Tycho with his sharpest of eyes and his luxurious practice of total astronomy The two epochal advances published in 1609 both born through planetary observation namely Kepler s discovery of the true nature of the orbit of Mars and Harriot and Galileo s observations of the Moon have a pivotal place in this account Sheehan weaves a rich tapestry of social and technological settings patronage and personalities equipment and skills cosmologies and goals motives and compulsions to try to explain why we have observed and continue to observe the planets The compelling text of A Passion for the Planets is enhanced by the specially commissioned planetary artwork of Julian Baum himself son of a noted planetary observer and historian of planetary observers and Randall Rosenfeld A Passion for the Planets will be of interest to all amateur astronomers active planetary observers armchair astronomers those interested in the history of astronomy the cultural history of science and astronomical art
