South Asia Economic Focus World Bank, 2024-04-02 South Asia is expected to continue to be the fastest growing emerging market and developing economy EMDE region over the next two years This is largely thanks to robust growth in India but growth is also expected to pick up in most other South Asian economies However growth in the near term is more reliant on the public sector than elsewhere whereas private investment in particular continues to be weak Efforts to rein in elevated debt borrowing costs and fiscal deficits may eventually weigh on growth and limit governments ability to respond to increasingly frequent climate shocks Yet the provision of public goods is among the most effective strategies for climate adaptation This is especially the case for households and farms which tend to rely on shifting their efforts to non agricultural jobs These strategies are less effective forms of climate adaptation in part because opportunities to move out of agriculture are limited by the region s below average employment ratios in the non agricultural sector and for women Because employment growth is falling short of working age population growth the region fails to fully capitalize on its demographic dividend Vibrant competitive firms are key to unlocking the demographic dividend robust private investment
