Tiedau, 2017-03-28 This collection investigates the culture and history of the Low Countries in the sixteenth and seventeenth centuries from both international and interdisciplinary perspectives The period was one of extraordinary upheaval and change as the combined impact of Renaissance Reformation and Revolt resulted in the radically new conditions political economic and intellectual of the Dutch Republic in its Golden Age While many aspects of this rich and nuanced era have been studied before the emphasis of this volume is on a series of interactions and interrelations between communities and their varying but often cognate languages between different but overlapping spheres of human activity between culture and history The chapters are written by historians linguists bibliographers art historians and literary scholars based in the Netherlands Belgium Great Britain and the United States In continually crossing disciplinary linguistic and national boundaries while keeping the culture and history of the Low Countries in the Renaissance and Golden Age in focus this book opens up new and often surprising perspectives on a region all the more intriguing for the very complexity of its entanglements *Ginza Rba* Majid Fandi Al-Mubarak, Brayan Majid Al-Mubarak, 1998 Nazi Propaganda and the Second World War A. Kallis, 2005-12-16 This book analyzes the factors that determined the organization conduct and output of Nazi propaganda during World War II in an attempt to re assess previously inflated perceptions about the influence of Nazi propaganda and the role of the regime's propagandists in the outcome of the 1939-45 military conflict *The roots of nationalism* Lotte Jensen, 2016-04-15 This collection brings together scholars from a wide range of disciplines to offer perspectives on national identity formation in various European contexts between 1600 and 1815 Contributors challenge the dichotomy between modernists and traditionalists in nationalism studies through an emphasis on continuity rather than ruptures in the shaping of European nations in the period while also offering an overview of current debates in the field and case studies on a number of topics including literature historiography and cartography **Heroines, Harpies, and Housewives** Martha Moffitt Peacock, 2020-11-16 Co Honorable Mention for the 2021 Book Award by the Society for the Study of Early Modern Women and Gender SSEMWG In *Heroines Harpies and Housewives* Martha Moffitt Peacock provides a novel interpretive approach to the artistic practice of Imaging Women of Consequence in the Dutch Golden Age From the beginnings of the new Republic visual celebrations of famous heroines who crossed gender boundaries by fighting in the Revolt against Spain or by distinguishing themselves in arts and letters became an essential and significant cultural tradition that reverberated throughout the long seventeenth century This collective memory of consequential heroines who equaled or outshone men is frequently reflected in empowering representations of other female archetypes authoritative harpies and noble housewives Such enabling imagery helped in the structuring of gender norms that positively advanced a powerful female identity in Dutch society Anne Frank's Tales from the Secret Annexe Anne Frank, 2010 In these tales the reader can observe Anne's writing prowess grow from that of a young girl's into the observations of a perceptive edgy witty and compassionate woman Jacket flaps *Wagner and the Volsungs* Árni Björnsson, 2003 British Politics and the Policy

Process A. G. Jordan, J. J. Richardson, 2024-12-06 In *British Politics and the Policy Process* originally published in 1987 Grant Jordan and Jeremy Richardson provide an introduction to the workings of British political process and a guide to the ways in which it can be studied They show how political decisions are taken and policies are adopted inside Parliament in the political parties and in cabinet and how they are mediated and influenced by for example the civil service and pressure groups In doing so they draw widely on case study material and systematically utilize the memoir material of ex Ministers and civil servants to give a realistic feel for policy making at the centre of British politics This book is however interpretative as well as descriptive The authors argue that Parliament is usually marginal to political decision making and powerfully reject the thesis of adversary politics which holds that British politics undergoes major change when there is a switch in party control of Government This then is a textbook that will serve as an ideal introduction to students of British government and comparative politics but which is also a stimulating and original contribution to current debates in political science

Gaian Economics Jonathan Dawson, Ross Jackson, Helena Norberg-Hodge, 2010 Gaian Economics is the second volume in the Four Keys to Sustainable Communities series and sets out to explore how we can develop healthy and abundant societies in harmony with our finite planetary resources Using contributions from a wealth of authors including Small Is Beautiful's E F Schumacher eco philosopher Joanna Macy and Rob Hopkins of the Transition movement the editors address ways of reducing our consumption to levels that enable natural systems to self regenerate and to do so in ways that permit a high quality of life that we live within our means and that we live well Since the advent of the Scientific Revolution in the sixteenth century humans have stood apart from the rest of nature seeking to manipulate it for their benefit Thus we have learned to refer to the natural world as the environment and to see it in economic terms as little more than a bank of resources to be transformed into products for human use and pleasure This has brought us to the brink of collapse with natural systems straining under the weight of the population and the levels at which we are consuming We are however on the threshold of a shift into a new way of seeing and understanding the world and our place within it called by some the Ecological Age It will be characterized by a new understanding of our place as a thread in the web of life of our interconnectedness with all other living things Gaian Economics offers ways forward toward this Ecological Age giving suggestions for how it may take shape and how it would work The Four Keys represent the four dimensions of sustainable design the Worldview the Social the Ecological and the Economic This series is endorsed by UNESCO and is an official contribution to the UN Decade of Education for Sustainable Development The other books of the series are *Beyond You and Me* *Designing Ecological Habitats* and *The Song of the Earth* The Four Keys to Sustainable Communities series was completed in 2012 and is now available in the U S for the first time
