## **Ruling Passions A Theory Of Practical Reasoning:**

Ruling Passions Simon Blackburn,1998 Simon Blackburn puts forward a compelling original philosophy of human motivation and morality He maintains that we cannot get clear about ethics until we get clear about human nature So these are the sorts of questions he addresses Why do we behave as we do Can we improve Is our ethics at war with our passions or is it an upshot of those passions Blackburn seeks the answers in an exploration of guilt shame disgust and other moral emotions he draws also on game theory and cognitive science in his account of the structures of human motivation Many philosophers have wanted a naturalistic ethics a theory that integrates our understanding of human morality with the rest of our understanding of the world we live in What is special about Blackburn's naturalistic ethics is that it does not debunk the ethical by reducing it to thenon ethical At the same time he banishes the spectres of scepticism and relativism that have haunted recent moral philosophy Ruling Passions sets ethics in the context of human nature it offers a solution to the puzzle of how ethics can maintain its authority even though it is rooted in thevery emotions and motivations that it exists to control

**Ruling Passions** Simon Blackburn,2023 Written in a trenchant style Ruling Passions propounds an original philosophy of human motivation and morality It uses game theory and cognitive science to illuminate ethics and exposes the pretensions of rival theories

**Passions and Projections** Robert Neal Johnson,Michael Smith,2015 This volume presents fourteen original essays which explore the philosophy of Simon Blackburn and his lifetime pursuit of a distinctive projectivist and anti realist research program The essays document the range and influence of Blackburn's work and reveal among other things the resourcefulness of his brand of philosophical pragmatism

**Being Realistic about Reasons** T. M. Scanlon,2014 Is what we have reason to do a matter of fact If so what kind of truth is involved how can we know it and how do reasons motivate and explain action In this concise and lucid book T M Scanlon offers answers with a qualified defence of normative cognitivism the view that there are normative truths about reasons for action

Collective Rationality and Collective Reasoning Christopher McMahon,2001-08-06 This book examines the issue of rational cooperation especially cooperation between people with conflicting moral commitments The first part considers how the two main aspects of cooperation the choice by a group of a particular cooperative scheme and the decision by each member to contribute to that scheme can be understood as guided by reason The second part explores how the activity of reasoning itself can take a cooperative form The book is distinctive in offering an account of what people can accomplish by reasoning together of the role of deliberation in democratic decision making and of the negotiation of the proper use of concepts Presenting for the first time a detailed analysis of the general problem of cooperation and collective reasoning between people with different moral commitments this book will be of particular interest to philosophers of the social sciences and to students in political science sociology and economics Cambridge Press

Practical Tortoise Raising Simon Blackburn,2010-09-30 Simon Blackburn presents a selection of his philosophical essays from 1995 to 2010 He offers engaging and illuminating discussions of a wide range of

topics including moral philosophy the theory of meaning pragmatism and the theory of reason and reasoning     *Spreading the Word* Simon Blackburn,1984     **Incommensurability and its Implications for Practical Reasoning, Ethics and Justice** Martijn Boot,2017-06-27 This highly original book sheds new light on aspects of incommensurability of values and its implications for ethics and justice It provides original and innovative analysis of the characteristics of incommensurability in relation to values and explores the implications of incommensurability for ethics justice and public decision making     *After Virtue* Alasdair C. MacIntyre,2013-03-25 In this landmark work MacIntyre returns to the Virtue based ethics of Aristotle in answer to the crisis of moral language caused by the Enlightenment     *Emotional Reason* Bennett W. Helm,2007-08-16 How can we motivate ourselves to do what we think we ought How can we deliberate about personal values and priorities Bennett Helm rejects the standard philosophical answers to these questions which presuppose a sharp distinction between cognition and impulse and develops a detailed alternative theory both of emotions desires and evaluative judgments and of their rational interconnections The result is an innovative theory of practical rationality and how we can control not only what we do but also what we value and who we are as persons     *Aristotle's Ethics and Medieval Philosophy* Anthony Celano,2015-12-03 Aristotle s Nicomachean Ethics had a profound influence on generations of later philosophers not only in the ancient era but also in the medieval period and beyond In this book Anthony Celano explores how medieval authors recast Aristotle s Ethics according to their own moral ideals He argues that the moral standard for the Ethics is a human one which is based upon the ethical tradition and the best practices of a given society In the Middle Ages this human standard was replaced by one that is universally applicable since its foundation is eternal immutable divine law Celano resolves the conflicting accounts of happiness in Aristotle s Nicomachean Ethics demonstrates the importance of the virtue of phronesis practical wisdom and shows how the medieval view of moral reasoning alters Aristotle s concept of moral wisdom

**Making Moral Sense** Logi Gunnarsson,2000-09-18 Is it rational to be moral Can moral disputes be settled rationally Which criteria determine what we have a good reason to do In this innovative book Logi Gunnarsson takes issue with the assumption made by many philosophers faced with the problem of reconciling moral norms with a scientific world view namely that morality must be offered a non moral justification based on a formal concept of rationality He argues that the criteria for the rationality of an action are irreducibly substantive rather than purely formal and that assuming that morality must be given a non moral justification amounts to a distortion of both rationality and morality His discussion includes substantial critical engagement with major thinkers from two very different philosophical traditions and is notable for its clear and succinct account of Habermas discourse ethics It will appeal to anyone interested in practical reason and the rational credentials of morality     *Feeling Like It* Tamar Schapiro,2021-02-18 Feeling like doing something is not the same as deciding to do it You may have an inclination to do it but there is still a moment where you can decide to do it or not This moment of decision presents a puzzle if being inclined to do something is a form of motivation or self movement how can we

be passive in relation to our own self movement Is our relationship to our inclinations like that of a rider to a horse or is it rather like our relationship to spontaneous judgments or perceptions Schapiro shows that familiar theories of inclination fail to provide compelling answers to these questions as they make being inclined to perform an action either too similar or too dissimilar to the action itself Schapiro puts forward a Kant inspired inner animal view which holds that when you are merely inclined to act the instinctive part of yourself is already active while the rest of you is not The moment of decision is your will at a crossroads Feeling Like It provides a concise and accessible investigation of a new problem at the intersection of ethics philosophy of action and philosophy of mind **Kant and the Scottish Enlightenment** Elizabeth Robinson,Chris W.

Surprenant,2017-06-26 Most academic philosophers and intellectual historians are familiar with the major historical figures and intellectual movements coming out of Scotland in the 18th Century These scholars are also familiar with the works of Immanuel Kant and his influence on Western thought But with the exception of discussion examining David Hume s influence on Kant s epistemology metaphysics and moral theory little attention has been paid to the influence of the Scottish Enlightenment thinkers on Kant s philosophy This volume aims to fill this perceived gap in the literature and provide a starting point for future discussions looking at the influence of Hume Thomas Reid Adam Smith and other Scottish Enlightenment thinkers on Kant s philosophy **Curriculum for Justice and Harmony** Keith C. Barton,Li-Ching

Ho,2021-09-30 Barton and Ho present a global vision of social and civic education one that reorients the field toward justice and harmony Drawing from diverse philosophical and cultural traditions as well as empirical research they introduce curriculum principles designed to motivate and inform students thoughtful and compassionate deliberation of public issues This book argues that the curriculum must prepare young people to take action on issues of justice and harmony societal ideals that are central to all communities Effective action depends on deliberation characterized by emotional commitment collaborative problem solving and engagement with diverse perspectives and forms of expression Deliberation for public action also requires knowledge of people s lives and experiences their insights into social issues and strategies for advancing justice and harmony These curriculum principles are illustrated through case studies of public housing food insecurity climate change gender bias public health exploitation of domestic workers incarceration of racialized minorities the impact of development and environmental change on Indigenous communities and other pressing global concerns For additional resources and related information please visit the authors website [www.justiceandharmony.com](http://www.justiceandharmony.com) **Civil Passions** Sharon

R. Krause,2013-12-08 In this book Sharon Krause argues that moral and political deliberation must incorporate passions even as she insists on the value of impartiality Her work provides a systematic account of how passions can generate an impartial standpoint that yields binding and compelling conclusions in politics Rational Choice and Democratic Deliberation Guido

Pincione,Fernando R. Tesón,2006-07-24 This book offers a comprehensive and sustained critique of theories of deliberative democracy **The Normativity of what We Care about** Katrien Schaubroeck,2013 A love based reason theory as a new

perspective in the debate on practical reasons Reasons and obligations pervade our lives The alarm clock gives us a reason to get up in the morning the expectations of colleagues or clients give us a reason to do our jobs well the misery in developing countries gives us a reason to donate money headaches give us a reason to take an aspirin Looking for unity in variety philosophers wonder what makes a consideration count as a reason to do something The nature and source of practical reasons has been debated intensively over the last three decennia in analytic philosophy This book discusses the three most influential theories in current debates referred to as the desire based the value based and the rationality based theories of practical reasons The author argues that all three are defective because they overlook the role of what agents care about

John Stuart Mill and the Art of Life Ben Eggleston, Dale Miller, David Weinstein, 2011 The Art of Life is John Stuart Mill's name for his account of practical reason In this volume eleven leading scholars elucidate this fundamental but widely neglected element of Mill's thought Mill divides the Art of Life into three departments Morality Prudence or Policy and aesthetics In the volume's first section Rex Martin David Weinstein Ben Eggleston and Dale E Miller investigate the relation between the departments of morality and prudence Their papers ask whether Mill is a rule utilitarian and if so whether his practical philosophy must be incoherent The second section contains papers by Jonathan Riley and Wendy Donner who explore the relation between the departments of morality and aesthetics They discuss issues ranging from supererogation to aesthetic pleasure and humanity's relationship with nature The papers in the third section consider the Art of Life's axiological first principle the principle of utility Elijah Millgram contends that Mill's own life refutes his claim that the Art of Life has a single axiological first principle Philip Kitcher maintains that Mill has a dynamic axiology requiring us to continually refine our conception of the good In the final section three papers address what it means to put the Art of Life into practice Robert Haraldsson locates an Art of Ethics in On Liberty that is in tension with the Art of Life Nadia Urbinati plumbs the classical roots of Mill's view of the good life Finally Colin Heydt develops Mill's suggestion that we regard our own lives as works of art

**Three Faces of Desire** Timothy Schroeder, 2004-08-12 To desire something is a condition familiar to everyone It is uncontroversial that desiring has something to do with motivation something to do with pleasure and something to do with reward Call these the three faces of desire The standard philosophical theory at present holds that the motivational face of desire presents its unique essence to desire a state of affairs is to be disposed to act so as to bring it about A familiar but less standard account holds the hedonic face of desire to reveal the true nature of desire In this view to desire something is to tend to pleasure if it seems that the desired state of affairs has been achieved or displeasure if it seems otherwise thus tying desire to feelings instead of actions In Three Faces of Desire Schroeder goes beyond actions and feelings to advance a novel and controversial theory of desire that puts the focus on desire's neglected face reward Informed by contemporary science as much as by the philosophical tradition Three Faces of Desire discusses recent scientific discoveries that tell us much about the way that actions and feelings are produced in the brain In particular recent

experiments reveal that a distinctive system is responsible for promoting action on the one hand and causing feelings of pleasure and displeasure on the other. This system, the brain's reward system, is the causal origin of both action and feeling and is the key to understanding the nature of desire.
