## **Runcorn Century Of Change:**

**Runcorn** Hubert F. Starkey,2005 A collection of approximately 200 archive images accompanied by captions *Across The Gap* Jean M. Morris,2016-11-07 An account of how in the wake of The Industrial Revolution a little known corner of rural England was transformed into an area of dense industrial activity The arrival of the alkali trade in Widnes and the subsequent explosion in population changed the social structure of the area and created great divisions in society The indigenous communities who had lived and worked in time honoured rural occupations for generations were swallowed up by a growing workforce of migrant workers from all corners of Britain and Ireland As a consequence the social fabric of the area was irrevocably altered and the devastating effect of industry on the landscape and environment created huge problems This book allows us to see how a new unskilled workforce struggled to adapt to factory disciplines and routines as well as a new urban way of living Cultures of Prediction in Atmospheric and Climate Science Matthias Heymann,Gabriele Gramelsberger,Martin Mahony,2017-06-26 In recent decades science has experienced a revolutionary shift The development and extensive application of computer modelling and simulation has transformed the knowledge making practices of scientific fields as diverse as astro physics genetics robotics and demography This epistemic transformation has brought with it a simultaneous heightening of political relevance and a renewal of international policy agendas raising crucial questions about the nature and application of simulation knowledges throughout public policy Through a diverse range of case studies spanning over a century of theoretical and practical developments in the atmospheric and environmental sciences this book argues that computer modelling and simulation have substantially changed scientific and cultural practices and shaped the emergence of novel cultures of prediction Making an innovative interdisciplinary contribution to understanding the impact of computer modelling on research practice institutional configurations and broader cultures this volume will be essential reading for anyone interested in the past present and future of climate change and the environmental sciences **A History of Cheshire** ,1985 The Awakening Giant (Routledge Revivals) Andrew Pettigrew,2013-06-20 First published in 1985 this book is about Imperial Chemical Industries response to the changing social political business and economic environment over the past twenty years Using personal interviews and archival material Andrew Pettigrew examines the evolution of business strategy organisation structure and culture technology and union management relations within this corporate giant over an extended period of time It is a compelling account told from the inside by one of the world s leading management and organisation theorists The Awakening Giant has made a major practical and theoretical contribution to the study of corporate strategy organisational analysis and change and business history Anyone with an interest in managing change in a large corporation will find this reissue rewarding reading **From Crust to Core** Simon Mitton,2021 A fascinating historical account of the emergence and development of the new interdisciplinary field of deep carbon science **Twenty First Century Town** E M Robins,2016-10-04 A handy town for busy people Family services babycare senior care laundrette food

and meals Automatic transport and delivery Real countryside and proper town All within 100m of your front door under cover Does this sound useful Time for a new kind of town     The British National Bibliography Arthur James Wells,2009     *Atlas of Industrializing Britain, 1780-1914* John Langton,2002-11-01 This atlas draws together crucial social and economic data on England Scotland and Wales between 1780 and 1914 and gives a clear guide to the industrial development of Great Britain during the modern period     Treatise on Geomorphology ,2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline The number of peer reviewed papers published in geomorphic journals has grown steadily for more than two decades and more importantly the diversity of authors with respect to geographic location and disciplinary background geography geology ecology civil engineering computer science geographic information science and others has expanded dramatically As more good minds are drawn to geomorphology and the breadth of the peer reviewed literature grows an effective summary of contemporary geomorphic knowledge becomes increasingly difficult The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic Information on the historical development of diverse topics within geomorphology provides context for ongoing research discussion of research strategies equipment and field methods laboratory experiments and numerical simulations reflect the multiple approaches to understanding Earth s surfaces and summaries of outstanding research questions highlight future challenges and suggest productive new avenues for research Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth s diverse surfaces This Treatise on Geomorphology provides a useful synthesis of the state of the discipline as well as highlighting productive research directions that Educators and students researchers will find useful Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field Undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding Editor in Chief Prof J F Shroder of the University of Nebraska at Omaha is past president of the QG G section of the Geological Society of America and present Trustee of the GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in the field A host of noted international geomorphologists have contributed state of the art chapters to the work Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the Editor in Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14 volume masterpiece From the foundations and history of geomorphology through to

geomorphological innovations and computer modelling and the past and future states of landform science no stone has been left unturned Continuity and Change Paul Cockerham,2006 Presents an extensive appraisal of several cohesive style groups of monuments being the products of specific monument workshops in Cornwall from the end of the fifteenth century to the Commonwealth **Cheshire in the Twentieth Century** Rosalind E.
