Rugged Water:

Rugged Water Joseph C. Lincoln, 2009-09-09 *Rugged Water* Joseph Crosby Lincoln, 1924 *Water and Sacred Architecture* Anat Geva, 2023-05-25 This edited book examines architectural representations that tie water as a physical and symbolic property with the sacred. The discussion centers on two levels of this relationship: how water influenced the sacredness of buildings across history and different religions, and how sacred architecture expressed the spiritual meaning of water. The volume deliberately offers original material on various unique contextual and design aspects of water and sacred architecture rather than an attempt to produce a historic chronological analysis on the topic or focusing on a specific geographical region. As such, this unique volume adds a new dimension to the study of sacred architecture. The book's chapters are compiled by a stellar group of scholars and practitioners from the US, Canada, Europe, Asia, and Africa. It addresses major aspects of water in religious buildings such as rituals, pilgrimage, water as a cultural material, and place making; hydro systems; modern practices; environmental considerations; the contribution of water to transforming secular into sacred; and future digital/cyber context of water and sacredness. All chapters are based on original archival studies, historical documents, and field visits to the sites and buildings. These examinations show water as an expression of architectural design, its materiality, and its spiritual values. The book will be of interest to architects, historians, environmentalists, archaeologists, religious scholars, and preservationists.

Proceedings of the Royal Geographical Society and Monthly Record of Geography Royal Geographical Society (Great Britain), 1864 **Square Rigger Days** Charles W. Domville-Fife, 2007-10-18 There are few books that describe accurately life on board sailing ships in the last days of sail from the 1860s to the First World War. The romantic image conjured up by many who wrote from a safe distance belies the harsh realities which were a sailor's lot. Domville Fife, in collecting together the personal stories of seamen while they were still alive, was able to present a truer picture of the tough last days of sail. Long voyages on board nineteenth-century sailing ships were marked by isolation, boredom, and miserable living conditions that taxed the endurance of men already hard-pressed by the grueling and dangerous nature of shipboard work. While some were attracted to a life of adventure, most simply went to sea for a living, and a meagre one at that. They experienced neither the excitement of life on the crack clippers of the earlier decades nor the safety of the steamships they

were caught in the limbo of a dying profession where poor pay discontinuous employment prolonged isolation from family and physical hardship were the norm No wonder that murder mutiny starvation and shipwreck appear in the memoirs gathered here Domville Fife surely did future generations a great service by piecing together this reality First published in 1938 these memoirs are now available again in this superbly presented new edition with a new selection of stunning photographs and a fascinating introduction on life at sea in the dying world of sail A wonderful read for all enthusiasts and historians of the merchant service in the days of sail *Proceedings of the Royal Geographical Society of London* Royal Geographical Society (Great Britain),1864 **Specifications** United States.
