Russia Eurasia Facts Figures Annual 21:

Russia & Eurasia Facts & Figures Annual, 2000 *The Russian Armed Forces at the Dawn of the Millennium*, 2000 This anthology is an outgrowth of a conference titled The Russian Armed Forces at the Dawn of the Millennium held at the Collins Center of the Army War College s Center for Strategic Leadership from 7 through 9 February 2000 The genesis for the conference was the realization by several members of the staff of the Collins Center and Army War College faculty that the U S led NATO operation in Kosovo resulted in a significant shift of Russian views on the United States and NATO The conference also complemented our general objective of examining the changing environment in which the United States including its armed forces finds itself The conference brought together over 50 individuals from academia and the policy and intelligence communities to examine the current state of the Russian military Focusing primarily on the socio political dimension of the military but not ignoring the military technical dimension the presentations delivered during the conference looked at Russia s domestic environment the state of the military perceived threats and Russia s capacity to generate responses to those threats DTIC web site **State-building in Russia** Gordon B. Smith, 1999 The challenge of a new democracy the author argues is the creation of effective and authoritative political institutions Focusing on Yeltsin s Russia this book examines this question with reference to democratization national identity legal reform and other issues

Imperial Ends Alexander J. Motyl, 2001-08-01 Despite their historical importance empires have received scant attention from social scientists Now Alexander J Motyl examines the structure dynamics and continuing relevance of empire and asks Why do empires decline Why do some empires collapse And why do some collapsed empires revive Rejecting choice centered theories of imperial decline Motyl maintains that the very structure of empires promotes decay and that decay in turn facilitates the progressive loss of territory Although most major empires have in fact declined in this manner some such as the Soviet Union have collapsed suddenly and comprehensively Motyl explains how and why collapse occurs why such an outcome is hard to foresee and why some collapsed empires revive While broad ranging historically and empirically Imperial Ends focuses on five modern empires the Soviet Romanov Ottoman Habsburg and Wilhelmine Examining the possibility of a revival of the Soviet empire Motyl points out that the expansion of NATO and the European Union along with increasing globalization will isolate Russia and its neighbors promoting their dependence upon one another and perhaps facilitating the rise of the former core With boldly stated conclusions and concise analytical interpretations Imperial Ends cohesively illustrates to policymakers and social scientists alike the importance of possible imperial revivals and the rise of future empires The Politics of Transition in Central Asia and the Caucasus Amanda E Wooden, Christoph H. Stefes, 2009-06-08 Most books on the Caucasus and Central Asia are country by country studies This book on the other hand fills a gap in Central Eurasian studies as one of the few comparative case study books on Central Eurasia covering both the Caucasus and Central Asia it considers key themes right across the two regions highlighting both political change and continuity

Comparative case study chapters written by regional experts from a variety of methodological backgrounds provide historical context and evaluate Soviet political legacies and emerging policy outcomes Key topics include the varied types and sources of authoritarianism political opposition and protest politics predetermined outcomes of post Soviet economic choices social and stability impacts of natural resource wealth variations in educational reform international norm influence on gender policy and the power of human rights activists Overall the book provides a thorough up to date overview of what is increasingly becoming a significant area of concern *Index to American Reference Books Annual* ,1995 *Technology for a Sustainable Future* United States.
