Thomson, 2003-01-01 Of the ten Central and Eastern European countries that have applied for membership in the European Union Romania ranks among the largest and most impoverished Romania represents the final challenge in the European Union's enlargement to the east largely due to its major but underdeveloped agriculture and food sectors The agriculture industry which is a major component of the national economy extends its pervasive influence to both Romanian social life and environment Consequently the transition towards a market oriented economic system will pose new obstacles for the country's farmers processors traders and policymakers While identifying the impediments that surround Romanian agriculture and its inevitable progression towards transition is a simple task the challenges lie in recommending solutions Through careful

analysis of numerous recent studies on reform policies in the Romanian agri food sector during its economic transition this comprehensive examination offers perspicacious suggestions and insights on the following topics in particular international trade credit for agricultural development price policies and rural development The conclusions reached are not only of domestic importance and application they are also of immediate relevance for many post socialist countries for which the agri food sector is a principal vehicle for rural development

**Europe Undivided** Milada Anna Vachudova, 2005-02-17 Europe Undivided analyzes how an enlarging EU has facilitated a convergence toward liberal democracy among credible future members of the EU in Central and Eastern Europe. It reveals how variations in domestic competition put democratizing states on different political trajectories after 1989 and how the EU's leverage eventually influenced domestic politics in liberal and particularly illiberal democracies. In doing so, Europe Undivided illuminates the changing dynamics of the relationship between the EU and candidate states from 1989 to 2004 and challenges policymakers to manage and improve EU leverage to support democracy, ethnic tolerance, and economic reform in other candidates and proto candidates such as the Western Balkan states, Turkey, and Ukraine. Albeit not by design, the most powerful and successful tool of EU foreign policy has turned out to be EU enlargement, and this book helps us understand why and how it works.

Capitalist Diversity on Europe's Periphery Dorothee Bohle, Béla Greskovits, 2012-07-27 With the collapse of the Council for Mutual Economic Assistance in 1991, the Eastern European nations of the former socialist bloc had to figure out their newly capitalist future. Capitalism they found was not a single set of political-economic relations. Rather, they each had to decide what sort of capitalist nation to become. In *Capitalist Diversity on Europe's Periphery*, Dorothee Bohle and Béla Greskovits trace the form that capitalism took in each country, the assets and liabilities left behind by socialism, the transformational strategies embraced by political and technocratic elites, and the influence of transnational actors and institutions. They also evaluate the impact of three regional shocks: the recession of the early 1990s, the rolling global financial crisis that started in July 1997, and the political shocks that attended EU enlargement in 2004. Bohle and Greskovits show that the postsocialist states have established three basic variants of capitalist political economy: neoliberal, embedded neoliberal, and neocorporatist. The Baltic states followed a neoliberal prescription: low controls on capital, open markets, reduced provisions for social welfare. The larger states of central and eastern Europe—Poland, Hungary, and the Czech and Slovak republics—have used foreign investment to stimulate export industries but retained social welfare regimes and substantial government power to enforce industrial policy. Slovenia has proved to be an outlier, successfully mixing competitive industries and neocorporatist social inclusion. Bohle and Greskovits also describe the political contention over such arrangements in Romania, Bulgaria, and Croatia. A highly original and theoretically sophisticated typology of capitalism in postsocialist Europe, this book is unique in the breadth and depth of its conceptually coherent and empirically rich comparative analysis.
