than ninety percent of law is created by administrative rules issued by federal agencies like the Environmental Protection Agency and the Department of Health and Human Services where unelected bureaucrats with particular policy goals and preferences respond to the incentives created by a complex procedure bound rulemaking process With Bending the Rules Rachel Augustine Potter shows that rulemaking is not the rote administrative activity it is commonly imagined to be but rather an intensely political activity in its own right Because rulemaking occurs in a separation of powers system bureaucrats are not free to implement their preferred policies unimpeded the president Congress and the courts can all get involved in the process often at the bidding of affected interest groups However rather than capitulating to demands bureaucrats routinely employ procedural politicking using their deep knowledge of the process to strategically insulate their proposals from political scrutiny and interference Tracing the rulemaking process from when an agency first begins working on a rule to when it completes that regulatory action Potter shows how bureaucrats use procedures to resist interference from Congress the President and the courts at each stage of the process This exercise reveals that unelected bureaucrats wield considerable influence over the direction of public policy in the United States

**Natural Law and Human Rights**  
Pierre Manent, 2020-02-28 This first English translation of Pierre Manent's profound and strikingly original book *La loi naturelle et les droits de l'homme* is a reflection on the central question of the Western political tradition In six chapters developed from the prestigious tienne Gilson lectures at the Institut Catholique de Paris and in a related appendix Manent contemplates the steady displacement of the natural law by the modern conception of human rights He aims to restore the

grammar of moral and political action and thus the possibility of an authentically political order that is fully compatible with liberty Manent boldly confronts the prejudices and dogmas of those who have repudiated the classical and Christian notion of liberty under law and in the process shows how groundless many contemporary appeals to human rights turn out to be Manent denies that we can generate obligations from a condition of what Locke Hobbes and Rousseau call the state of nature where human beings are absolutely free with no obligations to others In his view our ever more imperial affirmation of human rights needs to be reintegrated into what he calls an archaic understanding of human and political existence where law and obligation are inherent in liberty and meaningful human action Otherwise we are bound to act thoughtlessly and in an increasingly arbitrary or willful manner Natural Law and Human Rights will engage students and scholars of politics philosophy and religion and will captivate sophisticated readers who are interested in the question of how we might reconfigure our knowledge of and talk with one another about politics
