Rural Infrastructure From A World Bank Perspective A Knowledge Management Framework:

Rural Infrastructure from a World Bank Perspective Louis Y. Pouliquen, 1999 Rural infrastructure is critical to both economic and social development Its absence thwarts growth and typically the poor are those hurt the most The purpose of this paper is to serve as a basis for knowledge management on rural infrastructure In the 1970s the primary if not the unique objective of rural infrastructure lending was to get rural infrastructure built However the institutional aspects of how this infrastructure was to be built and later how it would be operated and maintained did not receive much attention Only recently has poverty alleviation through employment creation become an explicit objective of rural infrastructure investments This review tracks the poverty alleviation objective of rural infrastructure projects using three criteria 1 whether poverty was an explicit criterion in the selection of specific sub projects 2 whether poverty was addressed in the pricing of rural infrastructure services and 3 whether poverty was addressed through the creation of employment

World Development Report 1994 ,1994 World Development Report 1994 examines the link between infrastructure and development and explores ways in which developing countries can improve both the provision and the quality of infrastructure services In recent decades developing countries have made substantial investments in infrastructure achieving dramatic gains for households and producers by expanding their access to services such as safe water sanitation electric power telecommunications and transport Even more infrastructure investment and expansion are needed in order to extend the reach of services especially to people living in rural areas and to the poor But as this report shows the quantity of investment cannot be the exclusive focus of policy Improving the quality of infrastructure service also is vital Both quantity and quality improvements are essential to modernize and diversify production help countries compete internationally and accommodate rapid urbanization The report identifies the basic cause of poor past performance as inadequate institutional incentives for improving the provision of infrastructure To promote more efficient and responsive service delivery incentives need to be changed through commercial management competition and user involvement Several trends are helping to improve the performance of infrastructure First innovation in technology and in the regulatory management of markets makes more diversity possible in the supply of services Second an evaluation of the role of government is leading to a shift from direct government provision of services to increasing private sector provision and recent experience in many countries with public private partnerships is highlighting new ways to increase efficiency and expand services Third increased concern about social and environmental sustainability has heightened public interest in infrastructure design and performance

Water Resources Sector Strategy ,2004-01-01 This paper focuses on how to improve the development and management of water resources while providing the principles that link resource management to the specific water using sectors In 1993 the Board of the World Bank endorsed a Water Resources Management Policy Paper In that paper and this Strategy water resources management is seen to comprise the institutional framework management instruments and the development

maintenance and operation of infrastructure The paper looks at the dynamics of water and development It builds on the 1993 policy paper evaluating current scenarios and looking at future options and their implications both for government policy and the World Bank Bangladesh, Rural Infrastructure Strategy Study ,1996 Report of seminars held in Dhaka during 1994-1996 **Rethinking Infrastructure for Development** François Bourguignon,Boris Pleskovic,2008 This book provides profiles of over 50 countries with 54 development indicators about people environment economy technology infrastructure trade and finance all in one handy pocket-sized volume A must have for anyone interested in today's development challenges in sub-Saharan Africa Knowledge Management Morgen MacIntosh,Taverekere Srikantaiah,2000 Here is the first comprehensive reference to the literature available for the individual interested in KM featuring citations to over 1 500 published articles 150 Web sites and more than 400 books Organized by topic area this is a natural companion volume to Knowledge Management for the Information Professional and an important tool for anyone charged with contributing to or managing an organization's intellectual assets **The National Economic Empowerment and Development Strategy** Olasupo Akano,Kayode Adegboḡa Familoni,2006 *Economic Growth in the 1990s* World Bank,2005 This report was prepared by a team led by Roberto Zagha under the general direction of Gobind Nankani When is Growth Pro-poor? Aart Kraay,2004-03 Growth is pro poor if the poverty measure of interest falls This implies three potential sources of pro poor growth a a high rate of growth of average incomes b a high sensitivity of poverty to growth in average incomes and c a poverty reducing pattern of growth in relative incomes I empirically decompose changes in poverty in a large sample of developing countries into these components In the medium run most of the variation in changes in poverty is due to growth suggesting that policies and institutions that promote broad based growth should be central to pro poor growth Most of the remainder is due to poverty reducing patterns of growth in relative incomes rather than differences in the sensitivity of poverty to growth in average incomes Cross country evidence provides little guidance on policies and institutions that promote these other sources of pro poor growth **Proceedings of the ... Annual Conference of Zonal Research Units** Central Bank of Nigeria. Research Department,2002-06-03 **Do Rural Infrastructure Investments Benefit the Poor?** Jocelyn A. Songco,2002 Assesses the impact of rural infrastructure projects on the rural poor and very poor *Innovations in rural and agriculture finance* Kloeppinger-Todd, Renate,Sharma, Manohar,2010-07-21 Everywhere in the world small agricultural producers are entrepreneurs traders investors and consumers all rolled into one In all these roles small agricultural households constantly seek to use available financial instruments to improve their productivity and secure the best possible consumption and investment choices for their families But the package of financial services available to small farmers in developing countries is severely limited especially for those living in remote areas with no access to basic market infrastructure When poor people have limited saving or borrowing options their investment plans are stifled and it becomes harder for them to break out of poverty If households have no access to insurance and are unable to accumulate small

savings that enable them to pay for household and business expenses especially during lean seasons they are forced to limit their exposure to risk even if high returns are expected once again making the pathway out of poverty more arduous than necessary Inadequate access to financial services is thus part of what is often called the poverty trap *Rethinking Decentralization in Developing Countries* Jennie Ilene Litvack,Junaid Ahmad,Richard Miller Bird,1998-01-01 In an effort to reduce poverty and improve nutrition this Bank operation assisted the Indian program Operation Flood to develop the dairy industry in India This study examines the policy changes instituted to support the aid flow to the dairy sector and discusses the lessons learned and benefits realized through improved dairy production It also presents suggestions for improvement This program differs from other Bank efforts in that it focuses on a single commodity to alleviate poverty and raise living standards

Blue Skies, Blue Seas Martin Heger,Lukas Vashold,Anabella Palacios,Mala Alahmadi,Marjory-Anne Bromhead,Marcelo Acerbi,2022-05-04 While economic and social indicators in many Middle East and North Africa MENA countries have improved over the past three decades the region s blue natural assets clean air healthy seas and coastlines have degraded virtually everywhere Air pollution levels in the region scities are among the highest in the world Per capita marine plastic pollution is among the highest in the world coastal erosion rates are the second fastest in the world These combined challenges threaten local communities livelihoods and economies In fact the economic cost of MENA s deteriorating skies and seas is estimated at more than 3 percent of GDP per year Blue Skies Blue Seas Air Pollution Marine Plastics and Coastal Erosion in the Middle East and North Africa reviews integrated solutions that the authors identify as the four I s Inform stakeholders about the sources of these challenges Provide incentives that improve environmental outcomes for the public and theprivate sector Strengthen institutions to lower air and plastic pollution and to mitigate uncontrolleddevelopment and erosion of coastlines Invest in abatement options and promote sustainable solutions Restoring MENA s blue skies and seas will benefit the health livelihoods and incomes of residents There will inevitably be trade offs but choosing a path of green growth will create jobs diversify economies and make the region a better place for current and future generations The actions of policy makers today will shape the trajectory of economies and communities for decades to come

Public Investment Management Reference Guide Jay-Hyung Kim,Jonas Arp Fallov,Simon Groom,2020-03-03 The Public Investment Management PIM Reference Guide aims to convey country experiences and good international practices as a basis for decisions on how to address a country specific PIM reform agenda The country references are drawn largely from previous diagnostics and technical assistance reports of the World Bank The application of country diagnostics and assessments has revealed a need to address the following issues when undertaking a country reform in PIM Clarification of the definition and scope of public investment and public investment management Establishment of a sound legal regulatory and institutional setting for PIM making sure it is linked to the budget process Allocation of roles and responsibilities for key players in PIM across government Strengthening of guidance on project preappraisal appraisal and selection prioritization procedures and deepening of project appraisal methodologies Integration of strategic planning project appraisal selection and capital budgeting Management of multiyear capital budget allocations and commitments Efforts to address effective implementation procurement and monitoring of projects Strengthening of asset management and ex post evaluation Integration of PIM and public private partnership PPP in a unified framework Rationalization and prioritization of the existing PIM project portfolio Development of a PIM database and information technology in the form of a PIM information system The PIM Reference Guide does not seek to provide definitive answers or standard guidance for the common PIM issues facing countries Nor does it seek to provide a detailed template for replication across countries this would be impossible given the diversity of country situations Instead each chapter begins with an overview of the specific reform issue lists approaches and experiences from different countries and summarizes the references and good practices to be considered in designing country specific reform actions
