**The orange juice business** Marcos Fava Neves,Vinicius Gustavo Trombin,Frederico Fonseca Lopes,Rafael Kalaki,Patrícia Milan,2012-04-07 The orange juice chain is unique probably a sui generis commodity Although several countries produce oranges and juices two regions in the world are the responsible for around 80% of the production These are the states of Sao Paulo in Brazil and Florida in the USA Although the emerging countries are growing in production the juice consumer is also concentrated in the USA and Europe where more than 90% of consumption takes place The characteristics of this chain are so unique that it makes a nice laboratory for academics and business people to exercise strategies since risk is spread Orange is a very sensitive plant and fluctuations in production are notorious The logistics of this chain are fascinating The product travels great distances to reach the consumer in a generally safe and efficient way The industry assets such as vessels and tanks are specific By reading this book business people academics and chain practitioners have an opportunity to understand this chain and can analyse all of its numbers and economics and exercise strategy building This is needed since the orange juice market is a stable market in the world growing only 1% per year and the production costs of this chain are rising fast due to structural changes faced by world food and agribusiness companies i e labour costs energy costs land costs environmental costs and others The book will be of interest to all those concerned with agri food chains An Annotated Catalogue of Types of the University of Illinois Mycological Collections (ILL) University of Illinois (System). *Do Fiscal Rules Cause Better Fiscal Balances? A New Instrumental Variable Strategy* Francesca G Caselli,Julien Reynaud,2019-03-05 This paper estimates the causal effect of fiscal rules on fiscal balances in a panel of 142 countries over the period 1985 2015 Our instrumental variable strategy exploits the geographical diffusion of fiscal rules across countries The intuition is that reforms in neighboring countries may affect the adoption of domestic reforms through peer pressure and imitational effects We find that fiscal rules correlate with lower deficits but the positive link disappears when endogeneity is correctly addressed However when considering an index of fiscal rules design we show that well designed rules have a statistically significant impact on fiscal balances We conduct several robustness tests and show that our results are not

affected by weak instrument problems      **Sixties Europe** Timothy Scott Brown, 2020-08-06 This history of emancipatory left wing politics examines the border crossing uprisings of the 1960s on both sides of the Cold War divide      **A Diary of the Russo-Japanese War**, 1904      *Popular Music, Technology, and the Changing Media Ecosystem* Tamas Tofalvy, Emília Barna, 2020-05-02 This book explores the relationships between popular music technology and the changing media ecosystem More precisely it looks at infrastructures and practices of music making and consuming primarily in the post Napster era of digitization with some chapters looking back on the technological precursors to digital culture marked by the emergence of digital tools and platforms such as YouTube or Spotify The first section provides a critical overview of theories addressing popular music and digital technology while the second section offers an analysis of the relationship between musical cultures taste constructions of authenticity and technology The third section offers case studies on the materialities of music consumption from outside the western core of popular music production The final section reflects on music scenes and the uses and discourses of social media      **The Other Side of Innovation** Vijay Govindarajan, Chris Trimble, 2010-09-02 In their first book *Ten Rules for Strategic Innovators* the authors provided a better model for executing disruptive innovation They laid out a three part plan for launching high risk high reward innovation efforts 1 borrow assets from the existing firms 2 unlearn and unload certain processes and systems that do not serve the new entity and 3 learn and build all new capabilities and skills In their study of the Ten Rules in action Govindarajan and Trimble observed many other kinds of innovation that were less risky but still critical to the company's ongoing success In case after case senior executives expected leaders of innovation initiatives to grapple with forces of resistance namely incentives to keep doing what the company has always done rather than develop new competence and knowledge But where to begin In this book the authors argue that the most successful everyday innovators break down the process into six manageable steps 1 Divide the labor 2 Assemble the dedicated team 3 Manage the partnership 4 Formalize the experiment 5 Break down the hypothesis 6 Seek the truth *The Other Side of Innovation* codifies this staged approach in a variety of contexts It delivers a proven step by step guide to executing launching managing and measuring more modest but necessary innovations within large firms without disrupting their bread and butter business      **Tax Administration and Firm Performance** Ms. Era Dabla-Norris, Florian Misch, Mr. Duncan Cleary, Munawer Khwaja, 2017-04-14 Tax compliance costs tend to be disproportionately higher for small and young businesses This paper examines how the quality of tax administration affects firm performance for a large sample of firms in emerging market and developing economies We construct a novel internationally comparable and multidimensional index of tax administration quality the TAQI using information from the Tax Administration Diagnostic Assessment Tool We show that better tax administration attenuates the productivity gap of small and young firms relative to larger and older firms a result that is robust to controlling for other aspects of tax policy and of economic governance alternative definitions of small and young firms and measures of the quality of tax administration From a policy perspective

we provide evidence that countries can reap growth and productivity dividends from improvements in tax administration that lower compliance costs faced by firms      Leaflets of Philippine Botany ,1914      Do Audits Deter or Provoke Future Tax Noncompliance? Evidence on Self-employed Taxpayers Sebastian Beer,Matthias Kasper,Erich Kirchler,Brian Erard,2019-10-11 This paper employs unique tax administrative data and operational audit information from a sample of approximately 7 500 self employed U S taxpayers to investigate the effects of operational tax audits on future reporting behavior Our estimates indicate that audits can have substantial deterrent or counter deterrent effects Among those taxpayers who receive an additional tax assessment reported taxable income is estimated to be 64% higher in the first year after the audit than it would have been in the absence of the audit In contrast among those taxpayers who do not receive an additional tax assessment reported taxable income is estimated to be approximately 15% lower the year after the audit than it would have been had the audit not taken place Our results suggest that improved targeting of audits towards noncompliant taxpayers would not only yield more direct audit revenue it would also pay dividends in terms of future tax collections
