Walraven, Dick Stoelhorst, 2008-05-01 In recent years knowledge of concrete and concrete structures has increased as has its applications New types of concrete challenged scientists and engineers and ecological constraints encouraged the implementation of life cycle design of concrete structures moving the focus more and more to maintenance and uprating of structures And since bui      Liquid Stone Jean-Louis Cohen, G. Martin Moeller, 2006-08-10 In Liquid Stone architects engineers and scholars explore the changing nature of concrete from both technical and aesthetic perspectives More than thirty buildings by leading international architects such as Jean Nouvel Herzog de Meuron Tadao Ando Zaha Hadid Steven Holl Norman Foster and Santiago Calatrava demonstrate through detailed descriptions photographs and technical drawings the remarkable new architectural and engineering accomplishments taking form at present and the promising future of this dynamic medium BOOK JACKET      **Ultra-High Performance Concrete and Nanotechnology in Construction. Proceedings of Hipermat 2012. 3rd International Symposium on UHPC and Nanotechnology for High Performance Construction Materials** Insert Name Here, 2012-01-01      Materiality and Architecture Sandra Loschke, 2016-03-17 Once regarded a secondary consideration in recent years materiality has emerged as a powerful concept in architectural discourse and practice Prompted in part by developments in digital fabrication and digital science the impact of materiality on design and practice is being widely reassessed and reimaged Materiality and Architecture extends architectural thinking beyond the confines of current design literatures to explore conceptions of materiality across the field of architecture Fourteen international contributors use elucidate the problems and possibilities of materiality based approaches in architecture from interdisciplinary perspectives The book includes contributions from the professions of architecture art architectural history theory and philosophy

including essays from Gernot Böhme, Jonathan Hill and Philip Ursprung. Important immaterial aspects such as presentation, agency, ecology and concept are examined, deepening our understanding of materiality's role in architectural processes, the production of cultural identities, the pursuit of political agendas and the staging of everyday environments and atmospheres. In depth illustrated case studies examine works by Herzog & de Meuron, Zaha Hadid and Lacaton & Vassal interspersed with visual essays and interviews with architects such as MVRDV, providing a direct connection to practice. *Materiality and Architecture* is an important read for researchers and students with an interest in architectural theory and related fields such as art history or visual and cultural studies.

**About Star Architecture** Nadia Alaily-Mattar, Davide Ponzini, Alain Thierstein, 2020-03-16. Cities across the world have been resorting to star architects to brand their projects, spark urban regeneration and market the city image internationally. This book shifts the attention from star architects to star architecture, arguing that the process of deciding about and implementing relevant architectural and urban projects is not the product of any single actor. Star architecture can in fact be better studied and understood as assembled by multiple actors and in its relationship with urban transformation. In its 18 chapters, the book presents a multidisciplinary collection of expert contributions in the fields of urban planning, architecture, media studies, urban economics, geography and sociology, consistently brought together for the first time to deal with this topic. Through a vast array of case studies and analytical techniques touching over 20 cities in Europe, the book shows the positive and more problematic impacts of star architecture with reference to the preservation of built heritage, tourism and media. The book will be of interest to architects, sociologists, urban planners and public administrators.

**CONCRETE Innovations in Materials, Design and Structures** FIB - International Federation for Structural Concrete, 2019-05-27. This Proceedings contains the papers of the fib Symposium CONCRETE Innovations in Materials, Design and Structures which was held in May 2019 in Kraków, Poland. This annual symposium was co-organised by the Cracow University of Technology. The topics covered include Analysis and Design, Sustainability, Durability, Structures, Materials and Prefabrication. The fib Fédération internationale du béton is a not-for-profit association formed by 45 national member groups and approximately 1000 corporate and individual members. The fib's mission is to develop at an international level the study of scientific and practical matters capable of advancing the technical, economic, aesthetic and environmental performance of concrete construction. The fib was formed in 1998 by the merger of the Euro International Committee for Concrete (CEB) and the International Federation for Prestressing (FIP). These predecessor organizations existed independently since 1953 and 1952 respectively.
