Rudolf Magnus Physiologist And Pharmacologist 1873-1927:

Rudolf Magnus Otto Magnus, 2002-06-30 Most medical doctors have probably during their studies heard of the Magnus and De Kleijn reflexes and may have been aware of their relation to posture But they know little about their significance and nothing about the man who unravelled the complex physiology of these reflexes and about his work Rudolf Magnus lived from 1873 until 1927 His work on the physiology of posture was initiated during a short period of work with Sherrington in Liverpool in 1908 Though Magnus was also an authority in the field of pharmacology it was particularly his neurophysiological work on posture which made him known worldwide It led to his nomination together with De Kleijn for the Nobel Prize in 1927 Unfortunately he died before the decision was made In this illustrated biography Magnus family background and his student years are described in a lively way Fragments of the diary of his journey to England in 1898 and the description of his scientific career in Heidelberg will enlighten those interested in the history of how science was conducted during his lifetime His lectures on Goethe as a scientist are also included This is followed by Magnus life as Professor of Pharmacology in Utrecht and his studies on animal postures and experimental pharmacology Finally Magnus legacy is described

Cognition and Recognition Leon A. H. Hogenhuis, 2009 This book charts the life and work of the neurophysiologist G G J Rademaker against the background of flourishing early 20th century Dutch clinical research describing the rise and fall of the branch of experimental neurophysiology of which Rademaker was a master **The Foundations of**

Phenomenological Psychotherapy Giampiero Arciero, Guido Bondolfi, Viridiana Mazzola, 2018-05-30 This book addresses selected central questions in phenomenological psychology a discipline that investigates the experience of self that emerges over the course of an individual's life while also outlining a new method the formal indication as a means of accessing personal experience while remaining faithful to its uniqueness In phenomenological psychology the psyche no longer refers to an isolated self that remains unchanged by life's changing situations but is rather a phenomenon ipseity which manifests itself and constantly takes form over the course of a person's unique existence Thus the formal indication allows us to study the way in which ipseity relates to the world in different situations in a way that holds different meanings for different people Based on this new approach phenomenological psychotherapy marks a transition from a mode of grasping the truth about oneself through reflection to a mode of accessing the disclosure of self through a work of self transformation the care of self that requires the person to actually change her position on herself By putting forward this method the authors shed new light on the dynamic interplay between a person's historicity and uniqueness on the one hand and the related physiopathological mechanisms on the other providing evidence from the fields of genetics cardiology the neurosciences and psychiatry The book will appeal to a broad readership from psychiatrists psychologist and psychotherapists to researchers in these fields
