Rubias Policies In Caucasus:

Cooperation in the European Mountains: The Caucasus Martin F. Price, 1999 Cooperation at the scale of entire mountain ranges whether through formal agreements or regional institutions is widely acknowledged to be desirable The Caucasus generally better known for conflict than cooperation is a major centre of biological landscape and cultural diversity Appropriate mechanisms to maintain and foster these various types of diversity which are intricately linked are urgently needed and as first step this report gives an overview of the region and details of existing structures for cooperation at all levels

Madder Red Robert Chenciner, 2000 Madder red is an ancient dyestuff extracted from the root of the madder plant growing in many countries around the world The secret and devilishly complex Oriental dyeing process to obtain the lustrous colour known as Turkey Red was avidly sought by Europeans from the time before the fall of Ancient Rome It was finally cracked by the French about 1760 who were able to dye wool silk and cotton bright red After the lowlands of the Caspian Caucasus had been subdued by the Russians in the early 1800s madder was cultivated there and rapidly became the main crop The quest for Turkey Red went hand in hand with an avalanche of scientific research which not only improved the yield of dyestuff from the roots but led to its chemical synthesis and in 1870 the collapse of the world wide madder industry Many of the nascent dye companies grew into chemical giants of our time Further regional and cultural background may be found in Chenciner's *Daghestan Tradition and Survival* also published in the *Caucasus World series*

Schowalter,2013-10-02 In *Corinth in Contrast* archaeologists historians art historians classicists and New Testament scholars examine the stratified nature of socio economic political and religious interactions in the city from the Hellenistic period to Late Antiquity The volume challenges standard social histories of Corinth by focusing on the unequal distribution of material cultural and spiritual resources Specialists investigate specific aspects of cultural and material stratification such as commerce slavery religion marriage and family gender and art analyzing both the ruling elite of Corinth and the non elite Corinthians who made up the majority of the population This approach provides insight into the complex networks that characterized every ancient urban center and sets an agenda for future studies of Corinth and other cities rule by Rome

The Barbary Macaque Julia E. Fa,2012-12-06 The Barbary macaque all too often mistakenly called an ape was first brought to the attention of the Conservation Working Party of the Primate Society of Great Britain late 1979 when John Fa reported that surplus animals were being sent from Gibraltar to dubious locations such as an Italian safari park Since there had been no scientific input into the Army s management of the monkey colony on Gibraltar and there was concern about inbreeding nutrition and health about the long term viability of the colony it was felt that the Society could help The Gibraltar Scientific Authority and the Army were very receptive to our offer and ideas and this topic occupied successive chairmen over the last few years Robin Dunbar and Richard Wrangham myself and now Miranda Stevenson with constant prompting and help from John Fa Considerations soon extended to the status of the species as a whole so that there have been three main aspects 1 the improved health of a larger self sustaining population on Gibraltar 2 the status and behavioural biology of natural populations in North Africa Morocco and Algeria and 3 the breeding achievements in European parks and zoos and their potential for reintroduction to suitable areas in North Africa along with other possibilities Robin Dunbar organized the compilation of recommendations for managing the Gibraltar colony with regard to numbers age sex structure and behavioural relationships with some observations on diet to avoid obesity and infertility *Biodiversity, Conservation and Sustainability in Asia* Münir Öztürk,Volkan Altay,Recep Efe,2021-04-24 Of the world s seven continents Asia is the largest Its

physical landscapes political units and ethnic groups are both wide ranging and many Southwest South and Middle Asia are highly populated regions which as a whole cover an extremely large area of varied geography In total this domain is unique in its plant diversity and large vegetation zones with different communities and biomes It is rich in endemics with specific and intraspecific diversity of fruit trees and medicinal plants including a number of rare high value species At the same time much of the land in the region is too dry or too rugged with many geographical extremes Overgrazing oil and mineral extraction and poaching are the major threats in the area This two volume project focuses on the dynamic biodiversity of the region with in depth analysis on phytosociology plants animals and agroecology There are also chapters that explore new applications as well as approaches to overcome problems associated with climate change Much of the research and analysis are presented here for the first time We believe this work is a valuable resource for professionals and researchers working in the fields of plant diversity and vegetation animal diversity and animal populations and geo diversity and sustainable land use among others The first volume guides our readers to West Asia and the Caucasus region while volume two focuses on issues unique to South and Middle Asia
