**Renewables** Michael Aklin, Johannes Urpelainen, 2018-03-23 A comprehensive political analysis of the rapid growth in renewable wind and solar power mapping an energy transition through theory case studies and policy Wind and solar are the most dynamic components of the global power sector How did this happen After the 1973 oil crisis the limitations of an energy system based on fossil fuels created an urgent need to experiment with alternatives and some pioneering governments reaped political gains by investing heavily in alternative energy such as wind or solar power Public policy enabled growth over time and economies of scale brought down costs dramatically In this book Michael Aklin and Johannes Urpelainen offer a comprehensive political analysis of the rapid growth in renewable wind and solar power mapping an energy transition through theory case studies and policy analysis Aklin and Urpelainen argue that because the fossil fuel energy system and political support for it are so entrenched only an external shock an abrupt rise in oil prices or a nuclear power accident for example allows renewable energy to grow They analyze the key factors that enable renewable energy to withstand political backlash and they draw on this analysis to

explain and predict the development of renewable energy in different countries over time They examine the pioneering efforts in the United States Germany and Denmark after the 1973 oil crisis and other shocks explain why the United States surrendered its leadership role in renewable energy and trace the recent rapid growth of modern renewables in electricity generation describing among other things the return of wind and solar to the United States Finally they apply the lessons of their analysis to contemporary energy policy issues

**Humanitarian Military Intervention** Taylor B. Seybolt, 2007 Military intervention in a conflict without a reasonable prospect of success is unjustifiable especially when it is done in the name of humanity Couched in the debate on the responsibility to protect civilians from violence and drawing on traditional just war principles the central premise of this book is that humanitarian military intervention can be justified as a policy option only if decision makers can be reasonably sure that intervention will do more good than harm This book asks Have past humanitarian military interventions been successful It defines success as saving lives and sets out a methodology for estimating the number of lives saved by a particular military intervention Analysis of 17 military operations in six conflict areas that were the defining cases of the 1990s northern Iraq after the Gulf War Somalia Bosnia and Herzegovina Rwanda Kosovo and East Timor shows that the majority were successful by this measure In every conflict studied however some military interventions succeeded while others failed raising the question Why have some past interventions been more successful than others This book argues that the central factors determining whether a humanitarian intervention succeeds are the objectives of the intervention and the military strategy employed by the intervening states Four types of humanitarian military intervention are offered helping to deliver emergency aid protecting aid operations saving the victims of violence and defeating the perpetrators of violence The focus on strategy within these four types allows an exploration of the political and military dimensions of humanitarian intervention and highlights the advantages and disadvantages of each of the four types Humanitarian military intervention is controversial Scepticism is always in order about the need to use military force because the consequences can be so dire Yet it has become equally controversial not to intervene when a government subjects its citizens to massive violation of their basic human rights This book recognizes the limits of humanitarian intervention but does not shy away from suggesting how military force can save lives in extreme circumstances
