Rudolf Steiners Vision Of Love Spiritual Science And The Logic Of The Heart:

Rudolf Steiner's Vision of Love Bernard Nesfield-Cookson, 2011-03-14 Gathering together references to the logic of the heart from throughout Steiner's work the author encapsulates the great teacher's revelations on the meaning of love and indicates the supreme importance of the greatest of all deeds of love Cover **Rudolf Steiner's Vision of Love** Bernard Nesfield-Cookson, Rudolf Steiner, 1989 **Love and Its Meaning in the World** Rudolf Steiner, 1998-11 Rudolf Steiner received The Fifth Gospel unrecorded events from the so called lost years of the life of Jesus obtained by grace and by spiritual research into the akashic record as a sacred obligation to which he experienced a deep sense of responsibility However he never finished the project of unveiling it Had he done so not only Anthroposophy but also Christianity would have received an enormous spiritual gift a concrete soul filled description of the Mystery of Golgotha His deeply moving and often startling lectures in 1913 are thus fragmentary giving the near tragic impression that because those who heard or read them did not take them up with sufficient seriousness and inner dedication humanity has suffered an inestimable loss Steiner traveled through various German cities to give personal summaries of the Fifth Gospel But in each center he encountered the same sleepiness The thorns were already starting to prick he seemed to begin hiding the content rather than disclosing it He was forced to see in all clarity that the Fifth Gospel was not being appropriately received Andrei Bely In this dramatic book Selg tells the story of those lectures He recounts their background and many of the most important episodes He illumines and gives context to the excerpts with a profound yet accessible commentary Most important he offers insights into their importance to both Steiner and the hearts of those who heard and understood even those who felt inadequate to the task Those who has read Steiner's lectures on the Fifth Gospel and wondered about their significance will find here an inspiring guide to further meditation while those who have not yet read them will find many reasons for doing so and discover a new way of understanding Steiner and his mission Those unfamiliar with Steiner but wish to find a meaningful heartfelt way to Jesus Christ and the Christian mystery will discover a new way of understanding a new path to Christ **The Imagination of Pentecost** Richard Leviton, 1994 Carlo Pietzner speaks out of his own ego directed inner experiences about several motifs inherent to inner striving the problem of self in relationship to the world the disintegration of the three soul forces the transition from sense perception to spiritual perception the reality of evil the condition of loneliness and more **The Rhythm of Space and the Sound of Time** Cynthia Ashperger, 2008-01-01 The Rhythm of Space and the Sound of Time examines the place of Chekhov's Technique in contemporary acting pedagogy and practice Cynthia Ashperger answers the questions What are the reasons behind the technique's current resurgence How has this cohesive and holistic training been brought into today's mainstream acting training What separates this technique from the other currently popular methods Ashperger offers an analysis of the complex philosophical influences that shaped Chekhov's ideas about this psycho physical approach to acting Chekhov's five guiding principles are introduced to demonstrate how eastern ideas and practices have

been integrated into this western technique and how they have continued to develop on both theoretical and practical levels in contemporary pedagogy thereby rendering it intercultural The volume also focuses on the work of several contemporary teachers of the technique associated with Michael Chekhov International Association MICHA Current teacher training is described as well as the different modes of hybridization of Chekhov s technique with other current methods Contemporary practical experiments and some fifty exercises at both beginner and intermediate advanced levels are presented through analysis examples student journals and case studies delineating the sequences in which units are taught and specifying the exercises that differ from those in Chekhov s original writing This book is for practitioners as well as students of the theatre

Global Hive Horst Kornberger,2019-05-16 In a world all too familiar with environmental disasters Horst Kornberger argues that the bee crisis is a more significant problem than deforestation pollution and global warming put together as it points to the causes behind all these Global Hive is a rallying cry for a new understanding of world ecology More than a study of bees this book offers both an entirely new way of thinking about the bee crisis and its causes and a way to use the crisis to explore wider social and ecological issues Kornberger challenges the dominant scientific worldview that reduces everything to minute detail and fails to see the larger holistic picture He argues that we urgently need to start thinking about ecology in a different way by developing a new science which draws on empathy and imagination if we want to mend our relationship with the natural world From this perspective the worldwide threat of the bee crisis becomes a starting point for global change Global Hive is a thought provoking treatise on what colony collapse teaches us about our society our choices and how we can build a more sustainable world

The Riddle in the Mirror Jayni Bloch,2012-10-25 The Riddle In the Mirror is a personal account of a healing journey through experiencing the conflicting Apartheid era in South Africa during the authors childhood The difficulties she experienced challenged a deeper insight into spiritual awareness that supported her path in search for healing This story is everyones story as we all experience difficulties that challenge us to evolve The Riddle in the Mirror is an essential map on our healing journey It shifts our focus from struggling with repetitive behaviour patterns that keep wounds alive in us and our children towards psychological and spiritual growth instead It connects the processes of healing to archetypal principles that illustrate how our personal healing contributes to the healing of humanity We identify our life challenges as healing opportunities by looking at life as a mirror that reflects a spiritual truth recognizable beneath our socially conditioned secular interpretations and assumptions of experiences We recognize how our personal story relates to our cultural and ancestral stories as a metaphor for collective healing of the whole world through our personal participation by waking up to our own spiritual consciousness

Yeshayahu (Jesaiah) Ben-Aharon, 2025-05-05 On the eve of the 33rd anniversary of its publication *The Spiritual Event of the Twentieth Century* remains an exceptional work On the one hand the author offers a pioneering first hand testimony of Rudolf Steiner's prophetic statements regarding the new Christ Revelation On the other he presents his own findings based on imaginative consciousness of the Spiritual Event of the Twentieth Century Ben Aharon gives a unique account of events that took place in the spiritual world during the fateful twelve year period from 1933 to 1945 encompassing the rise to power of National Socialism and culminating in the end of the Second World War Through coming to a fully conscious understanding of this Spiritual Event we can gain the courage needed to renew and enliven the spiritual science of anthroposophy as the universal human language of our age In addition to his description of the Century's Event the author discusses *The New Soul Faculties* *The Relation Between Supersensible and Physical Events* *The Rebirth of Anthroposophy since the End of the Twentieth Century* and *Anthroposophy as the Living Language of the Present* His words have a particular significance for the grouping of souls which the spiritual scientist Rudolf Steiner referred to as the Michael School This third edition features a thoroughly revised and extended Preface Introduction and auxiliary chapters updated out of the signs of the present time

Illusion of Separation Giles Hutchins, 2014-10-06 Our modern patterns of thinking and learning are all based on observing a world of things which we think of as separate building blocks This worldview allows us to count and measure objects without their having any innate value it provides neat definitions and a sense of control over life However this approach also sets humans apart from each other and from nature In reality in nature everything is connected in a fluid dynamic way Separateness is an illusion we have created and is fast becoming a dangerous delusion infecting how we relate to business politics and other key areas of our daily reality Giles Hutchins argues that the source of our current social economic and environmental issues springs from the misguided way we see and construct our world With its roots in ancient wisdom this insightful book sets out an accessible easy to follow exploration of the causes of our current crises offering ways to rectify these issues at source and then pointing to a way ahead

Rudolf Steiner, 1996-05 18 lectures in Dornach January 9 February 22 1920 CW 196 In the vast range of Rudolf Steiner's lectures jewels of all kinds lie hidden in plain sight awaiting only our discovery of them Such lectures contain a kind of wisdom not found anywhere else And sometimes as in *What Is Necessary in These Urgent Times* they also have a translucency and conviction that makes them transformational In early 1920 political economic social and spiritual chaos was everywhere The old world had fallen apart and would need to be rebuilt Anthroposophy too had to be remade Recognizing this Rudolf Steiner tirelessly working for the threefold social order establishing the first Waldorf school helping to create businesses and addressing the talented educated and idealistic young people who were beginning to turn toward Anthroposophy for answers In these lectures Steiner speaks in the new direct Michaelic way seeking the path to a new way

of doing Anthroposophy Throughout the critical situation of the time he never lost his sense of humor or his compassion and equilibrium His tone is warm relaxed and intimate Rather than following a strictly predetermined path he speaks directly from the heart about what concerned him He stresses that the task of spiritual science is to awaken us to reality and to a true understanding of life that sees through illusions and understands the ever present potential of evil Speaking both esoterically and exoterically he returns repeatedly to the importance of community of meeting one another face to face heart to heart as individuals Thus rather than seeking power and control we are called to cultivate trust and receptivity This takes a spiritual transformation We must learn to live this present life in the context of our greater spiritual life which extends from before birth through earthly life and into the life after death that precedes our next birth At the same time we must come to know the Christ who is to be met only in community Selfishness egotism has no part in the new way When someone is alone Christ is not there You cannot find Christ without first feeling a connection to humanity as a whole You must seek Christ on the path that connects you with all humankind To be connected only with your own inner experiences leads you away from Christ Steiner deals with many other important themes as well including imperialism the initiate behind Shakespeare Bacon and James I makers of our modern age and well as fascinating initiatory remarks on reincarnation esoteric physiology and psychology Running throughout the talks is the earnest admonition to be true to the spirit and the call to come to our senses and not fall prey to self pity Now as it was then the world needs us to be awake spiritually and we need the world to be awake spiritually There is nowhere to hide What Is Necessary in These Urgent Times is a translation from German of Geistige und soziale Wandlungen in der Menschheitsentwicklung GA 196
