Rogers, 1988 **Internet and Social Change in Rural Indonesia** Subekti Priyadharma, 2021-09-20 This book is based on an empirical research which explores bottom up development practices initiated and organized by rural communities in the Indonesian periphery by placing communication at its core of analysis The aim is to determine the extent that the Indonesian decentralization policy and the use of internet and other digital Information and Communication Technologies ICTs has affected the theory and practice of development communication as well as changes in relations between the center and the periphery within the context of Indonesian rural development The book takes on periphery perspective in center periphery interactions and relations Hence it belongs to periphery research that has rarely been used in recent decades By using Grounded Theory for its data collection and analysis method the results of this study are grouped into two major thematic categories communication development instead of development communication and communication empowerment Food, Agriculture and Social Change Stephen Sherwood, Alberto Arce, Myriam Paredes, 2017-05-22 In recent years food studies scholarship has tended to focus on a number of increasingly abstract largely unquestioned concepts with regard to how capital markets and states organize and operate This has led to a gulf between public policy and people s realities with food as experienced in homes and on the streets Through grounded case studies in seven Latin American countries this book explores how development and social change in food and agriculture are fundamentally experiential contingent and unpredictable In viewing development in food as a socio political material experience the authors find new objects intersubjectivities and associations These reveal a multiplicity of processes effects and affects largely absent in current academic literature and public policy debates In their attention to the contingency and creativity found in households neighbourhoods and social networks as well as at the borders of human nonhuman experience the book explores how people diversely meet their food needs and passions while confronting the region s most pressing social health and environmental concerns *Rural Development* John Harriss, 2023-08-18 Originally published in 1982 this book provides an important set of basic materials for students of rural development Key papers have been chosen and arranged and the editor has provided a general introduction and passages that link the papers alerting the student to rival theoretical interpretations and to regional parallels and contrasts The book provides a basis for the analysis of the processes that make rural societies and economies what they are and substantially determine the changes that take place within them The papers help the reader to understand the nature of the phenomena with which rural development has to deal and in doing so to begin to evaluate the interventions of agencies and planners

Rural Development Adam Pain, Kjell Hansen, 2019-06-17 *Rural Development* is a textbook that critically examines economic, social and cultural aspects of rural development efforts both in the global north and in the global south. By consistently using examples from the north and the south, the book highlights similarities of processes as well as differences in contexts. The authors' knowledge of Afghanistan and Sweden respectively creates a core for the discussions, which are complemented with a wide range of other empirical examples. *Rural Development* is divided into nine chapters, each with a thematic focus ranging from concepts and theories through rural livelihoods and natural resources to discussions on policy and processes of change. The book sees rural development as a multi-level, multi-actor and multi-faceted subject area that needs multidisciplinary perspectives both to support it and to analyse it. Throughout the book, examples of rural development interventions are discussed using analytical concepts such as power, discourse, consequences and context to grasp rural development as practices that are more than what is presented in policy documents. The book is written in a way that makes it accessible for undergraduates while at the same time caters for the kind of deeper reading used by master students and Ph.D.s. Every chapter is linked to discussion questions as well as suggested further readings and useful websites.
