## Runaway Pond:

**Runaway Pond** William Corbett, 1981      **Report on the Geology of Vermont** Vermont. State Geologist, Edward Hitchcock, Albert David Hager, Charles Henry Hitchcock, 1861      **Report on the Geology of Vermont** Edward Hitchcock, 1861      Runaway Pond Nancy Price Graff, 2023 Long Pond clear reflective and bent in the middle like a crooked finger has been a source of joy and nourishment to a Vermont village for many years But when a sudden late summer storm causes the pond to swell and burst its banks endangering everyone in its path only one person is fast enough to warn the villagers downstream Spencer Chamberlain sprints off to cries of Run Chamberlain run All survive thanks to his efforts But after the storm the glassy pond is gone leaving the village and future generations with something altogether different

*The Vermonter* , 1901      **The White Mountains** Moses Foster Sweetser, 1879      The Vermonter Charles Spooner Forbes, Charles R. Cummings, 1901      **Water-supply Paper** , 1917      **Walton's Vermont Register, Farmers' Almanac, and Business Directory** , 1891      Neither Plain Nor Simple David R. Starbuck, 2004 Canterbury Shaker Village located in Canterbury New Hampshire just northeast of Concord has seen more archeological research than any other Shaker community David R Starbuck has been digging there for over a quarter of a century Beginning in 1978 Starbuck and his team mapped some 600 acres of the village preparing sixty one base maps as well as dozens of drawings of foundations and mill features Accompanying the maps were several hundred archeological site reports describing the history and present condition of every field dump foundation wall path and orchard within the community These documents offered the first comprehensive look at both the built and natural environment of any Shaker village This above ground study with much updating forms the second part of this volume Through the 1980s grant funding was available chiefly for above ground recording and only rarely for excavating Still from the beginning Starbuck and his team speculated about what types of unexpected artifacts might be found if excavations were conducted in the Shaker dumps or in the nicely manicured lawns behind the village s communal dwellings With the 1992 death of Sister Ethel Hudson the community s last surviving member it seemed clear that Canterbury Shaker Village represented an unparalleled opportunity to use archeology as a cross check on surviving nineteenth century historical records and visitors accounts The Canterbury Shakers constitute one of the very best test cases for historical archeology precisely because they were a society that tightly controlled their internal descriptions of themselves Because we know what the Shakers expected of themselves we can use excavations to determine whether they actually lived up to their own ideals Excavations into various dumps began in 1994 In the Second Family blacksmith shop foundation for example Starbuck discovered thousands of pipe wasters evidence that the Canterbury Shakers manufactured red earthenware tobacco pipes for sale to the World s People The Shakers hog house contained numerous ceramics and glass bottles at another dump almost a hundred stoneware bottles for beer or ginger beer were unearthed along with whisky flasks perfume bottles and false teeth These new artifacts contradict the popular image of the

Shakers as plain simple and otherworldly thereby challenging existing paradigms about the nature of Shaker society Starbuck s findings suggest that Shaker consumption practices were highly complex and that Shakers were perhaps more human than previously imagined Neither Plain nor Simple which brings together the original site maps with his most recent findings will serve as the definitive archeological investigation of the Canterbury Shakers and their lifeways and function as a model for similar archeological studies of communal societies
