Rudolf Magnus; Physiologist and Pharmacologist (1873–1927): A Biography

by Otto Magnus

Royal Netherlands Academy of Arts and Sciences, 2001. \$7.00 (xii + 350 pages) ISBN 90 6984 327 7

In August 1898, the world's physiologists gathered in Cambridge for their fourth International Congress. Everyone who was anyone in the physiological world was there – a total of 218 people 'including several women' according to the official historian of the Congress. Attending his first Congress was a young German physician, Rudolf Magnus, enjoying a foreign summer holiday before starting research work in pharmacology. He recorded the events, both scientific and social, in his diary. Amongst the notables he saw getting honorary degrees were the neurohistologist, Camillo Golgi; the founder of the *Stazione Zoologica* Naples, Anton Dohrn; and the embryologist Ernst Haeckel. Of the scientific demonstrations, he particularly admired the elegant experiments of John Langley, Charles Sherrington, William Bayliss and Ernest Starling, noting 'we can learn a lot in this respect from the English'. Returning to Heidelberg, where he remained for a further ten years, he started several research programmes on the interaction between drugs and basic physiological mechanisms, frequently spending holiday periods collaborating with overseas colleagues, including Schäfer in Edinburgh, Langley in Cambridge, Sherrington in Liverpool and von Döbelin in Naples. In 1908, he was made the founding professor of pharmacology at Utrecht where one of his major institutional achievements was the creation of a new Pharmacological Laboratory, largely funded by the Rockefeller Foundation. Despite offers of prestigious

chairs elsewhere (Halle in 1915, Göttingen 1924 and Heidelberg circa 1925) he remained in Utrecht (apart from being called up as a medical officer in the German Army during the Great War) until his premature death at the age of 53 in 1927, with the possibility of a Nobel Prize in view.

Rudolf Magnus was an important participant in, and witness of, the transition of physiology from its position as a largely descriptive handmaiden to anatomy, to a dynamic, experimental, professional and international science. The discipline was new and small enough for him to have known all the key figures for nearly 30 years. His scientific contributions were immense and diverse: reflex activities of the nervous system of a miscellany of animals, both vertebrate and invertebrate; and an extensive range of pharmacological studies of the autonomic nervous system and viscera, the majority published in German. Thus, a scholarly biography, situating him firmly in time and place, analysing his work as an experimentalist, teacher and administrator, and assessing his roles and impact on the development of experimental physiology and the emergence of pharmacology, would be most welcome. Unfortunately this is not that biography. Compiled by his son, with obvious respect, affection and admiration, the volume comprises selected entries from Magnus' diaries and family papers, including reminiscences and genealogical tables of Magnus' grand- and great grandparents, and reviews of some of Magnus' key papers. There are some irritating spelling and chronological mistakes, far too few explanatory footnotes, and no general bibliography to guide the reader to contemporary or historical material that would elucidate or extend the main text. Indeed, there are really two incomplete books here – the personal material reveals a little of Magnus the man, a little of his work, a little of the world in which he lived, and a little of the family from whence he came – all now fleshing out, and could provide a fascinating account of the social and professional lives of middle class Jewish families in 19th century Germany. The second theme running through the book is an attempt to look more closely at his work; this is done by summarizing a selection of his publications, some with contemporary comments made by Magnus himself in his diary, and

others with retrospective remarks added by his son. The summaries of literature no longer readily accessible are useful, but the paucity of analysis and commentary is a serious deficiency. A third section, not quite a theme, but occupying one-seventh of the book, is Magnus' book on Goethe. The relevance of Goethe's scientific work to, and impact on, Magnus is assumed and not assessed, and there is no indication of the overlap of this section with Nordon's 1949 English translation of the work. This is a disappointing volume, and Magnus deserves better. One has to wonder whether a professional biographer or historian would have been able to make better use of this material.

Those who view the American scene from afar must find the never-ending 'creationist' controversy in the US difficult to fathom. The label 'creationist' was long ago attached by the US media to those who rejected Darwin's theory of evolution in favor of a literal reading of the account of origins given in the *Book of Genesis*. Since all three of the Abrahamic faiths profess belief in a creator, the label has proved to be a seriously misleading one. Still, it has stuck. And over the years, it came to cover somewhat more generally not only those who drew inspiration for their attack on neo-darwinism more or less directly from *Genesis*, but also those who are willing to go some way with Darwin but insist that the

Sinds haar ontstaan in de twaalfde eeuw is de universiteit een internationale aangelegenheid geweest. Op zoek naar kennis en inzicht trokken zowel studenten als geleerden over de grens. In de negentiende en de twintigste eeuw kreeg dit verschijnsel echter bijzondere trekken omdat er een spanningsveld ontstond tussen het nationalisme en deze internationalistische ondertoon van het universitaire bedrijf. In deze bundel blijkt dat internationalisering vele gezichten heeft: van studenten op zoek naar leermeesters, collega onderzoekers die elkaar in het laboratorium opzoeken, politieke vluchtelingen die hun talent elders willen ontplooiën, invloed van wetenschappelijke theorieën en wetenschappelijke thema's die alleen maar in internationaal verband onderzocht kunnen worden tot een regelrechte braindrain.
