Ruling the Waves Alan W. Cafruny, 2023-04-28 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1987 **The Political Economy of International Shipping in Developing Countries** Okechukwu Chris Iheduru, 1996 Shipping has played a pivotal role as the vector or artery through which this trade is conducted and in which this pattern of inequality has only recently been challenged by the South The Multinational Firm Glenn Morgan, Peer Hull Kristensen, Richard Whitley, 2003 In contrast to the traditional view of multinational firms as cohesive rational actors maximizing the use of resources across national boundaries the contributors to this volume argue that they are complex social arenas where competing groups draw on resources from their own socially embedded locations in developing new transnational social relationships As firms seek to manage across national and institutional boundaries they stretch their existing capacities and routines and develop new sets of transnational social relationships through different groups competing and cooperating These processes occur at a number of levels which are explored in different empirical settings Firstly at the level of governance multinational firms may develop conflicts between investors from different national contexts e.g. between the arms length orientation of Anglo Saxon institutional investors and the more committed orientation of investors in certain European and Asian contexts The tension between opening the firm up for foreign investors in order to have access to more and cheaper capital and the consequent effects on management strategy is explored in a number of chapters Secondly at the level of coordinating activities across different sites multinationals may encourage competition between plants in different countries as well as seeking to transfer best practices The result may be pressure on managers and employees in certain plants to give up traditional practices and employment rights Thirdly multinational firms operate in environments where other forms of coordinating international business activity may also occur e.g. cartels or the creation of international regulatory activity They therefore compete for the regulatory space in complex political environments that will enable them to prosper **Globalization and the Race for Resources** Stephen G. Bunker, Paul S. Ciccantell, 2005-11-11 Drawing from extensive historical research into how economic and environmental dynamics interacted in the extraction of different materials in the Amazon especially in the development of the iron mine of Carajas the authors illustrate the profound connection between global dominance and control of natural resources Maritime Transport Athanasios A. The Deadly Life of Logistics Deborah Cowen, 2014-09-01 In a world in which global trade is at risk where warehouses and airports shipping lanes and seaports try to guard against the likes of Al Qaeda and Somali pirates and natural disaster can disrupt the flow of goods even our stuff has a political life The high stakes of logistics are not surprising Deborah Cowen reveals if we understand its genesis in war In *The Deadly Life of Logistics* Cowen traces the art and science of logistics over the last sixty years from the battlefield to the boardroom and back again Focusing on choke points such as national borders zones of piracy blockades and cities she tracks contemporary efforts to keep goods circulating and brings to light the collective violence these efforts produce She investigates how the old military art of logistics played a critical role in the making of the global economic order not simply the globalization of production but the invention of the supply chain and the reorganization of national economies into transnational systems While reshaping the world of production and distribution logistics is also actively reconfiguring global maps of security and citizenship a phenomenon Cowen charts through the rise of supply chain security with its challenge to long standing notions of state sovereignty and border management Though the object of corporate and governmental logistical efforts is commodity supply *The Deadly Life of Logistics* demonstrates that they are deeply political and considered in the context of the long history of logistics deeply indebted to the practice of war

Post-war Greco-German Relations, 1953-1981 Christos Tsakas, 2022-09-17 This book explores the post war Greco German relationship and asks how this relationship fits into and changes the narrative of European integration The book highlights West Germany's role in shaping Greece's development model and argues that Greece's accession to the Community in 1981 had a long back story in the modernization strategies adopted by the two countries as early as the 1950s The success not the failure of those strategies lies at the root of Greece's lingering balance of payments problems the ever widening trade deficit with Germany the country's main trading partner was the price of Greek economic growth in the decades following the war By addressing this three decade story of uneasy continuity the book offers new insights into core periphery relations in Europe questions the conventional wisdom about Greece's path to Europe and challenges the way the

Co-Ordination in Context G.P.E. Walzenbach, 2019-01-15 First published in 1998 This book makes an original contribution to our understanding of policy failures at the European and international level On the basis of a comparative analysis the study shows how the co ordination mechanisms available in the European Community and OECD have complicated the regulation of national policies on state aid to exporting industries This failure can be explained in theoretical terms international and supranational organisations are not neutral arbiters but have interests of their own

interests which are not necessarily aligned with those of their member states In detailed case studies of Britain France and Germany the book examines how the preference structure of governments in the exercise of their promotion programmes contrasts with the policies enacted by international bureaucracies Walzenbach s interdisciplinary approach specifies the conditions under which policy co ordination can have detrimental effects and thus usefully corrects the benign view held by most regime theorists about transaction cost reducing and efficiency enhancing role of such arrangement **Onassis**

Trade and American Leadership Craig VanGrasstek,2019-01-03 From the nation building of Alexander Hamilton to the trade wars of Donald Trump trade policy has been a key instrument of American power and wealth The open trading system that the United States sponsored after the Second World War serves US interests by promoting cooperation and prosperity but also allows the allies to become more independent and China to rise The case studies in Trade and American Leadership examine how the value of preferential trade programs is undercut by the multilateral liberalization that the United States promoted for generations and how trade sanctions tend either to be too economically costly to impose or too modest to matter These problems are exacerbated by a domestic political system in which the gains from trade are unevenly distributed power is fragmented and strategies are easily undermined Trade and American Leadership places special emphasis on today s challenges and the rising danger of economic nationalism
