Our planet is in trouble But how can we reverse the current crisis and create a sustainable future The answer is DEGROWTH Less is More is the wake up call we need By shining a light on ecological breakdown and the system that s causing it Hickel shows how we can bring our economy back into balance with the living world and build a thriving society for all This is our chance to change course but we must act now

A masterpiece Less is More covers centuries and continents spans academic disciplines and connects contemporary and ancient events in a way which cannot be put down until it s finished DANNY DORLING Professor of Geography University of Oxford Jason is able to personalise the global and swarm the mind in the way that insects used to in abundance but soon shan t unless we are able to heed his beautifully rendered warning RUSSELL BRAND Jason Hickel shows that recovering the commons and decolonizing nature cultures and humanity are necessary conditions for hope of a common future in our common home VANDANA SHIVA author of Making Peace With the Earth This is a book we have all been waiting for Jason Hickel dispels ecomodernist fantasies of green growth Only degrowth can avoid climate breakdown The facts are indisputable and they are in this book GIORGIS KALLIS author of Degrowth Capitalism has robbed us of our ability to even imagine something different Less is More gives us the ability to not only dream of another world but also the tools by which we can make that vision real ASAD REHMAN director of War on Want One of the most important

books I have read does something extremely rare it outlines a clear path to a sustainable future for all RAOUL MARTINEZ author of *Creating Freedom* Jason Hickel takes us on a profound journey through the last 500 years of capitalism and into the current crisis of ecological collapse *Less is More* is required reading for anyone interested in what it means to live in the Anthropocene and what we can do about it ALNOOR LADHA co founder of *The Rules* Excellent analysis This book explores not only the systemic flaws but the deeply cultural beliefs that need to be uprooted and replaced ADELE WALTON

Families Caring for an Aging America National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Family Caregiving for Older Adults, 2016-12-08 Family caregiving affects millions of Americans every day in all walks of life At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation The nation's family caregivers provide the lion's share of long term care for our older adult population They are also central to older adults access to and receipt of health care and community based social services Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population *Families Caring for an Aging America* examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs supports and other interventions designed to support family caregivers This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults **The English**

Catalogue of Books Published from January, 1835, to January, 1863, 1864 **Confessions of the Pricing Man** Hermann Simon, 2015-10-20 The world's foremost expert on pricing strategy shows how this mysterious process works and how to maximize value through pricing to company and customer In all walks of life we constantly make decisions about whether something is worth our money or our time or try to convince others to part with their money or their time Price is the place where value and money meet From the global release of the latest electronic gadget to the bewildering gyrations of oil futures to markdowns at the bargain store price is the most powerful and pervasive economic force in our day to day lives and one of the least understood The recipe for successful pricing often sounds like an exotic cocktail with equal parts psychology economics strategy tools and incentives stirred up together usually with just enough math to sour the taste That leads managers to water down the drink with hunches and rules of thumb or leave out the parts with which they don't feel comfortable While this makes for a sweeter drink it often lacks the punch to have an impact on the customer or on the business It doesn't have to be that way though as Hermann Simon illustrates through dozens of stories collected over four decades in the trenches and behind the scenes A world renowned speaker on pricing and a trusted advisor to Fortune 500 executives Simon's lifelong journey has taken him from rural farmers markets to a distinguished academic career to a long second career as an entrepreneur and management consultant to companies large and small throughout the world Along the way he has learned from Nobel Prize winners and leading management gurus and helped countless managers and executives

use pricing as a way to create new markets grow their businesses and gain a sustained competitive advantage He also learned some tough personal lessons about value how people perceive it and how people profit from it In this engaging and practical narrative Simon leaves nothing out of the pricing cocktail but still makes it go down smoothly and leaves you wanting to learn more and do more as a consumer or as a business person You will never look at pricing the same way again

Bad Beliefs Neil Levy,2021-12-17 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Bad beliefs beliefs that blatantly conflict with easily available evidence are common Large minorities of people hold that vaccines are dangerous or accept bizarre conspiracy theories for instance The prevalence of bad beliefs may be politically and socially important for instance blocking effective action on climate change Explaining why people accept bad beliefs and what can be done to make them more responsive to evidence is therefore an important project A common view is that bad beliefs are largely explained by widespread irrationality This book argues that ordinary people are rational agents and their beliefs are the result of their rational response to the evidence they re presented with We thought they were responding badly to evidence because we focused on the first order evidence alone

the evidence that directly bears on the truth of claims We neglected the higher order evidence in particular evidence about who can be trusted and what sources are reliable Once we recognize how ubiquitous higher order evidence is we can see that belief formation is by and large rational The book argues that we should tackle bad belief by focusing as much on the higher order evidence as the first order evidence The epistemic environment gives us higher order evidence for beliefs and we need to carefully manage that environment The book argues that such management need not be paternalistic once we recognize that managing the epistemic environment consists in management of evidence we should recognize that such management is respectful of epistemic autonomy
