**On Frank Lloyd Wright's Concrete Adobe** Donald Leslie Johnson, 2016-12-05 During the years 1919 into 1925 Frank Lloyd Wright worked on four houses and a kindergarten located in metropolitan Los Angeles using concrete blocks as the main building material. The construction system has been described by Wright and others as uniquely molded woven like a textile fabric and perceived as ground breaking truly modern unprecedented. Many have attempted to uphold these claims while some thought the house designs borrowed from old exotic buildings. For the first time this book brings together Wright's declarations, the support of upholders and inferences in order to determine their accuracy and correctness or the possibility of feigned or fictional stories. It examines technical developments of concrete blocks by Wright and others before his experiences in Los Angeles began in 1919. It also studies the manner of Wright's design process by an examination of relevant pictorial and textual documents. A unique in depth and critical analysis of the houses is set within historical biographical and theoretical contexts. Consequently the book explains the impact upon Wright of California contemporaries architects Irving Gill and Rudolph Schindler and their instrumentally profound role upon the course of modernism 1907-1923. In doing so it allows a full appreciation of Wright's Gill's and Schindler's buildings beyond their experiential qualities. *The Architecture of R.M. Schindler* Rudolph M. Schindler, Elizabeth A.T. Smith, Michael Darling, 2001-02 The most comprehensive volume on one of the most innovative architects of the 20th century. Contains many never published drawings, photographs. Schindler, 1997 Rudolph Schindler created radical and intensely personal architectural concepts resulting in some of the seminal works of the 20th century. This elegant and timely re-release of Gebhard's 1971 book honors both architect and author. Now featuring 16 additional full color illustrations. Schindler, Kings Road, and Southern California Modernism Robert Sweeney, Judith Sheine, 2012-10-30 This book establishes R.M. Schindler's Kings Road House amongst the icons of modernist housing as crucial as Le Corbusier, Walter Gropius, Mies van der Rohe or Frank Lloyd Wright to the story of twentieth century residential design. Weaving together an impressive blend of primary sources, Sweeney and Sheine illuminate heretofore unknown or neglected stories regarding Schindler's life, his relationship with his mentors, most notably Wright himself and the development of his unique theories about space. These essays will interest both scholars and practitioners of architecture as well as readers wishing to learn more about the development of architectural modernism in general. J. Philip Gruen, School of Design and Construction, Washington State University. *Schindler* David Gebhard, 1972 Rudolph Schindler created radical and intensely personal architectural concepts resulting in some of the seminal works of the 20th century.
