*Consumption and Its Consequences* Daniel Miller,2013-04-17 This is a book for those looking for different answers to some of today s most fundamental questions What is a consumer society Does being a consumer make us less authentic or more materialistic How and why do we shop How should we understand the economy Is our seemingly insatiable desire for goods destroying the planet Can we reconcile curbs on consumption with goals such as reducing poverty and social inequality Miller responds to these questions by proposing feasible and where possible currently available alternatives drawn mainly from his own original ethnographic research Here you will find shopping analysed as a technology of love clothing that sidesteps politics in tackling issues of immigration There is an alternative theory of value that does not assume the economy is intelligent scientific moral or immoral We see Coca Cola as an example of localization not globalization We learn why the response to climate change will work only when we reverse our assumptions about the impact of consumption on citizens Given the evidence that consumption is now central to the way we create and maintain our core values and

relationships the conclusions differ dramatically from conventional and accepted views as to its consequences for humanity and the planet
