The Undivine Comedy Teodolinda Barolini,1992-10-30 Accepting Dante s prophetic truth claims on their own terms Teodolinda Barolini proposes a detheologized reading as a global new approach to the Divine Comedy Not aimed at excising theological concerns from Dante this approach instead attempts to break out of the hermeneutic guidelines that Dante structured into his poem and that have resulted in theologized readings whose outcomes have been overdetermined by the poet By detheologizing the reader can emerge from this poet s hall of mirrors and discover the narrative techniques that enabled Dante to forge a true fiction Foregrounding the formal exigencies that Dante masked as ideology Barolini moves from the problems of beginning to those of closure focusing always on the narrative journey Her investigation which treats

such topics as the visionary and the poet the One and the many narrative and time reveals some of the transgressive paths trodden by a master of mimesis some of the ways in which Dante's poetic adventuring is indeed according to his own lights Ulyssean

Water and fire Daniel Anlezark, 2021-06-15 Noah's Flood is one of the Bible's most popular stories and flood myths survive in many cultures today This book presents the first comprehensive examination of the incorporation of the Flood myth into the Anglo Saxon imagination Focusing on literary representations it contributes to our understanding of how Christian Anglo Saxons perceived their place in the cosmos For them history unfolded between the primeval Deluge and a future perhaps imminent flood of fire which would destroy the world This study reveals both an imaginative diversity and shared interpretations of the Flood myth Anglo Saxons

saw the Flood as a climactic event in God's ongoing war with his more rebellious creatures but they also perceived the mystery of redemption through baptism. Anlezark studies a range of texts against their historical background and discusses shifting emphases in the way the Flood was interpreted for diverse audiences. The book concludes with a discussion of Beowulf relating the epic poem's presentation of the Flood myth to that of other Anglo-Saxon texts.

InsurTech: A Legal and Regulatory View Pierpaolo Marano, Kyriaki Noussia, 2019-12-05 This Volume of the AIDA Europe Research Series on Insurance Law and Regulation explores the key trends in InsurTech and the potential legal and regulatory issues that accompany them. There is a proliferation of ideas and concepts within InsurTech that will fundamentally change the market in the next few years. These innovations have the potential to change the way the insurance industry works and alter the relationships between customers and insurers resulting in insurance products that are more closely aligned to individual preferences and priced more appropriately to the risk. Increasing use of technology in the insurance sector is having both a disruptive and transformative impact on areas including product development, distribution, modelling, underwriting and claims and administration practice. The result is a new industry known as InsurTech. But while the insurance market looks to technology for greater efficiency, regulators are beginning to raise concerns about managing potential risks. The first part of the book examines technological innovations relevant for insurance such as FinTech, InsurTech, Sharing Economy and the Internet of Things. The second part then gathers contributions on insurance contract law in a digitalized world while the third part focuses on cyber insurance and robots. Last but not least, the fourth part of the book discusses legal and ethical questions regarding autonomous vehicles and transportation including the shipping industry as well as their impact on the insurance sector and civil liability. Written by legal scholars and practitioners, the book offers international comparative and European perspectives. The Chapters: FinTech, InsurTech and the Regulators by Viktoria Chatzara, Smart Contracts in Insurance: A Law and Futurology Perspective by Angelo Borselli and Room for Compulsory Product Liability Insurance in the European Union for Smart Robots by Aysegul Bugra are available open access under a CC BY 4.0 license at link.springer.com. All three open access chapters were funded by BIPAR.
