Conflict, Bargaining, and Kinship Networks in Medieval Eastern Europe Christian Raffensperger, 2018-04-26 Conflict Bargaining and Kinship Networks in Medieval Eastern Europe takes the familiar view of Eastern Europe families and conflicts and stands it on its head Instead of a world rife with civil war and killing this book presents a relatively structured environment where conflict is engaged in for the purposes of advancing one s position and where death among the royal families is relatively rare At the heart of this analysis is the use of situational kinship networks relationships created by elites for the purposes of engaging in conflict with their own kin but only for the duration of a particular conflict A new image of medieval Eastern Europe less consumed by civil war and mass death will change the perception of medieval Eastern Europe in the minds of readers This new perception is essential to not only present the past more accurately but also to allow for medieval Eastern Europe s integration into the larger medieval world as something other than an aberrant other

Conquest and Christianization Ingrid Rembold, 2018 Re evaluates the political integration and Christianization of Saxony following its violent conquest 772 804 by Charlemagne Topographies of Power in the Early Middle Ages Mayke de Jong, Frans Theuvs, 2001-06-28 The 19 papers presented in this volume by North American and European historians and archaeologists discuss how early medieval political and religious elites constructed places of power and how such places in turn created powerful people They also examine how the high level power exercised by elites was transformed in the post

Roman kingdoms of Europe as Roman cities gave way as central stages for rituals of power to a multitude of places and spaces where political and religious power were represented Although the Frankish kingdoms receive a large share of attention contributions also focus on the changing topography of power in the old centres of the Roman world Rome and Constantinople to what centres of power may have meant in the steppes of Inner Asia Scandinavia or the lower Vistula where political power was even more mobile and decentralised than in the post Roman kingdoms as well as to monasteries and their integration into early medieval topographies of power

Medieval Politics and Modern Mentalities Timothy Reuter,2006-11-02 This is a collection of influential and challenging essays by British medievalist Timothy Reuter a perceptive and original thinker with extraordinary range who was equally at home in the Anglophone or German scholarly worlds The book addresses three interconnected themes in the study of the history of the early and high Middle Ages Firstly historiography the development of the modern study of the medieval past How do our contemporary and inherited preconceptions and pre occupations determine our view of history Secondly the importance of symbolic action and communication in the politics and polities of the Middle Ages Finally the need to avoid anachronism in our consideration of medieval politics Throwing light both on modern mentalities and on the values and conduct of medieval people themselves and containing articles at time of publication never previously been available in English this book is essential reading for any serious scholar of medieval Europe

The Birth of the West Paul Collins,2013-02-12 The tenth century dawned in violence and disorder Charlemagne s empire was in ruins most of Spain had been claimed by Moorish invaders and even the papacy in Rome was embroiled in petty provincial conflicts To many historians it was a prime example of the ignorance and uncertainty of the Dark Ages Yet according to historian Paul Collins the story of the tenth century is the story of our culture s birth of the emergence of our civilization into the light of day *The Birth of the West* tells the story of a transformation from chaos to order exploring the alien landscape of Europe in transition It is a fascinating narrative that thoroughly renovates older conceptions of feudalism and what medieval life was actually like The result is a wholly new vision of how civilization sprang from the unlikelyst of origins and proof that our tenth century ancestors are not as remote as we might think

Feudal Society Marc Bloch,2002-11 *Feudal Society* discusses the social and economic conditions in which feudalism developed providing a deep understanding of the processes at work in medieval Europe

Feudal Society

Marc Bloch, 2014-04-16 Marc Bloch said that his goal in writing *Feudal Society* was to go beyond the technical study a medievalist would typically write and dismantle a social structure In this outstanding and monumental work which has introduced generations of students and historians to the feudal period Bloch treats feudalism as living breathing force in Western Europe from the ninth to the thirteenth century At its heart lies a magisterial account of relations of lord and vassal and the origins of the nature of the fief brought to life through compelling accounts of the nobility knighthood and chivalry family relations political and legal institutions and the church For Bloch history was a process of constant movement and evolution and he describes throughout the slow process by which feudal societies turned into what would become nation states A tour de force of historical writing *Feudal Society* is essential reading for anyone interested in both Western Europe s past and present With a new foreword by Geoffrey Koziol

The Medieval Empire in Central Europe Herbert Schutz, 2010-02-19 This book offers a concise yet detailed political history of medieval Central Europe as it traces the history of the Medieval Empire from its inception as a kingdom during the early 10th century to its formation as Roman Empire its support of the papacy its struggle with the papacy for supremacy the shift of its centre of gravity to Italy and its demise into particularist parts by the middle of the 13th century It surveys the three dynasties which ruled the Post Carolingian Empire and follows the political emergence of a disjointed region through its crystallization into an independent kingdom to become by the year 1000 the strongest military and political power in Europe ultimately called upon to stabilize the political unrest in Italy As Roman emperors the kings ordered the affairs of the city of Rome and bolstered the spiritual and political position of the popes until several competent popes turned the papal dependency into its primacy and enforced the subordination of the secular authorities The Crusades helped to play great military and political power into papal hands so that the secular authority declined as the monarchy lost interest in Germany and became focused on Italy and especially on Sicily

Unpredictability and Presence Hans Jacob Orning, 2008-05-31 This book inspired by historians like Fredric Cheyette Stephen White and William Miller applies a legal anthropological framework to Norwegian history At the same time it focuses on what happens when pre state conflict patterns encounters a more stable royal power in the high middle ages The author demonstrates how in the 12th and 13th century the king under strong clerical influence is depicted as just and omnipresent However a detailed survey of the king s conflicts shows that he to a substantial degree based his dominion on unpredictability and presence The results presented in this book will certainly be discussed but few will disagree that it formulates the question of state formation in a new and challenging way In addition it clearly demonstrates the relevance of studying Scandinavian history as part of European history

Authority in Byzantine Provincial Society, 950-1100 Leonora Neville, 2004-08-19 The imperial government over the central provinces of the Byzantine Empire was sovereign and at the same time apathetic dealing effectively with a narrow set of objectives chiefly collecting revenue and maintaining imperial sovereignty Outside of these spheres action needed to be solicited from imperial officials leaving vast opportunities for local

people to act independently without legal stricture or fear of imperial involvement In the absence of imperial intervention provincial households competed with each other for control over community decisions The emperors exercised just enough strength at the right times to prevent the leaders of important households in the core provinces from becoming rulers themselves Membership in a successful household wealth capacity for effective violence and access to the imperial court were key factors that allowed one to act with authority This book examines in detail the mechanisms provincial households used to acquire and dispute authority *A Companion to the Medieval World* Carol Lansing, Edward D. English, 2012-12-26 Drawing on the expertise of 26 distinguished scholars this important volume covers the major issues in the study of medieval Europe highlighting the significant impact the time period had on cultural forms and institutions central to European identity Examines changing approaches to the study of medieval Europe its periodization and central themes Includes coverage of important questions such as identity and the self sexuality and gender emotionality and ethnicity as well as more traditional topics such as economic and demographic expansion kingship and the rise of the West Explores Europe's understanding of the wider world to place the study of the medieval society in a global context **Reform and the papacy in the eleventh century** Kathleen G. Cushing, 2020-01-03 This book explores the relationship between the papacy and reform against the backdrop of social and religious change in later tenth and eleventh century Europe Placing this relationship in the context of the debate about transformation it reverses the recent trend among historians to emphasise the reform developments in the localities at the expense of those being undertaken in Rome It focuses on how the papacy took an increasingly active part in shaping the direction of both its own reform and that of society whose reform became an essential part of realising its objective of a free and independent Church It also addresses the role of the Latin Church in western Europe around the year 1000 the historiography of reform the significance of the Peace of God as a reformist movement the development of the papacy in the eleventh century the changing attitudes towards simony clerical marriage and lay investiture reformist rhetoric aimed at the clergy and how reformist writings sought to change the behaviour and expectations of the aristocracy Summarising current literature while presenting a cogent and nuanced argument about the complex nature and development of reform this book will be invaluable for an undergraduate and specialist audience alike Europe in the High Middle Ages William Chester Jordan, 2002-08-01 The most accessible up to date introduction to its subject does full justice to the multifarious forces at work in high gothic Europe Daily Telegraph The years from AD 1000 to the beginning of the fourteenth century were the most formative period in European history a time of intense social political cultural and religious change In this definitive work one of the world's leading medievalists explores a confident dynamic age far removed from our own Jordan writes elegantly and ironically giving the reader a broad but not dumbed down view of medieval society and its complexities A splendid start to Penguin's History of Europe series and a first rate work in its own right Kirkus Reviews The Penguin History of Europe series is one of contemporary publishing's great projects New Statesman **A History of**

Barbarian Queens and the Conversion of Europe Burnam W. Reynolds, 2024-11-19 The role of Christian queens in the conversion to Christianity of their pagan husbands has often been ignored when studying the origins of European culture This study evaluates the contributions of these queens to the establishment of a trans national connective that formed the basis for an identifiable European culture
