Picturing Russia's Men Allison Leigh, 2020-09-17 Winner of the Heldt Prize for Best Book in Slavic East European and Eurasian Women's and Gender Studies 2021 There was a discontent among Russian men in the nineteenth century that sometimes did not stem from poverty loss or the threat of war but instead arose from trying to negotiate the paradoxical prescriptions for masculinity which characterized the era Picturing Russia's Men takes a vital new approach to this topic within masculinity and art historical studies by investigating the dissatisfaction that developed from the breakdown in prevailing conceptions of manhood outside of the usual Western European and American contexts By exploring how Russian painters depicted gender norms as they were evolving over the course of the century each chapter shows how

artworks provide unique insight into not only those qualities that were supposed to predominate but actually did in lived practice Drawing on a wide variety of source material including previously untranslated letters journals and contemporary criticism the book explores the deep structures of masculinity to reveal the conflicting desires and aspirations of men in the period In so doing readers are introduced to Russian artists such as Karl Briullov Pavel Fedotov Alexander Ivanov Ivan Kramskoi and Ilya Repin all of whom produced masterpieces of realist art in dialogue with paintings made in Western European artistic centers The result is a more culturally discursive account of art making in the nineteenth century one that challenges some of the enduring myths of masculinity and provides a fresh interpretive history of what constitutes modernism in the history of art

Russia Against Napoleon Dominic Lieven, 2009-10-01 A compulsive page turner a triumph of brilliant storytelling an instant classic that is an awesome remarkable and exuberant achievement Simon Sebag Montefiore Winner of the Wolfson History Prize and shortlisted for the Duff Cooper Prize In the summer of 1812 Napoleon the master of Europe marched into Russia with the largest army ever assembled confident that he would sweep everything before him Yet less than two years later his empire lay in ruins and Russia had triumphed This is the first history to explore in depth Russia's crucial role in the Napoleonic Wars re-creating the epic battle between two empires as never before Dominic Lieven writes with great panache and insight to describe from the Russians viewpoint how they went from retreat defeat and the burning of Moscow to becoming the new liberators of Europe the consequences of which could not have been more important Ultimately this book shows memorably and brilliantly Russia embarking on its strange central role in Europe's existence as both threat and protector a role that continues in all its complexity into our own lifetimes

Abolitions as a Global Experience Hideaki Suzuki, 2015-11-16 The abolition of slavery and similar institutions of servitude was an important global experience of the nineteenth century Considering how tightly bonded into each local society and economy were these institutions why and how did people decide to abolish them This collection of essays examines the ways this globally shared experience appeared and developed Chapters cover a variety of different settings from West Africa to East Asia the Indian Ocean and the Caribbean with close consideration of the British French and Dutch colonial contexts as well as internal developments in Russia and Japan What part of the abolition decision was due to international pressure and what part due to local factors Furthermore this collection does not solely focus on the moment of formal abolition but looks hard at the aftermath of abolition and also at the ways abolition was commemorated and remembered in later years This book complicates the conventional story that global abolition was essentially a British moralizing effort among the three or four perfectly virtuous pages comprised in the history of nations Using comparison and connection this book tells a story of dynamic encounters between local and global contexts of which the local efforts of British abolition campaigns were a part Looking at abolitions as a globally shared experience provides an important perspective not only to the field of slavery and abolition studies but also the field of global or world history

Russian Genre Painting in the Nineteenth Century Rosalind Polly Blakesley, 2000 This book addresses the little studied area of Russian genre painting in the first three quarters of the nineteenth century Rosalind Gray begins by examining artistic patronage and published texts which engaged with the visual arts in order to illustrate the context in which Russian artists were working Five major painters Venetsianov Bryullov Ivanov Fedotov and Perov are then discussed in detail Dr Gray identifies the vital contribution which these artists made to Russian intellectual life as genre painting was appropriated as a medium in the dissemination of popular values and social change At the same time the relationship between Russian and European art is explored The book demonstrates that far from being a self contained movement Russian genre painting instead engaged in a fluid and complex dialogue with the art of the West

Emancipation Peter Kolchin, 2024-09-10 In this

sequel to his landmark study historian Peter Kolchin compares the transition to freedom after American emancipation with the Russian Great Reforms. The two largest transitions from unfree to free labor of the many that occurred in Europe and the Americas during the nineteenth century took place in the United States and in Russia. Both occurred in the 1860s and in both the former slaves and serfs strove to maximize their autonomy and freedom while the former masters worked to preserve as many of their prerogatives as possible. Both were partially but only partially successful. In this magisterial and long awaited work historian Peter Kolchin shows that a more radical break with the past was possible in the United States than in Russia with the Southern freedpeople coming to enjoy republican citizenship whereas Russian peasants remained subjects rather than citizens. Both countries saw conservative reactions triumph in the late nineteenth century. While this conservatism was common in most emancipations it was especially strong in Russia and the American South in part as a reaction against the major efforts to restructure the social order that went by the name of Reconstruction in the United States and the Great Reforms in Russia.

Social Identity in Imperial Russia Elise Kimerling Wirtschafter, 1997-10-01 A broad panoramic view of Russian imperial society from the era of Peter the Great to the revolution of 1917 Wirtschafter's study sets forth a

challenging interpretation of one of the world's most powerful and enduring monarchies. A sophisticated synthesis that combines extensive reading of recent scholarship with archival research, it focuses on the interplay of Russia's key social groups with one another and the state. The result is a highly original history of Russian society that illuminates the relationships between state building, large-scale social structures, and everyday life. Beginning with an overview of imperial Russia's legal and institutional structures, Wirschafter analyzes the ruling classes and service elites: the land-owning nobility, the civil and military servicemen, the clergy, and then examines the middle groups: the *raznochintsy*, the commercial industrial elites, the professionals, the intelligentsia, before turning to the peasants, townspeople, and factory workers. Wirschafter argues that those very social, political, and legal relationships that have long been viewed as sources of conflict and crisis in fact helped to promote integration and foster the stability that ensured imperial Russia's survival.

Journeys to a Graveyard

Derek Offord, 2006-07-01. *Journeys to a Graveyard* examines the descriptions provided by eight Russian writers of journeys made to western European countries between 1697 and 1880. The descriptions reveal the mentality and preoccupations of the Russian social and intellectual elites during this period. The travellers' perceptions of western European countries are treated here as an ambivalent response to a civilization with which Russia was belatedly coming into close contact as a result of the imperial ambition of the Russian state and the westernization of the Russian elites. The travellers perceived the most advanced European countries as superior to Russia in terms of material achievement and the maturity and refinement of their cultures, but they also promoted a view of Russia as in other respects superior to the western nations. Heavily influenced from the late eighteenth century by Romanticism and by the rise of nationalism in the west, they tended to depict European civilization as moribund. By this means they managed to define their own emergent nation in a contrastive way as having youth and promising futurity.

Strategic Changes and Organizational Reorientations in Local Government

Nahum Ben-Elia, 2016-07-27. Global, national, and subnational change—political, economic, social, and demographic—are forcing local governments to search reactively or proactively for alternative organizational patterns and management styles. This book explores different approaches toward local government reorientation in selected Western countries, as well as the reinvention of local government in Eastern Europe. Eight national case studies: U.S., Canada, U.K., Germany, Norway, Israel, the Czech Republic, and Russia provide the empirical basis. From a theoretical point of view, the book exposes three main critical factors: the range of policy options facing local governments; strategic choice; their organizational capabilities to cope with major environmental shifts; strategic capabilities; and their capacity for organizational learning, including programmed experimentation, innovation, and creativity.

James Crossland, 2023-01-31. Punctuated by the stories of a host of interesting and extraordinary characters, Crossland has produced a fascinating exploration of the long nineteenth century's development of terrorism and counterterrorism, highlighting the role of fear and the paranoia, repression, and overreaction it engendered.
