## **Running On Empty Alberta After The Boom:**

**Running on Empty** Andrew Nikiforuk, Sheila Pratt, Don Wanagas, 1987-01-01      From Miracle to Menace David Yager, 2019-03-26 A miracle Coal oil and natural gas the carbon based fossil fuels that powered the Industrial Revolution and civilization s rapid advancement A menace Climate change has how convinced many that carbon emissions are the world s greatest challenge The necessity and benefits of decarbonizing the global industrial and energy complex are well articulated What is not explained is this will require the largest financial disruption in history affecting everyone and everything For over a century Alberta s massive carbon resources have supported Alberta and Canada financially helping make Canada the world s fifth largest oil and gas producer Carbon has been a major driver of prosperity employment and opportunity shaping the country we know today However climate change is creating enormous challenges for Alberta and Canada with no possible outcomes that will satisfy all stakeholders Alberta has become ground zero for the changes many demand but few are willing to pay for As the province demonstrates what carbon s future looks and feels like unless the rest of the world participates Alberta has become a needless sacrifice From Miracle to Menace explains how Alberta came to be the enormity of the planned financial dislocation and how Alberta and Canada can meet the climate challenge without committing economic suicide      Second Promised Land Harry H. Hiller, 2009 Explosive economic growth in resource rich Alberta has led to a stunning increase in its population In contrast to Ontario and British Columbia which have grown primarily through international migration Alberta has become a magnet for internal migrants contributing to population redistribution within Canada with significant national social and economic consequences Combining statistical analysis and ethnographic study Harry Hiller uncovers two waves of in migration to Alberta His innovative approach begins with the individual migrant and analyzes the relocation experience from origin to destination Through interviews with hundreds of migrants Hiller shows that migration is complex and dynamic shaped not just by what Alberta offers but also prompted by a process that begins in the region of origin that makes migration possible and helps determine whether migrants stay or return home By combining a social psychological approach with structural factors such as Alberta s transition from a regional hinterland province to its emerging role the global system discussions of gender The internet and folk culture Second Promised Land provides a multi dimensional and deeply human account of a contemporary Canadian phenomenon      **Challenging Legitimacy at the Precipice of Energy Calamity** Debra J. Davidson, Mike Gismondi, 2011-08-30 Human history has often been described as a progressive relinquishment from environmental constraints Now it seems we have come full circle The ecological irrationalities associated with industrial societies have a lengthy history and our purpose in the proposed book is not to catalogue this litany of wrongs Rather this book is about political responses to global environmental crisis at a crucial turning point in history by focusing on the political discourses surrounding the tar sands in Alberta Canada      **Working People in Alberta** Alvin Finkel, 2012 A political and economic analysis of the history of working people in Alberta      *Developing*

*Alberta's Oil Sands* Paul Anthony Chastko, 2004 Alberta's oil sands represent a vast and untapped oil reserve that could reasonably supply all of Canada's energy needs for the next 475 years. With an estimated 300 billion barrels of recoverable oil at stake, the quest to develop this natural resource has been undertaken by many powerful actors both nationally and internationally. Using research that integrates the economic, political, scientific, and business factors that have been influential in discovering and developing the sands, this book provides a comprehensive history of the oil sands project and a window on the nature of the complex relationships between industry, government, and transnational players. This book is the first comprehensive volume that examines the origins and development of the oil sands industry over the last century.

Mavericks Aritha Van Herk, 2010-01-12 The fifth title in our provincial histories series, *Mavericks* is an idiosyncratic and episodic history of what is arguably Canada's most unconventional province. From mapmakers to ranchers, Stampede Wrestling to Stockwell Day, acclaimed writer Aritha van Herk brings the drama and combative beauty of this irascible province to stunning life. Van Herk's portrait of her home province embraces all its extremes, from deadly and spectacular weather to dinosaur graveyards and from oil gushers and geysers to barnstorming social reformers and political haymakers. Bronc riders of boom and bust, Alberta's people are a beguiling mixture of opinionated extremists, hardy pioneers, and gentle sinners. Alberta is a province that most Canadians simply don't understand; the province most Canadians love to hate. It is regarded as a land of reckless redneck and ignorant individualists. But it is also the province where the Famous Five fought the landmark *Person's Case*, giving Canadian women the same status as men in the eyes of the law; a province that truly believes in free speech. Albertans tolerate in their midst people whose extreme views on any manner of subjects would make them outcasts elsewhere. And Albertans practice the creed of western neighbourliness, giving assiduously to charity and always lending a hand where help is needed. They are a tough, tender bunch, squinting into the wind of determined difference. If you're an Albertan, you'll recognize yourself and your home in this book. If you're not an Albertan, this book will be an education for you. *Mavericks* will open your eyes to the real Alberta as she was and is. **On Oil** Don Gillmor, 2025-04-22 A

journalist and former roughneck, considers our long, complex, tortured relationship with oil. Oil has dominated our lives for the last century. It has given us warmth, progress, and life-threatening pollution. It has been a gift and is now a threat. It has started wars, ended wars, and infiltrated governments. In some cases, it effectively became the government. And now, oil's enduring mythology is facing a messy, complicated twilight. In *On Oil*, Don Gillmor, who worked as a roughneck on oil rigs during the seventies oil boom in Alberta, looks at how the industry has changed over the decades and illustrates the ways our dependence on oil has led to regulatory capture in Canada and elsewhere and contributed to armed conflict and war across the world. Gillmor documents the myriad ways that oil companies have misdirected environmental action and misinformed the public about climate concerns and illuminates where we went wrong and how we might yet change course. **Alberta**
