Voskressenski, 2015-03-04 This study incorporates elements from the disciplines of international relations and history to address key international and domestic elements that have shaped the interactions between Russia and China over time It demonstrates how changes in the inter state relationship were and are initiated Controversial issues are examined through previously unobtainable materials from sources including the Archives of Foreign Policy of the Russian Empire the Archives of Foreign Policy of the Russian Federation and the Russian Centre for the Preservation and Research of the Documents of Modern History

**Russia-China Relations in the Post-Crisis International Order** Marcin Kaczmarski, 2015-03-24 The book explores developments in Russia China relations in the aftermath of the global economic crisis arguing that the crisis transformed their bilateral affairs regional liaisons and crucially altered the roles both states play on the international arena Discussing how Russo Chinese cooperation has accelerated in energy trade arms sales and in the Russian Far East the focus is on how the still mutually advantageous relationship has become more asymmetric than ever reflecting China s meteoric rise and Russia s decline These dynamics are explored through three perspectives domestic regional and global Domestically the book traces the role of political coalitions and key interest groups involved in how the two states shape their reciprocal policies Changes in the regional dimension are examined with particular reference to a new status quo emerging in Central Asia The book concludes by explaining how the changing relationship is affecting the international order including the balance of power vis vis the United States as well as Russia and China s changing attitudes towards global governance **The United States and Contemporary China-Russia Relations** Brandon K. Yoder, 2022-04-28 China and Russia have grown progressively closer over the last two decades yielding a China Russia axis uniquely capable of challenging the United States and of revising key aspects of the international order Although the scholarly literature has offered detailed descriptions and various ad hoc explanations of this trend the Sino Russian bilateral relationship has been the subject of very little scrutiny using rigorous theory which has precluded the formation of logically coherent and empirically supported explanations for increasing China Russia cooperation Moreover the cooperative post Cold War trend in the bilateral relationship is puzzling for each of the major paradigms of international relations theory realism constructivism and liberalism This volume brings together leading IR scholars from various theoretical perspectives as well as theoretically informed experts in Chinese and

Russian foreign policy The chapters develop and apply nuanced theoretical arguments to derive testable hypotheses for the cooperative trend in China Russia relations In contrast to existing scholarship the book offers generalizable insights that both improve our understanding of a crucially important contemporary case while also advancing IR theory in substantial ways

*China-Russia Strategic Alignment in International Politics* Alexander Korolev,2022-06-02 Post Cold War China Russia strategic cooperation has displayed significant development and become an increasingly important factor in contemporary international politics However there has been no theory grounded framework and corresponding measurements that would allow an accurate and systematic assessment of the level of China Russia alignment and its progress over time How closely aligned are China and Russia How to define and measure strategic alignments between states This book bridges area studies and International Relations literature to develop a set of objective criteria to measure and explain the development of strategic alignment in post Cold War China Russia relations It establishes that on a range of criteria China Russia alignment is moving towards a full fledged alliance It is solid and comprehensive and continues to show a consistent incremental upward trend There are strong structural incentives for furthering the China Russia alignment and there is little that might hinder the effective functioning of a China Russia alliance The alignment framework developed in the book can be applied to other cases of interstate strategic cooperation to facilitate comparisons between different strategic alignments **IBSS:**

*The Pragmatic Dragon* Eric Hyer, 2015-01-15 China shares borders and asserts vast maritime claims with over a dozen countries and it has had boundary disputes with nearly all of them Yet in the 1960s when tensions were escalating with the Soviet Union India and the United States China moved to conclude boundary agreements with these neighbours peacefully In this wide ranging study of China's boundary disputes and settlements Eric Hyer uncovers a legacy not in keeping with the fearful image of China on the world stage Rather he finds the country's territorial negotiations have been pragmatic and strategic with China demonstrating willingness to compromise and even forgo historical claims in order to establish legitimate boundaries This behaviour in earlier periods is pertinent to the ongoing territorial disputes in the East and South China Seas The Pragmatic Dragon analyzes these disputes and the strategic rationale behind China's behaviour providing important insights into the foreign policy of a nation whose presence on the world stage continues to grow

Voskressenski, 2016-12-16 This book addresses the problem of World Regional Studies and its components regional complexes regional subsystems and global regions With an increasingly complex international system and the emergence of new actors it is clear that the conceptual framing within the classical disciplines of IR Political Theory International Political Economy or Comparative Politics can no longer fully explain a number of processes originating from a tighter and intricate nexus between local regional and global dimensions World Regional Studies explains the emergence of new phenomena in international relations and world politics on a regional and predominantly non Western regional level How do non Western societies react to the transformations of the global order Is a non Western democracy possible Should we discuss the possibilities for the appearance of a non Western IR theory or a new framework for analyzing the westernized global development This study based on decade long research and teaching post in World Regional Studies at MGIMO University and Russian University of Humanitarian Studies RGGU seeks to answer these questions
