A Rumour of Otters Deborah Savage, 1986 Angry at being left behind when her father and brother go off to muster sheep Alexa decides to search in the wild for the otters previously seen only by a mystical Maori tribesman *The Otters of Ruapuke* Rob Robinson, 2010-04-20 In 1419 the Emperor of China sent the most magnificent fleet of ships ever seen around the world Besides sailors ambassadors and such on board there were the inevitable rats faithful dogs and a certain group of fishing otters The old Emperor died whereupon his jealous son the new Emperor ordered his fathers ships upon return to be destroyed as well as the animals on board One ship crashed before returning on the shores of Ruapuke Beach New Zealand Until now no one has known the cause The animals knew This is their story *Ethology and Behavioral Ecology of Sea Otters and Polar Bears* Randall W. Davis, Anthony M. Pagano, 2021-07-03 Sea otters and polar bears are carnivorous marine mammals that still resemble their terrestrial ancestors Compared with Cetacea whales and dolphins Sirenia dugongs and manatees and Pinnipedia seals sea lions and walrus they are less adapted for an aquatic life and the most recently evolved among marine mammals Sea otters are amphibious but seldom come ashore and polar bears primarily occur on sea ice or along the shore When at sea both species spend most of their time swimming at the surface or making short shallow dives when foraging or pursuing prey Indeed polar bears rarely pursue seals in water Nevertheless polar bears are powerful swimmers and will stalk seals from the water As with many other large carnivores they are solitary hunters Although sea otters are gregarious and form aggregations at sea called rafts they are primarily asocial Except during mating the principal interaction among sea otters occurs between a female and offspring during the six month dependency period In large carnivores e g wolves and lions that feed on ungulates sociality and cooperation are favored because of the need to capture large prey and defend carcasses Polar bears which are the largest terrestrial carnivore are solitary hunters of seals and are neither gregarious nor social Males and females briefly associate during courtship and mating During this time males aggressively compete for females At other times males generally avoid each other except for aggregations of males that form while summering on land and females with cubs avoid males which are known for infanticide As with sea otters the interaction of polar bears outside of mating occurs between a female and her offspring during the 2 3 year dependency period This interaction is critically important when altricial cubs are born in the winter den This book provides new insight into the ethology and behavioral ecology of sea otters and polar bears Each chapter reviews the discoveries of previous studies and integrates recent research using new techniques and technology The authors also address historic and current anthropogenic challenges for their survival as climate change alters entire marine ecosystems **The California Sea Otter Trade 1784-1848** Ogden Adele, 2023-04-28 The California Sea Otter Trade 1784 1848 is a meticulous study of the early maritime commerce along the California coast particularly the pursuit of sea otter furs that played a crucial role in shaping the region s economic and political landscape Adele Ogden s research provides a detailed account of the fur trade s origins

beginning with Yankee merchants and Russian hunters who ventured into California waters despite Spain's restrictive mercantile policies. The book traces how these early traders adapted to the transition from Spanish to Mexican rule, eventually integrating California into broader intra-Pacific commerce during an era of increasing global trade. Ogden's work highlights the dual significance of the sea otter trade: its integration into the Pacific world's economic history and its local impact on California's development. By bringing American goods, people, and influence to the Pacific Coast, this trade laid the groundwork for California's transformation into a hub of United States interests and its eventual political realignment. Supported by an impressive array of archival research spanning California, New England, Mexico City, and private collections, this book offers an essential resource for understanding California's maritime heritage and the broader dynamics of Pacific trade. **The Dating Debate** Chris Cannon, 2018-02-05. Nina Barnes thinks Valentine's Day should be optional. That way single people like her wouldn't be subjected to kissy Cupids all over the place. That is, until her mom moves them next door to the brooding hottie of Greenbrier High, West Smith. He's funny, looks amazing in a black leather jacket, and he's fluent in Harry Potter, but she's not sure he's boyfriend material. West isn't sure what to make of Nina. She's cute and loves to read as much as he does, but she seems to need to debate everything, and she has a pathological insistence on telling the truth. And West doesn't exactly know how to handle that, since his entire life is a carefully constructed secret. Dating the girl next door could be a ton of fun, but only if Nina never finds out the truth about his home life. It's one secret that could bring them together or rip them apart.

**Disclaimer:** This Entangled Teen Crush book is not for anyone who has to get in the last word, but it is for all book nerds, especially those who live next door to so-called unapproachable, gorgeous guys. There's no debating the chemistry. Each book in the Dating Dilemmas series is STANDALONE.
