exposed people to more information than ever before These societal gains however have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues Today everyone knows everything with only a quick trip through WebMD or Wikipedia average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats All voices even the most ridiculous demand to be taken with equal seriousness and any claim to the contrary is dismissed as undemocratic elitism Tom Nichols *The Death of Expertise* shows how this rejection of experts has occurred the openness of the internet the emergence of a customer satisfaction model in higher education and the transformation of the news industry into a 24 hour entertainment machine among other reasons Paradoxically the increasingly democratic dissemination of information rather than producing an educated public has instead created an army of ill informed and angry citizens who denounce intellectual achievement When ordinary citizens believe that no one knows more than anyone else democratic institutions themselves are in danger of falling either to populism or to technocracy or in the worst case a combination of both An update to the 2017 breakout hit the paperback edition of *The Death of Expertise* provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election Judging from events on the ground since it first published *The Death of Expertise* issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today

Action Research Jean McNiff, 2002-01-22 Since the first edition of this established text was published in 1988 action research has gained ground as a popular method amongst educational researchers and in particular for practising teachers doing higher level courses In this new edition Jean McNiff provides updates on methodological discussions and includes new sections of case study material and information on supporting action research The book raises issues about how action research is theorised whether it is seen as a spectator discipline or as a real life practice and how practitioners position themselves within the debate It discusses the importance for educators of understanding their own work and showing how their educative influence can lead to the development of good orders in formal and informal learning settings and in the wider community This second edition comes at a time when after years of debate over what counts as action research it is now considered an acceptable and useful part of mainstream research practice
