University Social Responsibility Keikoh Ryu,2021-09-07 This book analyzes the growing importance of information disclosure in Japanese universities in the context of the country s changing circumstances from both a macroscopic and microscopic perspective with a focus on the concept of universities as organizations This macroscopic analysis is based on available data concerning the various information disclosure practices of Japanese universities and includes a discussion of their strengths and weaknesses As for the microscopic analysis questionnaires and various other quantitative methods have been used to study overall satisfaction with the level of disclosure among students and teachers in public and private universities including differences between Japanese and Chinese students The results of these surveys have then been analyzed to identify the main factors informing students views on the subject Finally additional insight into the practice of information disclosure in Japanese universities has been provided in a series of representative case studies which should help

promote further study concerning the practical applications of such disclosure Based on the above analysis this book proposes a social responsibility based approach to university information disclosure which incorporates stakeholder theory based identification of public information content an underlying focus on disclosure as a means to realize universities social responsibilities identification of the types of information that universities should seek to disclose recommendations for developing a framework for the systematic disclosure of such information and recent disclosure trends As part of this approach recommendations concerning the arrangement of different sources of information thoughts on building a publicly accessible platform for sharing university information and key points underlying the systematic disclosure of information within universities are also proposed Finally this book is helpful in identifying further areas of research including but not necessarily limited to the ideas and legal principles underlying the construction of a university information disclosure system the development of information disclosure systems based on social responsibility and the development of various standards for the disclosure of information The ideal approach would ensure that all stakeholders are provided with meaningful access to relevant information and that transparency takes precedence over any competing considerations as part of an overriding effort to improve university administration and oversight

Sports Law in Australia Andy Gibson,2024-09-17 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of sports law in Australia deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in

comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in Australia will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law *Law* Peter Jordan,2006 Managing Care: A Shared Responsibility Joseph L. Verheijde,2006-01-07 This book traces the growth of managed care as a mechanism for curbing excessive growth in health costs and the controversies that have risen around for profit health care Also examined are decentralization in US health care and the absence of comprehensive health care planning access rules and minimum health care benefit standards Finally the author proposes a framework for improving access to quality affordable health care in a competitive market environment
