Architecture of the Well-Tempered Environment Reyner Banham, 1984-12-15 Reyner Banham was a pioneer in arguing that technology human needs and environmental concerns must be considered an integral part of architecture No historian before him had so systematically explored the impact of environmental engineering on the design of buildings and on the minds of architects In this revision of his classic work Banham has added considerable new material on the use of energy particularly solar energy in human environments Included in the new material are discussions of Indian pueblos and solar architecture the Centre Pompidou and other high tech buildings and the environmental wisdom of many current architectural vernaculars The Other Modern Movement Kenneth Frampton, 2022-01-25 A revealing new look at modernist architecture emphasizing its diversity complexity and broad inventiveness Usually associated with Mies and Le Corbusier the Modern Movement was instrumental in advancing new technologies of construction in architecture including the use of glass

steel and reinforced concrete. Renowned historian Kenneth Frampton offers a bold look at this crucial period focusing on architects less commonly associated with the movement in order to reveal the breadth and complexity of architectural modernism. *The Other Modern Movement* profiles nineteen architects each of whom consciously contributed to the evolution of a new architectural typology through a key work realized between 1922 and 1962. Frampton's account offers new insights into iconic buildings like Eileen Gray's E 1027 House in France and Richard Neutra's Kaufmann House in Palm Springs, California, as well as lesser-known works such as Antonin Raymond's Tokyo Golf Club and Alejandro de la Sota's Maravillas School Gymnasium in Madrid. Foregrounding the ways that these diverse projects employed progressive models, advanced new methods in construction techniques, and displayed a new sociocultural awareness, Frampton shines a light on the rich legacy of the Modern Movement and the enduring potential of the unfinished modernist project.
