Rural Development Problems And Practices:

Rural Development Henry Buller, Susan Wright (B.A.), 1990 Comprises essays Examines the field of rural development in the UK and draws connections between the rural and community development process in the developing world and in Britain

Rural Development in Practice Willem van Eekelen, 2020-05-04 Rural Development in Practice focuses on the evolving nature of rural development in the Global South It outlines how we got to where we are today checks what we can learn from history and explores the development drivers facilitators and obstacles most likely to shape the years ahead The book covers the management of fishing grounds forests grazing lands water sources and soil and looks at the effects of infrastructure trade mechanisms and new crop varieties on farming The author discusses the opportunities and challenges of microfinance social safety nets and migration and assesses the way ICT and climate change are changing everything rapidly Real life examples exercises role plays textboxes anecdotes and illustrative artwork are used to bring concepts and theories to life and every chapter concludes with a section that explores how best to tackle the tough and complex dilemmas of our time Rural Development in Practice is essential reading for students at all levels and may be of benefit for programme and policy staff in rural focused government departments multilateral agencies and non government organisations

Rural Development Theory and Practice Ruth McAra, 2009-06-02 Rural development is inherently viewed as a positive thing it is seen as something that brings together groups of individuals with automatic positive implications and outcomes Policy rhetoric frequently uses popular terms such as involvement participation and power sharing to describe rural development activities However the reality of experience on the ground does not necessarily concur with these ideals It is not always clear who ultimately benefits from rural development the State the community or rural development practitioners This book critically analyses key concepts associated with rural development policy and practice and using the concepts of power and micro politics to analyze rhetoric and reality reveals the intricacies of rural development Challenging popular ideals associated with rural development this book presents the notion of rural development less as a spontaneous all inclusive affair and more as a limited controlled and exclusive process Ultimately it contends that within structures of rural governance a regeneration power elite predominates development and regeneration activities

Sustainable Rural Development José Luis Gurriá Gascón, Ana Nieto Masot, 2021-10-22 In 2020 a Special Issue titled Sustainable Rural Development Strategies Good Practices and Opportunities was launched in which 16 papers were published The aim of this monograph was to study a problem that is occurring on a global scale and above all in the most developed countries which is the population emigration from rural areas to urban areas due to the labour and service opportunities offered by the latter This is causing a demographic deterioration of rural areas and those that remain show high rates of ageing masculinisation or low demographic growth In addition and interrelated with this demographic deterioration there is economic and environmental degradation Rural areas are territories with increasingly lower purchasing power job opportunities and

services for the population which are classified as spaces in crisis The papers in this Special Issue evidence the many public and private strategies that are being pursued to achieve sustainable rural development in declining areas The diversity of approaches offer a vision of the practical application and the obstacles or difficulties that many of them are having to achieve their objectives All of these strategies are intended to achieve economic dynamism that is respectful of the environment and from there to be able to reduce the regressive demographic processes in rural areas These are different approaches that allow us to contribute from scientific holistic and multidisciplinary knowledge and they can help decision making in public policy and planning strategies

Achieving Rural Health Equity and Well-Being National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Roundtable on the Promotion of Health Equity, Roundtable on Population Health Improvement, 2018-10-17 Rural counties make up about 80 percent of the land area of the United States but they contain less than 20 percent of the U S population The relative sparseness of the population in rural areas is one of many factors that influence the health and well being of rural Americans Rural areas have histories economies and cultures that differ from those of cities and from one rural area to another Understanding these differences is critical to taking steps to improve health and well being in rural areas and to reduce health disparities among rural populations To explore the impacts of economic demographic and social issues in rural communities and to learn about asset based approaches to addressing the associated challenges the National Academies of Sciences Engineering and Medicine held a workshop on June 13 2017 This publication summarizes the presentations and discussions from the workshop

Rural Development and Management in India Manish Didwania, Nitin Kishore Saxena, Sanjeev Prashar, 2017 Today's socio economic scenario is highly volatile and risky To sustain the growth and development is a big challenge for various national economic entities After liberalisation privatisation and globalisation most of these entities including national and multinational firms targeted the urban population for growth It has been more than twenty five years and these urban markets are showing signs of maturation and saturation This resulted in agencies and organisations looking for new avenues in order to sustain themselves In such a scenario India's rural markets have emerged as a new hope for them The hinterlands in India consist of more than 650 000 villages which represent approximately 850 million consumers This number is roughly equal to 70% of the total population These rural consumers contribute to approximately half of the country's Gross Domestic Product GDP Since 2000 India's rural sector showed a tremendous growth in its per capita Gross Domestic Product GDP as compared to its urban counterpart 6.2% CAGR versus 4.7% By the end of 2018 rural GDP is estimated to reach US 20 billion and touch US 100 billion by 2025 According to McKinsey Global Institute the annual real income per household in rural India would rise to 3.6% by 2025 from the 2.8% over the last 20 years Normally it is assumed that urban consumers have more disposable income and their spending pattern is different from that of rural consumers But the last decade has witnessed a change in this trend with rural consumers exhibiting similar consumption patterns to that of their urban counterparts This change is the result of various government initiatives such as the Mahatma Gandhi National Rural Employment Act MGNRA Swarnjayanti Gram Swarozgar Yojna and the National Social Assistance Program that have increased the purchasing power of rural India This has led to higher spending by rural consumers US 69 billion between 2009 and 2012 and this is significantly more than the US 55 billion spent by urban consumers Owing to a favourable changing consumption trend as well as the potential size of the market rural India provides a large and attractive opportunity for companies The rural market is highly vibrant in nature and the business organisations are performing both as the carrier and bearer of the results of this change which is happening at an accelerating pace In the initial years rural consumers were

on the receiving end and now they are gradually getting into position to dictate the terms A significant rural market share can be achieved by focusing on execution excellence by implementing novel strategies to serve rural consumers and it must be drawn on a deep understanding of consumers cultures and needs Research related to rural development in India is almost non existent and this book provides a window into the challenges that are faced in rural India This book presents a window into the need for education in this subject at the same

Rural Development Katar Singh,1999-06-08 Policy relevant and up to date Rural Development deals systematically with all aspects of socioeconomic rural development using India as a case study The Second Edition includes an integrated treatment of the principles policies and management of rural development new research and statistical data illustrations and examples from current situations the latest measures of rural development and a new methodology for project monitoring and evaluation

Addressing rural development is key for Ethiopia's growth process. A series of government-led structural reforms have contributed to sustained growth in the country over the last two decades as well as to considerable poverty reduction in rural areas. However, Ethiopia faces critical challenges it will need to overcome to meet the needs of a growing rural population. In practice, this will require updating the existing rural development strategy in order to better integrate the interaction of rural and urban areas. Policy approaches that account for the fast urbanisation process experienced in the country will therefore be key to improving the well-being of rural populations and promoting national growth. This report takes a spatial approach to study Ethiopia's rural development strategies. It highlights the need to develop stronger and more functional linkages between rural and urban areas. As such, the development of intermediary cities and small urban centres provides large scope for inclusive rural transformation. The report is the result of rigorous analysis and extensive consultations with national and international stakeholders. It identifies some of the key challenges faced by rural areas and provides a series of recommendations to enhance Ethiopia's rural development strategies.
