The authors must, one assumes, have found a different and far more positive experience, but the inspirational process of their teaching method is not enshrined in these pages, only the content. If there is a way forward in this vitally important area of acquiring skills, it seems to me that it must be through a practical experience of sound conveyed not only through the medium of a simple graded written notation. There is much need for further work through information technology, especially using interactive card-stack systems which can both transmit and receive sound, programmes attached to electric keyboards or indeed in the continuing exploitation of the well-tried sound cassette.

The Rudiments of Music (*Rudimenta Musices*, 1539) by Martin Agricola, translated by John Trowell; musical examples transcribed by Brian Trowell; introduction by Bernarr Rainbow. Aberystwyth: Boethius Press, 1991. £28, 136 pp.

This book is one of a number of selected classic texts currently being reprinted by Boethius Press. The editor of this important series is Dr Bernarr Rainbow whose historical and musicological research is widely acknowledged and respected in academic circles. Unfortunately music educators have not given a great deal of attention to historical studies in recent years. Apart from Rainbow's own writings and a few standard works by other well-known

authors there is a dearth of significant publications in this field. Consequently, the reproduction of these famous texts will be a welcome and much needed addition to the existing literature.

The Rudiments of Music has been included in this new series since Martin Agricola (1486–1556) was one of the first German Protestant teachers. A devoted and enthusiastic follower of Martin Luther, he was recognised in his lifetime as a distinguished teacher, musical theorist and composer; he held the post of *Kantor* at the Lateinschule in Magdeburg for some thirty years. Agricola wrote several books on the teaching of music which were designed not only for pupils in schools but also for a wider amateur readership. This particular instructional manual is described by its author as 'a brief explanation of the art of singing and the measurement of the monochord for boys'. The four chapters are concerned with (1) the alphabetical and sol-fa names of notes and their position on the stave; (2); sol-fa note names and their use in solmisation; (3), the use of different clefs in transposition; and (4), the recognition, composition and properties of the authentic and plagal modes. There is also a section dealing with the tuning and calibration of the monochord. Frequent use is made of charts and diagrams to summarise knowledge which is to be committed to memory and the main points in each chapter are illustrated by musical examples. Overall, the aim is to explain and clarify how music 'works'. But this is not simply a dry theoretical textbook; quite clearly it was intended as a basis for practical music making under the guidance of an expert teacher.

At first sight the entire system seems exceedingly difficult and complicated. However, this new edition makes Agricola's
