## **Rural China Takes Off:**

*Rural China Takes Off* Jean C. Oi, 1999-05-17 A distinctive and important contribution Thomas P Bernstein author of *Up to the Mountains and Down to the Villages* *Rural China Takes Off* Jean C. Oi, 1999-05-17 In this incisive analysis of one of the most spectacular economic breakthroughs in the Deng era Jean C Oi shows how and why Chinese rural based industry has become the fastest growing economic sector not just in China but in the world Oi argues that decollectivization and fiscal decentralization provided party officials of the localities counties townships and villages with the incentives to act as entrepreneurs and to promote rural industrialization in many areas of the Chinese countryside As a result the corporatism practiced by local officials has become effective enough to challenge the centrality of the national state Dealing not only with the political setting of rural industrial development Oi s original and strongly argued study also makes a broader contribution to conceptualizations of corporatism in political theory Oi writes provocatively about property rights and principal agent relationships and shows the complex financial incentives that underpin and strengthen the growth in local state corporatism and shape its evolution This book will be essential for those interested in Chinese politics comparative politics and communist and post communist systems

**Invisible China** Scott Rozelle, Natalie Hell, 2020-09-29 A study of how China s changing economy may leave its rural communities in the dust and launch a political and economic disaster As the glittering skyline in Shanghai seemingly attests China has quickly transformed itself from a place of stark poverty into a modern urban technologically savvy economic powerhouse But as Scott Rozelle and Natalie Hell show in *Invisible China* the truth is much more complicated and might be a serious cause for concern China s growth has relied heavily on unskilled labor Most of the workers who have fueled the country s rise come from rural villages and have never been to high school While this national growth strategy has been effective for three decades the unskilled wage rate is finally rising inducing companies inside China to automate at an unprecedented rate and triggering an exodus of companies seeking cheaper labor in other countries Ten years ago almost every product for sale in an American Walmart was made in China Today that is no longer the case With the changing demand for labor China seems to have no good back up plan For all of its investment in physical infrastructure for decades China failed to invest enough in its people Recent progress may come too late Drawing on extensive surveys on the ground in China Rozelle and Hell reveal that while China may be the second largest economy in the world its labor force has one of the lowest levels of education of any comparable country Over half of China s population as well as a vast majority of its children are from rural areas Their low levels of basic education may leave many unable to find work in the formal workplace as China s economy changes and manufacturing jobs move elsewhere In *Invisible China* Rozelle and Hell speak not only to an urgent humanitarian concern but also a potential economic crisis that could upend economies and foreign relations around the globe If too many are left structurally unemployable the implications both inside and outside of China could be serious Understanding the situation in China today is essential if we are to avoid a potential crisis of international

proportions This book is an urgent and timely call to action that should be read by economists policymakers the business community and general readers alike Praise for Invisible China Stunningly researched The Economist Best Books of the Year UK Invisible China sounds a wake up call The Strategist Not to be missed Times Literary Supplement UK Invisible China provides an extensive coverage of problems for China in the sphere of human capital development the book is rich in content and is not constrained only to China but provides important parallels with past and present developments in other countries Journal of Chinese Political Science

**The Transformation of Rural China** Jonathan Unger, 2002 Here Professor Unger presents a vivid picture of life in rural areas during the Maoist revolution and then after the post Mao disbandment of the collectives A story of unexpected continuities amidst great change Unger describes how rural administrations retain Maoist characteristics

***Rural Industrialization in China*** Jon Sigurdson, 2020-03-17 Small scale industries in rural areas in China are today an essential element of regional development programs This monograph analyzes two main development strategies One involves technology choices in a number of industrial sectors most of which were initiated during the Great Leap Forward in the late fifties The scaling down of modern large scale technology through a product or quality choice combined with changes in the manufacturing processes is discussed at some length for nitrogen chemical fertilizer and cement The other approach is the integrated rural development strategy where a number of activities are integrated within or closely related to the commune system This strategy includes industry as only one component of many instruments where improved public health education and improved agricultural technology contribute to achieving such policy objectives as increased employment and productivity

**Rural China** Jie Fan, Thomas Heberer, Wolfgang Taubmann, 2015-05-15 This book reports the findings of two field studies conducted between 1993 and 2001 in seven townships and six provinces in China The authors describe the process of rural urbanization and its related economic social and political changes by focusing mainly on the zhen town in addition to administrative offices and companies involved in the local economy and village committees The authors show that the social changes resulting from China's economic reforms are occurring mainly from below and that this process is also resulting in a weakening of the economic and political dominance of the central government Other changes discussed in this study include the development of new ownership structures and the increasing dominance of the private sector a shift in the functions of administrative offices as the bureaucracy becomes increasingly business oriented the rise of a new local elite a rebirth of traditional social structures clans local associations and the emergence of new interest groups and institutions to represent their needs

**Bird in a Cage** Stanley B. Lubman, 1999 This book analyzes the principal legal institutions that have emerged in China and considers implications for U S policy of the limits on China's ability to develop meaningful legal institutions

**China's Rural Areas** China Development Research Foundation, 2017-04-21 The prosperity of China's people has advanced very much in recent decades However in many respects China is still a developing country and this is especially true of rural areas where economic progress has not been as marked as in urban areas and where many

people still live in relative poverty The Chinese government recognizes that more hard work is needed in order to improve prosperity in the countryside This book provides a systematic and comprehensive analysis of the situation in China's rural areas assesses the effectiveness or otherwise of current policies and puts forward proposals for further development Subjects covered include the changing population profile of rural areas land ownership agricultural improvements and local self government

*The Transformation of Governance in Rural China* An Chen, 2015 Explores the economic social and financial changes that have transformed China's rural governance over the past twenty years

*China's Rural-Urban Inequality in the Countryside* Yan Gao, Shailaja Fennell, 2018-03-15 This book approaches the issue of rural urban inequality through fieldwork conducted in a specific township Zuogang in Qinggang County part of Heilongjiang Province in northeastern China Presenting painstaking fieldwork in a single location it successfully illuminates fundamental aspects of the reality and the complexity of rural urban inequality that cannot be found in macro level studies most of which are prepared by economists The book offers a unique combination of rigorous economic analysis with insightful social and anthropological analysis as well as revealing interviews with local government officials This approach provides a rich tapestry of rural perceptions of rural urban inequality With in depth analysis and empirical evidence on questions concerning the development and root causes of urban rural disparities the book significantly enriches our understanding of the widely discussed issue of rural urban income inequality but from the unique perspective of rural China

**Rural Development in Transitional China** Peter Ho, Jan Jacob Karl Eyferth, Eduard B. Vermeer, 2004 This book offers an authoritative and in depth analysis of the social and economic changes that have swept through the Chinese countryside in the last twenty years

**Dynamics of Local Governance in China During the Reform Era** Tse-Kang Leng, Yun-han Chu, 2010-01-01 Since the Chinese economic reform was realized in the early 1990s a significant revolution has been launched socially economically and politically in China At present China is an indispensable actor in the international arena so that the transitions domestically bring about substantial influence on the whole world Dynamics of Local Governance in China during the Reform takes close look at China's current transformation and its broader implications Through their thought provoking essays the contributors to this volume dissect China's transformation by examining various topics in the field of contemporary China studies such as rural industrialization development of civic society socio economic transformation and local self governance

**Social Protest and Contentious Authoritarianism in China** Xi Chen, 2012 Xi Chen explores the dramatic rise in and routinization of social protests in China since the early 1990s

**The Chinese Communist Party and China's Capitalist Revolution** Lance Gore, 2010-11-08 The Chinese Communist Party and China's Capitalist Revolution examines issues of political change and development in China In the last 30 years China has experienced a profound political transformation and a degree of political progress but these are largely mired in the assumption that the free market is inherently incompatible with communism and the perceived lack of political reforms in China Indeed there has not been much in the sense of

democratization multi party competition freedom of speech and association but as this book demonstrates political development is not limited to these factors Based on extensive empirical investigations of the impact of the market on the communist party with a particular focus on its grassroots organisations this book finds that the Chinese communist party is undergoing profound changes in a host of important areas By analyzing the impact of China s socioeconomic transformation on the CCP and the adaptations of the Party to the new environment the book takes stock of the nature and dynamics of political change underway in China The author concludes that the Chinese communist party we knew no longer exists it is evolving into something quite different which must have political implications for both China and the rest of the world Professor Lance L P Gore is a political scientist specializing in contemporary Chinese politics at The East Asian Institute National University of Singapore

**Modern China** Xiaobing Li,2015-11-23 Providing an indispensable resource for students educators businessmen and officials investigating the transformative experience of modern China this book provides a comprehensive summary of the culture institutions traditions and international relations that have shaped today s China In Modern China author Xiaobing Li offers a resource far beyond a conventional encyclopedia providing not only comprehensive coverage of Chinese civilization and traditions but also addressing the values issues and critical views of China As a result readers will better understand the transformative experience of the most populous country in the world and will grasp the complexity of the progress and problems behind the rise of China to a world superpower in less than 30 years Written by an author who lived in China for three decades this encyclopedia addresses 16 key topics regarding China such as its geography government social classes and ethnicities gender based identities arts media and food each followed by roughly 250 short entries related to each topic All the entries are placed within a broad sociopolitical and socioeconomic contextual framework The format and writing consistency through the book reflects a Chinese perspective and allows students to compare Chinese with Western and American views

How Far Across the River? Nicholas Hope,Dennis Yang,Mu Li,2003-08-13 Gradual change has been a hallmark of the Chinese reform experience and China s success in its sequential approach makes it unique among the former command economies Since 1979 with the inception of the continuing era of reform the Chinese economy has flourished Growth has averaged nine percent a year and China is now a trillion dollar economy China has become a major trading power and the predominant target among developing countries for foreign direct investment Despite all this China remains poor and the reform process unfinished This book takes its defining theme from Deng Xiaopeng s famous metaphor for gradual reform feeling the stones to cross the river How far has China progressed in fording the river The experts who contributed to this volume tackle many aspects of that question assessing Chinese progress in policy reform priorities for further reform and the research still needed to inform policymakers decisions

**China's Longest Campaign** Tyrene White,2006 In the late 1970s just as China was embarking on a sweeping program of post Mao reforms it also launched a one child campaign This text analyses this great social engineering experiment drawing on more than 20 years of

research      **Social Protest in Contemporary China, 2003-2010** Yanqi Tong, Shaohua Lei, 2013-11-12 China's economic transformation has brought with it much social dislocation which in turn has led to much social protest. This book presents a comprehensive analysis of the large scale mass incidents which have taken place in the last decade. The book analyses these incidents systematically discussing their nature, causes and outcomes. It shows the wide range of protests: tax riots, land and labour disputes, disputes within companies including private and foreign companies, environmental protests and ethnic clashes, and shows how the nature of protests has changed over time. The book argues that the protests have been prompted by the socioeconomic transformations of the last decade which have dislocated many individuals and groups whilst also giving society increased autonomy and social freedom enabling many people to become more vocal and active in their confrontations with the state. It suggests that many protests are related to corruption, that is failures by officials to adhere to the high standards which should be expected from benevolent government. It demonstrates how the Chinese state far from being rigid bureaucratic and authoritarian is often sensitive and flexible in its response to protest frequently addressing grievances and learning from its own mistakes and it shows how the multilevel responsibility structure of the Chinese regime has enabled the central government to absorb the shock waves of social protest and continue to enjoy legitimacy.      China's Crisis of Success William H. Overholt, 2018-01-11 China's Crisis of Success provides new perspectives on China's rise to superpower status showing that China has reached a threshold where success has eliminated the conditions that enabled miraculous growth. Continued success requires re-invention of its economy and politics. The old economic strategy based on exports and infrastructure now piles up debt without producing sustainable economic growth and Chinese society now resists the disruptive change that enabled earlier reforms. While China's leadership has produced a strategy for successful economic transition it is struggling to manage the politics of implementing that strategy. After analysing the economics of growth William H. Overholt explores critical social issues of the transition notably inequality, corruption, environmental degradation and globalisation. He argues that Xi Jinping is pursuing the riskiest political strategy of any important national leader. Alternative outcomes include continued impressive growth and political stability, Japanese style stagnation and a major political economic crisis.      **China Review 2000** Chung-Ming Lau, Jianfa Shen, 2000 The showing of sophisticated modern weapons during the fiftieth anniversary of the Chinese Communist Party heralded China's emergence as a great power in the arena of politics. At the same time China was finally admitted to the World Trade Organization after thirteen years negotiation. With its two digit GNP annual growth rate China seemed poised to become the second largest economy in the world. Many analysts argue that China will play an increasingly important role in the future whether in politics or economics. China Review 2000 features a review of overall changes in the political, economic, social and business environments during the past twenty years of reform along with perspectives on major issues confronting the People's Republic in the new millennium.
