Lee, 2014-03-15 In *An Epidemic of Rumors* Jon D Lee examines the human response to epidemics through the lens of the 2003 SARS epidemic Societies usually respond to the eruption of disease by constructing stories jokes conspiracy theories legends and rumors but these narratives are often more damaging than the diseases they reference The information disseminated through them is often inaccurate incorporating xenophobic explanations of the disease s origins and questionable medical information about potential cures and treatment Folklore studies brings important and useful perspectives to understanding cultural responses to the outbreak of disease Through this etiological study Lee

shows the similarities between the narratives of the SARS outbreak and the narratives of other contemporary disease outbreaks like AIDS and the H1N1 virus His analysis suggests that these disease narratives do not spring up with new outbreaks or diseases but are in continuous circulation and are recycled opportunistically Lee also explores whether this predictability of vernacular disease narratives presents the opportunity to create counter narratives released systematically from the government or medical science to stymie the negative effects of the fearful rumors that so often inflame humanity With potential for practical application to public health and health policy *An Epidemic of Rumors* will be of interest to students and scholars of health medicine and folklore

Narrative Landmines Daniel Leonard Bernardi, Pauline Hope Cheong, Chris Lundry, Scott W. Ruston, 2012-03-12 Islamic extremism is the dominant security concern of many contemporary governments spanning the industrialized West to the developing world *Narrative Landmines* explores how rumors fit into and extend narrative systems and ideologies particularly in the context of terrorism counter terrorism and extremist insurgencies Its concern is to foster a more sophisticated understanding of how oral and digital cultures work alongside economic diplomatic and cultural factors that influence the struggles between states and non state actors in the proverbial battle of hearts and minds Beyond face to face communication the authors also address the role of new and social media in the creation and spread of rumors As narrative forms rumors are suitable to a wide range of political expression from citizens insurgents and governments alike and in places as distinct as Singapore Iraq and Indonesia the case studies presented for analysis The authors make a compelling argument for understanding rumors in these contexts as narrative IEDs low cost low tech weapons that can successfully counter such elaborate and expansive government initiatives as outreach campaigns or strategic communication efforts While not exactly the same as the advanced technological systems or Improvised Explosive Devices to which they are metaphorically related narrative IEDs nevertheless operate as weapons that can aid the extremist cause

The Cave 4 Apocryphon of Jeremiah and the Qumran Jeremianic Traditions Kipp Davis, 2014-10-13 The Cave 4 Apocryphon of Jeremiah C from Qumran survives in several copies and presents significant links between the prophet Jeremiah the scriptural book of Jeremiah and the collectors of the Dead Sea Scrolls Because the prophet is only occasionally named in the Scrolls and there are only a few clear instances where the book is cited Jeremiah appears to have had a limited impact on the imagination of the Qumranites However through a careful appraisal of the Apocryphon manuscripts and a reconsideration of Jeremiah s influence in the Dead Sea Scrolls via his reputational authority this study shows that clusters of traditions were tied to Jeremiah s prophetic and priestly distinction with an emphasis on matters of leadership and empire

Conspiracy Narratives South of the Border Gonzalo Soltero, 2020-10-25 This book examines four conspiracy narratives from Mexico that push the boundaries of conspiracy research in a new direction They include narratives about Lee Harvey Oswald's visit to Mexico City shortly before he apparently assassinated JFK and street gangs across borders and how some of our worst fears are projected into them Mexico is a fertile terrain for conspiracy theories due to its complex social environment and its proximity to the United States which not only made it a strategic platform during the Cold War but also today's land of bad hombres that according to Donald Trump should be fended off with a wall Conspiracy theories are always narrative in nature telling us about the state of the world and the actors behind such states of affairs This narrativity tends to be so enthralling that they have increasingly become the substance of entertainment and even politics This volume analyses Mexican conspiracy narratives explaining how they produce meaning in a variety of different social and political contexts This book will be of interest to researchers of conspiracy theories crime and its representations Mexican politics and society and US Latin American relations

The Watercooler Effect Nicholas DiFonzo Ph.D., 2008-09-11 A fresh look at informal communication and how information spreads rapidly An absorbing and compelling book Daniel J Levitin author of *This Is Your Brain on Music* and *The World in Six Songs* Nicholas DiFonzo is one of the world's experts on why rumors spread If you've ever wondered where rumors come from or whether some new rumor is true this book will fascinate you Chip Heath coauthor of *Made to Stick* Why Some Ideas Survive and Others Die During the 2008 presidential election both campaigns sought to detect decipher and defuse a host of derogatory rumors After Hurricane Katrina rumors swirled about stranded residents shooting rescue workers Tipping off the economic crisis costly rumors crippled financial institutions as they flew through the stock market Psychologist Nicholas DiFonzo has studied hearsay for more than fifteen years and in this book he shows how the process that gave rise to these troubling rumors is fundamentally the same as a t t e around the company watercooler With *The Watercooler Effect* you'll learn how businesses or campaigns can control destructive rumors how to sort fact from fiction why a no comment response can be more detrimental than helpful how an organization can increase trust from within why rumors can actually become more truthful the more they spread DiFonzo argues that rumors stem

from our deeply rooted motivation to make sense of the world and are a window into both individual and group psychology Using fascinating case studies and surprising research findings The Watercooler Effect gives you the tools to find the truth behind the rumor **The Psychology of Organizational Change** Shaul Oreg,Alexandra Michel,Rune Todnem

sees as a direct result of technological advancements *The Oxford Handbook of Gossip and Reputation* Francesca Giardini, Rafael Wittek, 2019-05-22 Gossip and reputation are core processes in societies and have substantial consequences for individuals groups communities organizations and markets Academic studies have found that gossip and reputation have the power to enforce social norms facilitate cooperation and act as a means of social control The key mechanism for the creation maintenance and destruction of reputations in everyday life is gossip evaluative talk about absent third parties Reputation and gossip are inseparably intertwined but up until now have been mostly studied in isolation The Oxford Handbook of Gossip and Reputation fills this intellectual gap providing an integrated understanding of the foundations of gossip and reputation as well as outlining a potential framework for future research Volume editors Francesca Giardini and Rafael Wittek bring together a diverse group of researchers to analyze gossip and reputation from different disciplines social domains and levels of analysis Being the first integrated and comprehensive collection of studies on both phenomena each of the 25 chapters explores the current research on the antecedents processes and outcomes of the gossip reputation link in contexts as diverse as online markets non industrial societies organizations social networks or schools International in scope the volume is organized into seven sections devoted to the exploration of a different facet of gossip and reputation Contributions from eminent experts on gossip and reputation not only help us better understand the complex interplay between two delicate social mechanisms but also sketch the contours of a long term research agenda by pointing to new problems and newly emerging cross disciplinary solutions *The Human Sausage Factory* Eda Kalmre, 2013-08-10 Under certain conditions some rumours which were established as part of folklore already long ago may become fixed in the memory and the subconscious of several generations This is what happened with the rumour about a human sausage factory after the Second World War In Tartu Estonia this rumour obtained a symbolic meaning and power due to the politics of the totalitarian Soviet regime The memories of the post war period are still vivid in the collective mind and the onetime rumour of sausage factories incorporates the population s tensions pain loss choices defiance and irreconcilability The individual and community emotions that are brought to a focus in this discourse are an indicator of defining social boundaries and behaviour of us and them When describing the events that took place in Tartu folklore becomes a powerful tool with which to construe the meaning of the era at the social level Through documents photos and people s memories the book offers an insight into the city of Tartu after the Second World War and reveals the several layers of meaning represented by rumour in this period *Political Humility* Blake Roeber, 2024-04-30 This book aims to change the way we think about politics talk about politics and vote It does this in two ways First it shows it s impossible for a Republican Democrat or voter in any political party to possess a significant level of knowledge of facts that would help their party secure or maintain political power It calls this knowledge political knowledge and shows how unfeasible it is for anyone to have it Second it explains how we might best be politically engaged given that we have virtually no political knowledge To argue that it is impossible for any

person to possess a significant amount of political knowledge the book depends on two empirically verified facts The first is that we have virtually no means of acquiring political information except by believing what other people say The second is that when people start talking about politics they become highly unreliable They are very likely to say false things when voicing political opinions because they employ a belief forming process that psychologists call identity protective cognition This is a type of reasoning aimed not at truth but at preserving one's membership in some identity defining group In combination these two observations cast serious doubt on all of our political beliefs As the book explains however the proper response to this doubt is not to simply avoid politics Rather the best response is a kind of humble but real engagement with politics that constantly manifests one's awareness that one is at best making educated guesses rather than speaking and acting from knowledge

Out of the Burning House Sandy Hobbs, Willie Thompson, 2011-05-25 This unique collaboration between a Marxist historian and behaviourist psychologist is a vivid picture of the cultural milieu they experienced at Aberdeen University and of social forces often overlooked in histories of the time Scientific Humanism The New Left and precursors of the Women's Liberation Movement As students together in the MacMillan Era they shared an attachment to socialist secular and scientific values Like Brecht they saw those unwilling to commit to revolutionary socialism as like people in a burning house asking if it is raining outside before they agree to escape They followed different paths in their subsequent lives one became an historian and long time member of the Communist Party the other although a radical behaviourist unusually focussed on contemporary folklore and child labour
