expanded and updated bibliography with Internet resources and a detailed index *Caring for Patients from Different Cultures* contains more than 200 case studies illustrating crosscultural misunderstanding and culturally competent health care The chapters cover a wide range of topics including birth end of life traditional medicine mental health pain religion and multicultural staff issues The case studies illustrate important concepts from the fields of cultural diversity and medical anthropology This volume is an important resource for nurses and physicians in achieving cultural competency *What Kind of Death* Govert den Hartogh, 2022-10-31 Many books have been published about physician assisted death This book offers a comprehensive and in depth examination of that subject but it also extends the discussion to a broader range of end of life decisions including suicide palliative care and sedation until death In every jurisdiction that has laws permitting some kind of physician assisted death a central point of controversy is whether such assistance should only be available to dying patients or to everyone who wants to end his life The right to determine the manner and time of one's own death however does not necessarily mean that physicians should be permitted to cooperate in ensuring a quick and peaceful death In this book Govert den Hartogh

considers the fundamental and practical matters including concrete issues of legal regulation related to end of life decision making He proposes a two tiered system Everyone should have access to humane means of ending his life if his decision to end it is voluntary well considered and durable But doctors should only participate in a joint action of ending the patient s life on his request if they also are convinced of acting in the patient s best interests in particular by ending intolerable and unrelievable suffering And perhaps there is reason to restrict that second service to dying patients The whole argument however depends on the extent to which in both tiers of the system we can design legal safeguards that will enable us to trust judgments about the requesting person s request and about his suffering The book considers much new evidence in regard to this issue What Kind of Death will appeal to researchers and advanced students working in bioethics applied ethics philosophy of law and health law

Stay Healthy at Every Age Shantanu Nundy,2010-05-17 The most important thing in your life is your health To protect your health you need to pay attention to it It s a bit like having a car in fact to protect your investment in a car you want to keep it running smoothly for as long as possible So just as routine auto tune ups prevent major repairs down the road regular medical checkups can keep you driving right by the hospital Dr Shantanu Nundy s book describes the diagnostic tests needed for routine maintenance including what and who is involved and when the tests should be done It also covers all the common diseases explaining causes symptoms and treatment To guard against disease before it develops the book provides and interprets at a glance schedules for screening preventive medicine such as heart disease prevention and infectious disease vaccinations and counseling as recommended by the U S Preventive Services Task Force and the Centers for Disease Control and Prevention Like the checklists found in the owner s manual of your vehicle Dr Nundy s simple preventive health guidelines will keep your motor running longer and stronger

Marked Women Rebecca G. Martínez,2018-06-05 Cervical cancer is the third leading cause of death among women in Venezuela with poor and working class women bearing the brunt of it Doctors and public health officials regard promiscuity and poor hygiene coded indicators for low class low culture and bad morals as risk factors for the disease Drawing on in depth fieldwork conducted in two oncology hospitals in Caracas *Marked Women* is an ethnography of women s experiences with cervical cancer the doctors and nurses who treat them and the public health officials and administrators who set up intervention programs to combat the disease Rebecca G Mart nez contextualizes patient doctor interactions within a historical arc of Venezuelan nationalism modernity neoliberalism and Chavismo to understand the scientific social and political discourses surrounding the disease The women marked as deviant for their sexual transgressions are not only characterized as engaging in unhygienic uncultured and promiscuous behaviors but also become embodiments of these very behaviors Ultimately *Marked Women* explores how epidemiological risk is a socially culturally and historically embedded process and how this enables cervical cancer to stigmatize women as socially marginal burdens on society and threats to the health of the modern nation
