Occupational Therapy and Stroke Judi Edmans, 2011-06-09 Occupational Therapy and Stroke guides newly qualified occupational therapists and those new to the field of stroke management through the complexities of treating people following stroke It encourages and assists therapists to use their skills in problem solving building on techniques taught and observed as an undergraduate Written and edited by practising occupational therapists

the book acknowledges the variety of techniques that may be used in stroke management and the scope of the occupational therapist's role. Chapters span such key topics as early intervention and the theoretical underpinnings of stroke care as well as the management of motor sensory cognitive and perceptual deficits. They are written in a user friendly style and presented in a form that enables the therapist to review the subject prior to assessment and treatment planning. Complex problems are grouped together for greater clarity. This second edition has been fully revised and updated in line with the WHO ICF model, National Clinical Guidelines and Occupational Therapy standards. It is produced on behalf of the College of Occupational Therapists Specialist Section Neurological Practice.

Evidence-Based Practice for Occupational Therapists M. Clare Taylor, 2007-09-11

EVIDENCE BASED PRACTICE FOR OCCUPATIONAL THERAPISTS Evidence based practice EBP is one of the driving forces in current healthcare practice. Occupational therapists recognise the need for research and for an evidence based approach to interventions but can need guidance on how to do this. This book aims to make evidence based practice accessible and relevant to occupational therapists using examples from therapy practice. It will provide them with the skills to search for and access the required evidence to underpin or question practice. Publication of the first edition of this book in 2000 signaled the receptiveness of the occupational therapy community toward evidence based practice. This second edition as well as providing practical information on EBP also addresses how it has evolved within the culture of occupational therapy. The author considers the definition of evidence based occupational therapy, the impact of research governance and social care influences on suitable evidence. Implementation issues are covered in greater depth including change management and practice guidelines. Three new chapters have been added on evidence from other sources carrying out a review of the evidence and developing and using guidelines for practice.
