Teaching Tips are included with some of the lessons in any instance when I thought that added explanation would help a teacher understand the intention of the lesson, or when I wanted to give other advice, such as how to modify a strategy for students at different reading levels or reading different text types.

Hat Tips I tried to reference authors and books that the strategy may have been inspired by; sometimes I borrowed a lesson title from another book, other times an idea or concept. Never did I borrow the exact language—that came from thinking about how I would explain it to a student. Just as I used my own natural language and phrasing, I invite you to be inspired by my strategies and make them your own, too!

Strategy Partners can help one another read in a smooth voice. When you meet in partner time, put one book between the two of you. Look at the words, listen to yourself, and listen to your partner. Try to read in one voice, pausing at the same places and using the same expression.

Teaching Tip One way to get children to prompt each other in partnerships is to become a “ghost partner.” Whisper into children’s ears a phrase or sentence starter that you want them to repeat to their partner. In no time at all, they will start taking up the language as their own. So, for this strategy you might whisper, “Let’s try that again” or “That sounded choppy, right?” or “Should we try that one more time?” for them to literally repeat to their partner.

Prompts

- What can you tell your partner to help him with his fluency?
- Tell your partner, “Go back and try that again!”
- Tell your partner, “That sounded very smooth.”
- Tell your partner, “The way you read that helped me picture it!”
- What do you think?
- What will you tell your partner?
- Make sure you’re listening carefully and be ready to give your partner advice.

A strategy is a step-by-step how-to. This can be used in a conference, strategy lesson, minilesson, or even during another balanced literacy component such as shared reading or interactive read-aloud. It’s important that you give children a *how-to* to scaffold their practice until they develop automaticity. To read more about strategies, please see page TK.

Partners Help Smooth It Out!

Visuals are included for all lessons. These visuals take many forms such as: a class anchor chart, a tool such as a personalized strategy card or bookmark, student writing, or even photographs of students in action with the strategy. Dozens of teachers from all over this country were involved in piloting the lessons in this book and they have generously shared their work and the work of their students. For more information on creating charts and tools, please see page TK.

The Unfinished Quest Clair T. Berube, 2008-06-01 Modern educators are currently ideologically in one of two camps those who see American education as heading in the right direction and those who fear that it has gone tragically astray For over 100 years the American educational system has been the hope of those who want to level the playing field of opportunity yet today we continue to lag behind several industrialized countries when comparing standardized science test scores Is this acceptable in the most advanced affluent country on earth Why are we not the reigning educational system on the planet And are standardized test scores even the best way to assess the type of learning it takes to lead the world in science achievement The nature of science does not lend itself well to bubble tests yet these assessments are all we have to prove that our students are good scientists This book was born of a science teacher's frustration brought on by the standardized testing movement's reliance on high stakes tests as the sole measurement tool with which to measure achievement Science by its very nature relies on original thinking for discovery and innovation How can this be measured by a bubble test And how do these high stakes tests affect minorities girls those with disabilities and at risk students September 11 2001 alerted us that we Americans can be less creative than our enemies an unprecedented event in American history What if changing the way we teach and assess science learning better prepares our citizens for creative preventions and solutions to world problems instead of creating citizens who have to react to world problems The nature of science begs a better way
