Russian Armed Forces published in North America during the past ten years A must read for all analysts and professionals following Russian affairs A reliable account of the strong and weak aspects of the Russian Army Provides the first look on what the Russian Ministry of Defense learned from best Western practices and then applied them on Russian soil Ruslan Pukhov Director of the Moscow based Centre for the Analysis of Strategies and Technologies CAST and member of the Public Council of the Russian Federation Ministry of Defense Author of Brothers Armed Military Aspects of the Crisis in Ukraine Russia s New Army and The Tanks of August **International Financial Contagion** Stijn Claessens,Kirsten Forbes,2013-04-17 No sooner had the Asian crisis broken out in 1997 than the witch hunt started With great indignation every Asian economy pointed fingers They were innocent bystanders The fundamental reason for the crisis was this or that most prominently contagion but also the decline in exports of the new commodities high tech goods the steep rise of the dollar speculators etc The prominent question of course is whether contagion could really have been the key factor and if so what are the channels and mechanisms through which it operated in such a powerful manner The question is obvious because until 1997 Asia s economies were generally believed to be immensely successful stable and well managed This question is of great importance not only in understanding just what happened but also in shaping policies In a world of pure contagion i e when innocent bystanders are caught up and trampled by events not of their making and when consequences go far beyond ordinary international shocks countries will need to look for better protective policies in the future In such a world the international financial system will need to change in order to offer better preventive and reactive policy measures to help avoid or at least contain financial crises *Global Waves of Debt* M. Ayhan Kose,Peter Nagle,Franziska Ohnsorge,Naotaka Sugawara,2021-03-04 The global economy has experienced four waves of rapid debt accumulation over the past 50 years The first three debt waves ended with financial crises in many emerging market and developing economies During the current wave which started in 2010 the increase in debt in these economies has already been larger faster and broader based than in the previous three waves Current low interest rates mitigate some of the risks associated with high debt However emerging market and developing economies are also confronted by weak growth prospects mounting vulnerabilities and elevated global risks A menu of policy options is available to reduce the likelihood that the current debt wave will end in crisis and if crises do take place will alleviate their impact **Economic World** ,1917 **The Wild East** Peter Westin,2001 The Wild East will show investors in and observers of Russia how they can hope to negotiate and profit from the turmoil of this uncharted financial frontier **Market World and Chronicle** ,1917 Assisting Russia's Transition Gianni Zanini,2002-01-01 This evaluation assesses the development effectiveness of the World Bank s lending and non lending assistance to the Russian Federation since 1991 a 10 year period of tumultuous political economic and social change This report concludes that an assistance strategy concentrating on analytical and advisory services with limited financial support for Russia would have been more appropriate than one involving large volumes of adjustment lending

European Dept., 2019-08-02 This 2019 Article IV Consultation with Russian Federation discusses that growth is projected at 1.2 percent in 2019 reflecting a weak first quarter estimate lower oil prices and the impact of the higher value added tax rate on private consumption At the same time gross domestic product growth should be supported by an increase in public sector spending in the context of the national projects announced in 2018 Inflation has begun to fall and is expected to return to the 4 percent target by early 2020 The medium term growth outlook remains modest Public infrastructure spending under the national projects together with increase labor supply due to pension reform could have a positive effect on the growth rate of potential output However absent deeper structural reforms long run growth is projected to settle around 1.8 percent It is recommended that it is imperative to enhance competition by facilitating entry exit and reforming public procurement
