**Mobilizing for Development** Kristen E. Looney, 2020-05-15 Mobilizing for Development tackles the question of how countries achieve rural development and offers a new way of thinking about East Asia's political economy that challenges the developmental state paradigm Through a comparison of Taiwan 1950s 1970s South Korea 1950s 1970s and China 1980s 2000s Kristen E Looney shows that different types of development outcomes improvements in agricultural production rural living standards and the village environment were realized to different degrees at different times and in different ways She argues that rural modernization campaigns defined as policies demanding high levels of mobilization to effect dramatic change played a central role in the region and that divergent development outcomes can be attributed to the interplay between campaigns and institutions The analysis departs from common portrayals of the developmental state as wholly technocratic and demonstrates that rural development was not just a byproduct of industrialization Looney's research is based on several years of fieldwork in Asia and makes a

unique contribution by systematically comparing China's development experience with other countries. Relevant to political science, economic history, rural sociology, and Asian Studies, the book enriches our understanding of state-led development and agrarian change.

**Rural Development** United States. President, 1970

**National Parks and Rural Development** Gary E. Machlis, Donald Field, 2000

Protecting land in parks is often seen as coming at the expense of rural economic development. Yet recent events such as the contentious debate over the development of Canyon Forest Village on the south rim of the Grand Canyon suggest just the opposite: healthy natural systems can be enormously valuable to rural economies. *National Parks and Rural Development* offers a thorough examination of the interdependent roles of national parks and the economies of rural communities in the United States. Bringing together the thinking and views of economists, historians, sociologists, recreation researchers, and park managers, the book considers how those roles can be most effectively managed as it offers a wide-ranging review of history and important concepts in rural development and parks management. Five case studies of rural development near national parks identify lessons learned, principles applied, mistakes committed, and advances made. Personal essays from leaders in the parks management field. For each section, the editors offer introductory discussions that provide context and highlight key points. The editors also provide a detailed conclusion which summarizes policy implications and presents specific recommendations for improving rural development and park management policies. Case studies include Cape Cod National Seashore, Alaskan parks and wilderness areas, Yellowstone National Park, the Grand Canyon, and three parks in the Pacific Northwest: Mt. Rainier, Olympic, and North Cascades National Parks.

*National Parks and Rural Development* is a unique synthesis and guide to solving conflicts between the needs of human communities and nature near federal lands. It will be an important work for agency personnel, nongovernmental organizations, and students and scholars of rural economic development, public policy, environmental economics, and related fields.

**Rural Development** Adam Pain, Kjell Hansen, 2019-06-17

*Rural Development* is a textbook that critically examines economic, social, and cultural aspects of rural development efforts both in the global north and in the global south. By consistently using examples from the north and the south, the book highlights similarities of processes as well as differences in contexts. The authors' knowledge of Afghanistan and Sweden respectively creates a core for the discussions, which are complemented with a wide range of other empirical examples. *Rural Development* is divided into nine chapters, each with a thematic focus ranging from concepts and theories through rural livelihoods and natural resources to discussions on policy and processes of change. The book sees rural development as a multi-level, multi-actor, and multi-faceted subject area that needs multidisciplinary perspectives both to support it and to analyse it. Throughout the book, examples of rural development interventions are discussed using analytical concepts such as power, discourse, consequences, and context to grasp rural development as practices that are more than what is presented in policy documents. The book is written in a way that makes it accessible for undergraduates while at the same time caters for the kind of deeper reading used by master students and Ph.D.s. Every chapter is linked to discussion.

**Rural Development Theory and Practice** Ruth McAreavey, 2012 Rural development is inherently viewed as a positive thing it is seen as something that brings together groups of individuals with automatic positive implications and outcomes Policy rhetoric frequently uses popular terms such as involvement participation and power sharing to describe rural development activities However the reality of experience on the ground does not necessarily concur with these ideals It is not always clear who ultimately benefits from rural development the State the community or rural development practitioners This book critically analyses key concepts associated with rural development policy and practice and using the concepts of power and micro politics to analyze rhetoric and reality reveals the intricacies of rural development Challenging popular ideals associated with rural development this book presents the notion of rural development less as a spontaneous all inclusive affair and more as a limited controlled and exclusive process Ultimately it contends that within structures of rural governance a regeneration power elite predominates development and regeneration activities

**Rural Development in Punjab** Autar S. Dhesi, Gurmail Singh, 2020-11-29 For many years agricultural development in Punjab symbolised one of the most successful experiments in rural development However this success story seems to be going astray The crux of the problem this volume suggests is that externally driven modernization to meet national food needs pushed Punjab into highly specialized production of wheat and rice resulting in over utilisation of natural resources with adverse environmental consequences that jeopardizing the long term viability and sustainability of the agrarian economy Stagnating productivity reduced farm size falling household incomes depleting groundwater resources are only a few of the problems that characterise Punjab's agriculture today The book establishes clearly that rural development implies more than transformation of traditional agriculture Apart from ensuring efficient use of limited resources to sustain agricultural production rural policy should encompass promotion of non farm activities investments in social and economic structure and civic amenities
