Białowieża Primeval Forest: Nature and Culture in the Nineteenth Century Tomasz Samojlik, Anastasia Fedotova, Piotr Daszkiewicz, Ian D. Rotherham, 2020-03-30 Understanding the current state and dynamics of any forest is extremely difficult if not impossible without recognizing its history Białowieża Primeval Forest BPF located on the border between Poland and Belarus is one of the best preserved European lowland forests and a subject of myriads of works focusing on countless aspects of its biology ecology management BPF was protected for centuries 15th 18th century as a game reserve of Polish kings and Lithuanian grand dukes Being at that time a part of the Grand Duchy of Lithuania BPF was subject to long lasting traditional multi functional utilisation characteristic for this part of Europe including haymaking on forest meadows traditional bee keeping and fishing in rivers flowing through forest This traditional model of management came to an abrupt end due to political change in 1795 when Poland and Grand Duchy of Lithuania ceased to exist in effect of partitioning by neighbouring countries

and the territory of BPF was taken over by the Russian Empire The new Russian administration influenced by the German trends in forestry attempted at introducing the new science based forestry model in the BPF throughout the 19th century The entire 19th century in the history of BPF is a story of struggle between new trends and concepts brought and implemented by new rulers of the land and the traditional perception of the forest and forest uses culturally rooted in this area and originating from mediaeval or older practices The book will show the historical background and the outcome of this struggle the forest s history in the long 19th century focusing on tracking all cultural imprints both material artificial landscapes introduced alien species human induced processes and immaterial traditional knowledge of forest and use of forest resources the political and cultural significance of the forest that shaped the forest s current state and picture Our book will deliver a picture of a crucial moment in forest history relevant not only to the Central Europe but to the continent in general Moment of transition between a royal hunting ground traditional type of use widespread throughout Europe to a modern managed forest Looking at main obstacles in the management shift the essential difference in perceptions of the forest and goods it provides in both modes of management and the implications of the management change for the state of BPF in the long 19th century could help in better understanding the changes that European forests underwent in general *Nestor Makhno and Rural Anarchism in Ukraine, 1917-1921* Colin Darch,2020 Reveals a little known history of 1917 the Ukrainian anarch communist Makhnovists *Methodology and African Prehistory* Jacqueline Ki-Zerbo,Unesco. A. Barentsen,B. M. Groen,R. Sprenger,1980 Monthly Index of Russian Accessions Library of Congress. Processing Dept,1953 A Little Corner of Freedom Douglas R. Weiner,1999-02-26 While researching Russia s historical efforts to protect nature Douglas Weiner unearthed unexpected findings a trail of documents that raised fundamental questions about the Soviet political system These surprising documents attested to the unlikely survival of a critical minded scientist led movement through the Stalin years and beyond It appeared that within scientific societies alternative visions of land use resrouce exploitation habitat protection and development were sustained and even publicly advocated In sharp contrast to known Soviet practices these scientific societies prided themselves on their traditions of free elections foreign contacts and a

pre revolutionary heritage Weiner portrays nature protection activists not as do or die resisters to the system nor as inoffensive do gooders Rather they took advantage of an unpoliced realm of speech and activity and of the patronage by middle level Soviet officials to struggle for a softer path to development In the process they defended independent social and professional identities in the face of a system that sought to impose official models of behavior ethics and identity for all Written in a lively style this absorbing story tells for the first time how organized participation in nature protection provided an arena for affirming and perpetuating self generated social identities in the USSR and preserving a counterculture whose legacy survives today Soviet Forest Industries Peter Blandon,2019-08-21

Forest industries represent an important segment of the Soviet economy accounting for five percent of the total industrial output and providing essential materials for other key industries This book the first in depth study of Soviet forestry in the English language looks at the organizational planning economic and technological aspects of the industry Mr Blandon first discusses labor force trends and geographical features of the country s forest resources then assesses the forest industry s modernization program He analyzes the past performance of capital investment in the industry and makes projections about the effects of future investments in order to estimate the Soviet Union s future timber output Throughout the book considerable attention is devoted to the Soviet

planning system and its influence on decision making **Models Of Nature** Douglas R. Weiner,2000-08-15 With a new afterword by the author A study of the early and turbulent years of the Soviet conservation movement Focusing on the period from the October Revolution to the mid 1930s from Lenin s rule to the rise of Stalin Douglas R Weiner studies the divergence between the growing ecological movement in the country and the state s social and economic policies The book offers a view of both sides of this dispute scientific conservation movements on the one hand and an industrializing nation s attitude toward science scientists nature and massive development on the other Weiner explains the development of pioneering conservation institutions state practices and ecological theory in the Soviet Union during the 1920s and why those developments were sidelined or quashed by Stalin The book provides a telling example of the social construction of science showing how the perceived political implications of rival ecological theories influenced Soviet scientists and chronicles the nature protection movement s conflicts with both the vigilantes of the Cultural Revolution and Stalin s first Five Year Plan which blatantly ignored potential environmental consequences in its quest to industrialize on a large scale The new afterword reflects upon the study s impact and discusses advances in the field since the book was first published Now in paperback this classic text is well suited for course use in Russian history environmental studies and history of science *The Soviet*
