Illuminating Metalwork Joseph Salvatore Ackley, Shannon L. Wearing, 2021-12-20 The presence of gold silver and other metals is a hallmark of decorated manuscripts the very characteristic that makes them illuminated Medieval artists often used metal pigment and leaf to depict metal objects both real and imagined such as chalices crosses tableware and even idols the luminosity of these representations contrasted pointedly with the surrounding paints enriching the page and dazzling the viewer To elucidate this key artistic tradition this volume represents the first in depth scholarly assessment of the depiction of precious metal objects in manuscripts and the

media used to conjure them From Paris to the Abbasid caliphate and from Ethiopia to Bruges the case studies gathered here forge novel approaches to the materiality and pictoriality of illumination In exploring the semiotic material iconographic and technical dimensions of these manuscripts the authors reveal the canny ways in which painters generated metallic presence on the page *Illuminating Metalwork* is a landmark contribution to the study of the medieval book and its visual and embodied reception and is poised to be a staple of research in art history and manuscript studies accessible to undergraduates and specialists alike

Natural Syntax John Haiman, 1984-03-15 The view that language is in some way arbitrary that there is no formal relationship between a linguistic message and the thought it is meant to convey is long established and pervasive The goal of John Haiman's study is to challenge the monopoly of arbitrariness which he believes has affected in significant ways many models of linguistic description and analysis notably those proposed by Saussure and more recently by Chomsky and his associates Linguistic structures Dr Haiman claims may be compared to non linguistic diagrams of our thoughts and deviate from iconicity in many of the same ways and for much the same reasons as do diagrams in general Arbitrariness develops as a result of the relatively familiar principles of economy generalization and association In relation to this thesis Dr Haiman considers a wide variety of constructions including conditionals and interrogatives gapping causative structures auxiliaries and reflexives and provides a wealth of exemplification from different languages that also points to typological differences in respect of iconicity
