Rules And Rights In The Middle East:

Rules and Rights in the Middle East Ellis Goldberg, Reşat Kasaba, Joel S. Migdal, 1993 As a whole the book demonstrates that neither the region's overgrown state structures nor the corresponding weakness of autonomous societal organizations can be explained by referring to cultural characteristics of the people in the Middle East or to the precepts of their religions True explanations the authors argue should be framed historically They pay special attention to the relations among the various groups and regions of the Middle East and to those between the Middle East and western Europe The authors emphasize the important role played by economic issues and constraints in broadening or narrowing the scope of democracy at various points in time and finally they are in agreement in seeing religion and culture of the Middle East not in static and essentialist terms but as dynamic phenomena that grow independently and even in opposition to existing political authorities

International Law in the Middle East Jean Allain, 2017-10-24 Examining international law through the lens of the Middle East this insightful study demonstrates the qualitatively different manner in which international law is applied in this region of the world Law is intended to produce a just society but as it is ultimately a social construct that has travelled through a political process it cannot be divorced from its relationship to power

The study demonstrates that this understanding shapes the notion strongly held in the Middle East that law is little more than a tool of the powerful used for coercion and oppression The author considers a number of formative events to demonstrate how the Middle East has become an underclass of the international system wherein law is applied and interpreted selectively used coercively and in noticeable situations simply disregarded International Law in the Middle East brings various narratives of history to the fore to create a wider arena in which international law can be considered and critiqued

Rules on Paper, Rules in Practice Edouard Al-Dahdah,Cristina Corduneanu-Huci,Gael Raballand,Myriam Ababsa,Ernest Sergenti,Anyia Vodopyanov,2016-07-25 The primary focus of this book is on a specific outcome of the rule of law the practical enforcement of laws and policies and the determinants of this enforcement or lack thereof Are there significant and persistent differences in implementation across countries Why are some laws and policies more systematically enforced than others Are good laws likely to be enacted and if not what stands in the way We answer these questions using a theoretical framework and detailed empirical data and illustrate with case studies from Morocco Tunisia and Jordan We believe that the best way to understand the variation in the drafting and implementation of laws and policies is to examine the interests and incentives of those responsible for these tasks policymakers and bureaucrats If laws and their enforcement offer concrete benefits to these ruling elites they are more likely to be systematically enforced If they don t implementation is selective discretionary if not nil Our first contribution is in extending the application of the concept of the rule of law beyond its traditional focus on specific organizations like the courts and the police to economic sectors such as customs taxation and land inheritance in a search for a direct causal relationship with economic development outcomes Instead of limiting ourselves to a particular type of organization or a legalistic approach to the rule of law we present a broader theory of how laws are made and implemented across different types of sectors and organizations Our second contribution is in demonstrating how powerful interests affect implementation outcomes The incentives elites have to build and support rule of law institutions derive from the distribution of power in society which is partly a historical given The point we make is that it is not deterministic Realigning the incentive structures for reform among key actors and organizations through accountability and competition can dramatically improve the chances that rule of law institutions will take root On the other hand building the capacity of organizations without first changing institutional incentives is likely to lead to perverse outcomes

Paradise Beneath Her Feet Isobel Coleman, 2013-02-26. Now with a new Preface and Afterword by the author. Outstanding Isobel Coleman takes us into remote villages and urban bureaucracies to find the brave men and women working to create change in the Middle East. Los Angeles Times. In this timely and important book Isobel Coleman shows how Muslim women and men across the Middle East are working within Islam to fight for women's rights in a growing movement of Islamic feminism. Journeying through Saudi Arabia, Iraq, Iran, Afghanistan, and Pakistan, Coleman introduces the reader to influential Islamic feminist thinkers and successful grassroots activists working to create economic, political, and educational opportunities for women. Their advocacy for women's rights based on more progressive interpretations of Islam are critical to bridging the conflict between those championing reform and those seeking to oppress women in the name of religious tradition. Socially, culturally, economically, and politically, the future of the region depends on finding ways to accommodate human rights and, in particular, women's rights with Islamic law. These reformers and thousands of others are the people leading the way forward. Featuring new material that addresses how the Arab uprisings and other recent events have affected the social and political landscape of the region, *Paradise Beneath Her Feet* offers a message of hope. Change is coming to the Middle East, and more often than not, it is being led by women. Praise for *Paradise Beneath Her Feet*: Clearly written, deeply moving, and wonderfully enlightening. Reza Aslan, author of *No God but God*. An engrossing portrait of real Muslim women that reveals how Islamic feminists are working with and within the culture rather than against it to forge a legitimate Islamic alternative to the current repressive system. Coleman doesn't diminish the enormity of the struggle, but she argues convincingly that it might yet rewrite Islam's

Islam and Human Rights Ann Elizabeth Mayer, 2018-04-19 Islam and Human Rights is a probing examination of how the Islamic tradition has been exploited for political ends by regimes and institutions seeking to legitimize policies inimical to human rights Ann Elizabeth Mayer critically appraises Islamic human rights schemes that dilute the human rights afforded by international law comparing them with the complex Islamic legal heritage and international human rights law

Challenging stereotypes about a supposedly monolithic Islam inherently incompatible with human rights Mayer dissects the political motives behind the selective deployment of elements of the Islamic tradition by conservative forces seeking to delegitimize demands for democracy and human rights The fifth edition provides an updated consideration of government policies on Islam and human rights activism and how they are affecting developments in several Middle Eastern countries and features a new chapter on the resistance of human rights for sexual minorities by the Organization of Islamic Cooperation OIC project to co opt international human rights law to criminalize defamation of Islam occurring in the West The new edition also analyzes the other most recent and important issues of the region including The burgeoning pressures in the Middle East for human rights leading up to the Arab Spring The ambitious campaign of the OIC to influence the UN human rights system by forging alliances with non Muslim states hostile to human rights The concerted efforts by this cross cultural alliance to subvert international human rights law under pretenses of supporting human rights The intensifying controversies over issues of sexual orientation and gender identity in the Middle East The Danish Cartoons controversy and the OIC project to co opt international human rights law to criminalize defamation of Islam occurring in the West

Property, Social Structure, and Law in the Modern Middle East Ann Elizabeth Mayer, 1985-01-01 For too long the study of law and society in the modern Middle East has been left to specialists in narrow subcategories of law or the social sciences Property Social Structure and Law in the Modern Middle East lays the groundwork for a new field of scholarship in which analysis of the social dimensions of law and the legal dimensions of social structure are integrated It offers the stimulus of a variety of new models of scholarship by a distinguished international group of contributors whose work shares a common focus on regimes of property in the societies of the modern Middle East The case studies examine the regulations of many kinds of property in relation to the social structures of selected Middle Eastern communities from the eighteenth century to the present Most of the societies studied are subjected to pressures for rapid modernization and adjustment to major economic transformations The book features comparisons of property rights and relations under regimes of Islamic and customary law as well as modern statutory law Highlighted are new patterns of intervention by modern Middle Eastern states to alter traditional regimes of property and to transform the accompanying social structures Their implications for development are also considered The book s notes and bibliographies constitute a valuable resource for anyone interested in further research

Constitutional Politics in the Middle East Said Amir Arjomand, 2008-01-17 This book is the first comparative and interdisciplinary study of constitutional politics and constitution making in the Middle East The historical background and setting are fully explored in two substantial essays by Linda Darling and Sa d Amir Arjomand placing the contemporary experience in the contexts respectively of the ancient Middle Eastern legal and political tradition and of the nineteenth and twentieth century legal codification and political modernization These are followed by Ann Mayer s general analysis of the treatment of human rights in relation to Islam in Middle Eastern constitutions and Nathan Brown s

comparative scrutiny of the process of constitution making in Iran Afghanistan and Iraq with reference to the available constitutional theories which are shown to throw little or no light on it The remaining essays are country by country case studies of Turkey Afghanistan and Iraq the case of Iran having been covered by Arjomand as the special point of reference Mehmet Fevzi Bilgin examines the making and subsequent transformation of the Turkish Constitution of 1982 against current theories of constitutional and deliberative democracy while Hootan Shambayati examines the institutional mechanism for protecting the ideological foundations of the Turkish Republic most notably the Turkish Constitutional Court which offers a surprising parallel to the Iranian Council of Guardians Arjomand s introduction brings together the bumpy experience of the Middle East along the long road to political reconstruction through constitution making and constitutional reform drawing some general analytical lessons from it and showing the consequences of the origins of the constitutions of Turkey and Iran in revolutions and of Afghanistan and Iraq in war and foreign invasion

The Struggle for Constitutional Power Tamir Moustafa, 2007-06-11 For nearly three decades scholars and policymakers have placed considerable stock in judicial reform as a panacea for the political and economic turmoil plaguing developing countries Courts are charged with spurring economic development safeguarding human rights and even facilitating transitions to democracy How realistic are these expectations and in what political contexts can judicial reforms deliver their expected benefits This book addresses these issues through an examination of the politics of the Egyptian Supreme Constitutional Court the most important experiment in constitutionalism in the Arab world The Egyptian regime established a surprisingly independent constitutional court to address a series of economic and administrative pathologies that lie at the heart of authoritarian political systems Although the Court helped the regime to institutionalize state functions and attract investment it simultaneously opened new avenues through which rights advocates and opposition parties could

challenge the regime The book challenges conventional wisdom and provides insights into perennial questions concerning the barriers to institutional development economic growth and democracy in the developing world
